

Martin Grove Road Watermain Replacement Crossing Mimico Creek

Municipal Class Environmental Assessment Study Notice of Study Completion

The City of Toronto has completed a Municipal Class Environmental Assessment (EA) study to replace / rehabilitate aged watermain crossing Mimico Creek as part of the watermain replacement program along Martin Grove between south of Savalon Court and Lorraine Gardens. The objective of the study is to provide a recommendation for the alignment of the replacement watermain.

The watermain on Martin Grove Road are 92 and 72 years old, have reached their end of service life cycle, have a history of breaks and need to be brought into a state of good repair.

Following consultation with the community and stakeholders, the alignment for the replacement will be located east of the Martin Grove Road bridge and outside of the Martin Grove right-of-way, but within Ravenscrest Park.
