

June 22 2022: Survey Question - Intent to Administer COVID-19 Vaccine to Children 6 Months to 4 Years Old in Your Clinical Office Practice

Toronto Public Health (TPH) is currently planning for the pending Health Canada approval of COVID-19 vaccine for children 6 months to 4 years of age. Once a vaccine is licensed and available for use, TPH is hopeful that all health care partners will work collaboratively to support equitable and easy access to the COVID-19 vaccine for this additional age group.

Request:

- Please [click here](#) to indicate whether you intend to vaccinate this age group in your clinical office practice, should approval be granted from Health Canada.
 - This single question will take **less than one minute** to complete.

Thank you for your time.
