

July 2022

Prepared by
Sector Development Office
Economic Development and Culture, City of Toronto

An electronic version of this directory can be downloaded at www.toronto.ca/green

Front Cover Photos Courtesy of KindHuman, Greenspoke, and WIKE

Organizations included in this directory are located generally within the Greater Toronto Area (GTA). This helps capture local supply chain linkages between organizations and to include the travel patterns that Toronto residents might cover for employment and the purchasing of services and products. The geographic parameters of the GTA best captures these travel patterns and reflect a more cohesive group of green businesses operating in and serving the areas where Toronto residents live and interact.

Figure 1: Map of the Greater Toronto Area

NOTE: This list is not to be considered a complete listing of all companies and organizations operating in the bike sector in the vicinity of Toronto. While every effort has made to maintain accuracy, the City of Toronto ("the City") does not guarantee that the information contained in the directory is always correct or accurate. The City does not warrant or make any representations as to the quality, content, accuracy or completeness of the information. The City makes no warranties, expressed or implied as to the fitness of the information for any purpose, or to results obtained by individuals using the information and is not responsible for any action taken in reliance on the information contained in this directory.

Want to Get Listed in the Directory?

This directory should not be considered complete.

- If you are part of the bike industry and provide locally made products and want to be listed in the directory then please fill in the directory form at:
<https://s.cotsurvey.chkmkt.com/TOBikeDirectory>
- If you identify a firm that should be listed here or an error then please send an email to:
greentech@toronto.ca.

Introduction

Bikes have traditionally been considered a recreational activity in North America. However, they are increasingly being used as a viable transportation mode here in Toronto, as they are in most of Europe, South America and Asia. Travelling by bicycle is a great way for people to reduce transportation costs, lower carbon footprints, and participate in a healthy and active lifestyle.

The global bicycle market was valued at approximately \$20.3 billion in 2019, and expected to soar to \$28.7 billion by 2027¹. Since the pandemic, bike sales across North America have surged. Canada has a vibrant bike industry with a number of globally competitive bike manufacturers, and Toronto and region has one of the largest bike industry clusters in Canada.

The **Bicycle or Bike Industry** is broadly defined as the industry concerned with bicycles and cycling. It includes bicycle manufacturers and makers, and manufacturers of parts or components, accessories and bike infrastructures (i.e. bike racks). The industry also includes distributors, retailers, bike repair shops, bicycle organizations, cycle event organizers and promoters, and bicycle related service providers such as bike repair shops and rental services.

In recent years, the industry has increasingly begun to expand into a micro-mobility industry, which includes not only human and electric powered bikes but also scooters and light EVs.

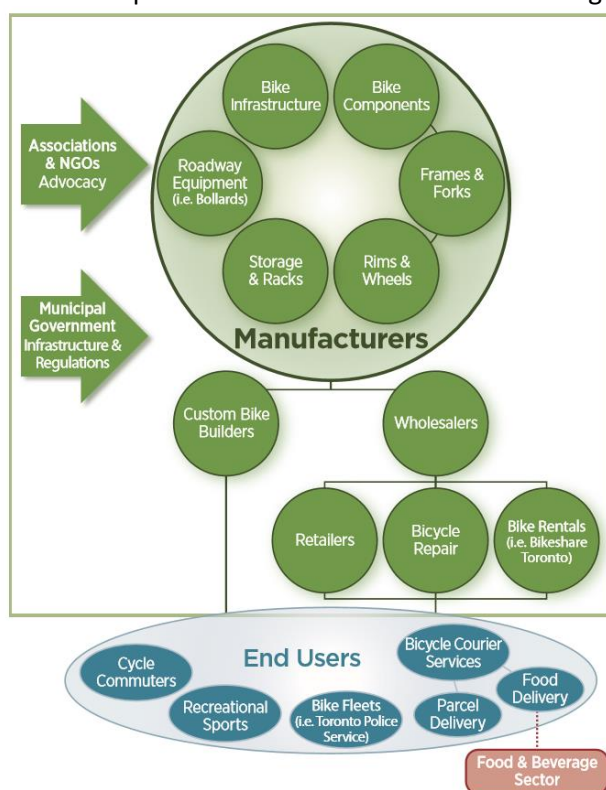

Figure 2: Composition of Toronto's Bike Cluster

¹ [Global Bicycle Market to Reach \\$28.66 Billion by 2027: \(globenewswire.com\)](https://www.globenewswire.com)

Bike Directory Categories

This directory is designed to help consumers identify locally and Canadian made products which can contribute to the economic vitality of Toronto and the surrounding region. It is broken down into four broad categories:

1. Local Bike/E-bike/Light EV Manufacturers

For individuals who are looking at purchasing local this provides a listing of Toronto area firms that make bikes or who are custom bike makers. They either sell directly or work through local bike retailers. This list will include both conventional bikes as well as e-bikes, scooters and light EVs. E-bikes are bicycles that are equipped with an electric motor to assist while the rider is pedalling. This motor gets its power from a rechargeable battery, which can either be removed to be charged, or charged on a bike near an outlet. One benefit of this option over conventional bicycles is the ability to ride both faster and further with limited effort. Light Electric Vehicles (LEVs) are small 3 or 4 wheeled cars designed to be driven on urban streets at low speeds. Bikes, e-bikes, scooters and LEVs can both be environmentally sustainable and cost-effective alternatives to gas-powered cars for shorter trips.

2. Local Bike Rack Manufacturers

Cyclists need a place to park their bikes that is secure. Bike racks are installed by many types of organizations including governments and public agencies, school boards, and real estate owners (condos, apartments, office towers and retailers). These racks can follow standard designs or can be custom made to suit the needs of the property owner. These firms will also often make other bike infrastructure items such as bollards and kerbs.

3. Local Bike Parts and Accessories Manufacturers

Many local bike makers also make parts and accessories and they are listed in the above section. There are also firms that just specialize in parts, accessories or bike making services (such as frame painting) and those firms are listed in this section.

4. Bicycle Industry Organizations

These bicycle organizers are key to conducting research on the industry, spreading awareness and promoting the use of bicycles as a mode of transportation.

5. Bike Hubs

Bike hubs are non-profits that can include repair and training facilities, as well as industry trade support. They often help to foster not only more of a culture of repair and reuse, but also a sense of community among bike riders.

6. Wholesalers

These businesses distribute large quantities of bike industry products to retailers.

7. Service Providers

These businesses provide either repair or rental services, which are a crucial aspect to maintaining and growing the use of bicycles as a form of transportation in Toronto.

8. Retailers

These bike stores sell bicycles from different manufacturers from around the world directly to the public. This can range from small businesses building custom bikes to large retailers that sell an extensive list of brand and cater to a wide range of demographics.

Supporting Local Bicycle Maintenance, Repair and Reuse

There are several ways that consumers can support the Toronto region bike industry while also contributing to reducing our environmental footprint, traffic congestion and following distancing guidelines.

Where available, consider purchasing a pre-owned or refurbished bike from a local company. This can be done either directly from bike owners, or through local bike shops. Many bike stores will take trade-ins of used bikes, which they then sell refurbished. Some stores even specialize in refurbishing and renewing bikes - this way you get an "almost new" bike with more local content.

To expand the lifespan of your existing bike you can also purchase bike repair tools, equipment, and repair services from local Canadian companies. In addition to this being a cost-conscious option for consumers, purchasing pre-owned bicycles or utilizing local maintenance and repair services can help to keep waste out of landfill by giving a new life to bicycles that would otherwise become scrap metal.

As part of its efforts to reduce waste, the City of Toronto partners with community organizations to deliver reduce and reuse programs. This includes three bicycle repair hubs (Gateway Bike Hub, CultureLink Bike Hub and Access Alliance's Scarborough Cycles) which provides dedicated workshop spaces to train residents in bicycle assembly, as well as access to tools, equipment, supplies and skills needed to repair and maintain bicycles. Program activities include Earn-a-Bike, DIY sessions, Repair Clinics and more. As of January 2020, 2,000 bikes have been repaired and refurbished through the program.

Cycle Toronto also maintains a list of spaces where the public can learn how to repair bikes <https://www.cycleto.ca/DIY>

Finally, consumers can also consider donating their old bicycles to companies that can redistribute them to people in need. Several of these organizations are listed in the bike organization table of the directory.

Bike Parking in Toronto

The City of Toronto has been actively engaged in providing safe and secure bike parking for cyclists for more than 30 years and in 1984 was the designer of the iconic Post-and-Ring bicycle parking rack which can now be found in cities around the world. There are four principle types of bike parking available through the city:

- Bicycle Lockers
- Bicycle Stations
- Bicycle Corrals
- Bicycle Lock-Up Rings (Post and Ring)

Details and locations of City operated bike parking can be found at <https://www.toronto.ca/services-payments/streets-parking-transportation/cycling-in-toronto/bicycle-parking/>

The City has also produced an extensive Guideline for The Design and Management of Bicycle Parking Facilities. These guidelines provide planners, developers, and property managers with information to support the design, construction, and management of high quality bicycle parking facilities.

<https://www.toronto.ca/wp-content/uploads/2017/08/8d75-Guidelines-for-the-Design-and-Management-of-Bicycle-Parking-Facilities.pdf>

What is A Made in Toronto Bike Anyways?

Like most technologies, bikes are made up of many engineered and crafted parts and there is a complex supply chain behind producing the final street (or dirt) bike. The best bike makers will select their suppliers with both quality and cost considerations in mind and this can result in a bike being literally made in 10 countries when stripped down to its essential parts. Most products are built that way today - from bikes, to planes, trains and automobiles.

So how do we define a locally made bike? It's all about touch points and who has control of the supply chain and the final process. Are there things actually made in Toronto (bike frames, handle bars, fabric cutting and stitching, surface preparation and painting)? Is the bike (or bike infrastructure) designed (i.e. decisions made on who will supply the components) in the Toronto region? Is the final assembly done in Toronto? Are there critical components of the manufacturing operation in Toronto (the head office counts, warehousing doesn't). So we include Toronto-based bike manufacturers in this lists as, in the end, this comes down to what types of local jobs the firm supplies. The manufacturing industry includes designers, skilled trades, and decision makers while service industries such as importers and distributors create jobs primarily in warehousing, distribution and retail.

Bike Industry Organizations

Company/Organization	Address	City	Email	Description
46forGeorge			contact form on website	Based on a movement that started in light of the murder of George Floyd, rooted in the fight against racial injustice around the globe. Aims to provide bicycles to children around the world, reducing their commute time to get an education
Cycle Salvation	473 Bronson Ave	Ottawa	csalvation@causewayworkcentre.org	Strives to achieve a triple bottom line (people, profit, planet) by providing training and employment in the field of bike mechanics to people who are economically disadvantaged, while at the same time diverting bikes destined for scrap and landfill sites
Canadian Electric Bike Association	111 Province St. N	Hamilton	info@cebassociation.ca	Provides training for e-bike technicians. If you're thinking about getting into the electric bike industry or currently running a shop our training will give you the ability to diagnose any make or model in 15 minutes or less
Winterborne Bicycle Institute	59 Kirby Ave Unit 11B	Hamilton	winterbornebikes@gmail.com	Professional bicycle mechanic training school/ institute that helps elevate service and fulfills the demand for skilled mechanics in bicycle shops across Canada
Cycle Toronto	192 Spadina Ave, Office 215	Toronto	info@cycleto.ca	Member-supported non-profit organization focused on advocacy, education and encouragement, Works to shape policy and infrastructure, and build community to transform our city's cycling culture

Bike Hubs

Company/Organization (click on name for website)	Address	City	Postal Code	Email	Description
Toronto Community Bike Collectives		Toronto		info@torontocommunitybikecollectives.com	Non-profit organizations focused on providing a venue for people (beginners to advanced mechanics!) to learn how to fix their own bikes and build community
Scarborough Cycles		Toronto	M1L 1A8	scarboroughcycles@accessalliance.ca	Offers access to bicycles, tools, do-it-yourself repair clinics, workshops, group rides, and civic engagement/mentorship opportunities for residents

Company/Organization (click on name for website)	Address	City	Postal Code	Email	Description
Gateway Bike Hub	10 Gateway Blvd Suite 100 B	Toronto	M3C 3A1		Community project established with the primary goal of encouraging bicycle repair and refurbishment, reducing waste and promoting cycling culture
Regenis- Cycle York	95 The Pond Rd., Unit 90	North York	M3J 0L1	info@regenis.eco	Non-profit DIY community bike space, cycling advocacy, education, and social group located in the Black Creek neighbourhood of Toronto
CultureLink Bike Hub	15 Tobermory Dr	Toronto	M3N 2R5	reception@culturelink.ca	Supports local cyclists and fosters a culture of repair and reuse. We help people fix their own bicycles, and provide bike repair workshops on-site and in the neighbourhood.
Bike Sauce	341 Broadview Ave	Toronto	M4M 2H1	contact form on website	100% volunteer-run DIY bike repair space and community hub
South Riverdale Bicycle Repair Clinic	955 Queen Street East	Toronto	M4M 3P3	pyoung@srhc.com	Free assisted bicycle repair since 2005. Part of a wider non-profit, multi-service organization , South Riverdale Community Health Centre, that provides primary healthcare, social and community outreach services with an emphasis on health promotion and disease prevention
Charlie's Freewheels	242.5 Queen St E	Toronto	M5A 1S3	info@charliesfreewheels.ca	Uses bicycles to support the development of empowered young leaders, and self-assured young cyclists Improves youth access to bicycles, facilitating bicycle-related skill development
Bikechain	563 Spadina Crescent	Toronto	M5T 1R2	bikechainuoft@gmail.com	Non-profit bicycle shop working to make cycling and bicycle repairs more accessible for students and the wider community
Fix Coffee + Bikes	80 Gladstone Avenue	Toronto	M6J 3K9	info@fixcb.ca	Inclusive community hub for expert bike repairs, beautiful new rides, innovative accessories, delicious coffee and tasty bites, all under one roof.
Bike Pirates	1564 Bloor St. W.	Toronto	M6P 1A4	info@bikepirates.com	Volunteer run organization that provides a Do-It-Yourself workspace

Individual Listings

Manufacturers

Local Bike/Ebike/Light EV Manufacturers/Makers			
Elby Mobility	Newmarket	https://elbymobility.com/	Elegantly designed and well thought out e-bike that combines simplicity, fully integrated technology and category-leading range with the pure joy of riding a bicycle.
Emmo	Toronto	https://emmo.ca/collections	Variety of Toronto electric motorcycle e-bikes for you to choose from. Proudly designed in Canada. Our motorcycle e-bikes offer you a safe, modern, convenient way of transportation.
Helix Labs Inc	North York	www.helix.ca	World's first bicycle to be robotically welded in an inert chamber. It uses over 30 titanium machined parts that are made on our precision multi-axis CNC machines
KindHuman	Toronto	https://www.kindhuman.cc/	Every KindHuman Bicycle is custom built, by you - The Rider. You build your bike from the wheels up using parts and accessories from the best suppliers in the world. Fit is everything and when you buy one of our bikes it is built to fit you perfectly from day one without additional parts and added costs
Mariposa Bikes (Bicycle Specialties Ltd.)	Toronto	mariposabicycles.ca	Hand-built custom steel Mariposa Bicycles, Allied carbon bicycle, Linus City bicycles, bicycle repair, bicycle painting, Mariposa Cycling Tours
No. 22 Bicycle Company	Toronto	https://22bicycles.com/	Builds bicycles for the rider who appreciates perfectly tuned ride quality as much as stiffness and low weight—the rider who loves to ride for riding's sake
Revelo Bikes	Toronto	www.revelo.ca/	specializes in making bikes more portable for urban living. Revelo THINstem turns any full size bike into a THIN bike by rotating the handlebar 90 degrees. Revelo's LIFT folding bikes are the only bikes with THINstem and SABS anti-lock braking technologies
RSD Bikes	Toronto	http://rsdbikes.com	We design bikes that we want to ride. We ride them mostly in Ontario and sometimes in the coastal mountains of BC. Our business model has been consumer direct since 2016 and all sales are online
Staran Cycles		https://www.starancycles.com/	Studying the problem we found the best way to get prices down, while not cutting corners, and still delivering the best ride experience was to keep it simple. Ten models, with a half dozen variations each just complicates things. Our bikes aren't for everyone, but for those who know bikes, it's clear what a Staran brings to the table
True North Cycles Ltd	Belwood	www.truenorthcycles.com	Manufacturer of high quality, custom bicycles. Whether you like biking for sports, commuting or world exploring, your ride will be so much better if the bicycle you riding on is a perfect custom fit! Every bike we make is custom – designed with you and built for you
Vastos	Waterloo	https://vastos.ca/	All our bicycles are handcrafted in Ontario. We do 100% carbon fiber work in-house in Ontario
WIKE	Guelph	www.wike.ca	We are WIKE... the Walk and Bike Company. We're trying to change the world and it's working! We believe in the active transportation movement and support it at home and abroad. Our mission is to design bike trailers that Directory of Toronto Made Bicycles 12 allow people to walk and cycle effortlessly through their everyday needs

Local Bike Rack Manufacturers			
Barco Products Canada	Brampton	www.barcoproducts.ca/parking-lot-safety/bike-parking	Bike racks offered by Barco Products Canada are commercial-grade solutions that help protect bikes against theft and vandalism. Our indoor racks and outdoor racks are made of durable materials and are available in different colours and bike capacities. These products give riders peace of mind when leaving their bikes in public.
Bike Rack Mfg. & Dist. Co.	Vaughan	http://www.bikerack.ca/index.html	Bike Rack Mfg. & Dist. Company is located in Toronto Ontario, Canada and is presently distributing bike racks throughout North America. Bike rack products are innovative and are also patented.
Classic Displays	Mississauga	www.classicdisplays.com	Classic Displays manufactures, supplies and installs a variety of bike racks, lane separators and bollards. Rack styles include interior wall mounted units and exterior racks such as the current specified post & ring rack used by the city of Toronto and the Stacker bike rack that can be found along the Bloor bike lane.
Frost Products	Burlington	www.frostproductsltd.com	Frost is a family owned and operated Canadian manufacturer of high quality commercial site furnishings and washroom/lobby accessories. We have been manufacturing since 1961 and use high grade Canadian steel and stainless steel. Our products provide durable and modern solutions to both commercial and residential spaces
