

CHILDREN 5-11:

Get your COVID-19 bivalent booster for the best protection

Children can get a bivalent booster 6 months after 2nd dose or a COVID-19 infection.

A booster gives extra protection & lowers the chance of getting & spreading COVID-19.

Getting your booster helps protect your friends, family, & people who can't get vaccinated.

Boosters are safe—they were carefully studied & millions of doses have been given worldwide.

Book at a City-run clinic at [Toronto.ca/COVID19](https://toronto.ca/COVID19) or 1-833-943-3900.
