

DIRECTORY OF THE TORONTO BICYCLE INDUSTRY

*Including e-bikes and light EVs made by companies located in
the Greater Toronto Region*

Fourth Edition

July 2023

Prepared by
Sector Development Office
Economic Development and Culture, City of Toronto

An electronic version of this directory can be downloaded at www.toronto.ca/green

Front cover photos courtesy of Bridge Bikes Works, Fix Coffee + Bikes, KindHuman, Mariposa Bikes

Organizations included in this directory are located generally within the Greater Toronto Area (GTA). This helps capture local supply chain linkages between organizations and includes the area that Toronto residents might travel for employment and the purchasing of goods and services. The geographic parameters of the GTA best captures these travel patterns and reflect a more cohesive group of green businesses operating in and serving the areas where Toronto residents live and interact.

Figure 1: Map of the Greater Toronto Area

NOTE: This list is not to be considered a complete listing of all companies and organizations operating in the bike sector in the vicinity of Toronto. While every effort has made to maintain accuracy, the City of Toronto ("the City") does not guarantee that the information contained in the directory is always correct or accurate. The City does not warrant or make any representations as to the quality, content, accuracy or completeness of the information. The City makes no warranties, expressed or implied as to the fitness of the information for any purpose, or to results obtained by individuals using the information and is not responsible for any action taken in reliance on the information contained in this directory.

Want to Get Listed in the Directory?

This directory should not be considered complete.

- If you are part of the bike industry and provide locally made products and want to be listed in the directory, then please fill in the directory form at:
<https://s.cotsurvey.chkmkt.com/?e=272436&h=AED154218F023E8&l=en>
- If you identify a firm that should be listed here or an error then please send an email to:
greentech@toronto.ca.

Introduction

Bicycles or “bikes” have traditionally been considered a recreational activity in North America. However, they are increasingly being used as a viable transportation mode here in Toronto, as they are in most of Europe, South America and Asia. Travelling by bicycle is a great way for people to reduce transportation costs, lower carbon footprints, and participate in a healthy and active lifestyle.

The global bike market was valued at approximately \$82.5 billion in 2022 and expected to soar to \$127.83 billion by 2029¹. Since the pandemic, bike sales across North America have surged. Canada has a vibrant bike industry with a number of globally competitive bike manufacturers, and Toronto and the surrounding region has one of the largest bike industry clusters in Canada.

The Bike Industry is broadly defined as the industry concerned with bicycles and cycling. It includes bicycle manufacturers and makers, and manufacturers of parts or components, accessories and bike infrastructures (i.e. bike racks). The industry also includes distributors, retailers, bicycle organizations, cycle event organizers and promoters, and bicycle related service providers such as bike repair shops and rental services.

In recent years, the industry has increasingly begun to expand into a micro-mobility industry, which includes not only human and electric powered bikes but also scooters and light EVs. For a definition of the micro-mobility industry please see the inside page of the back cover.

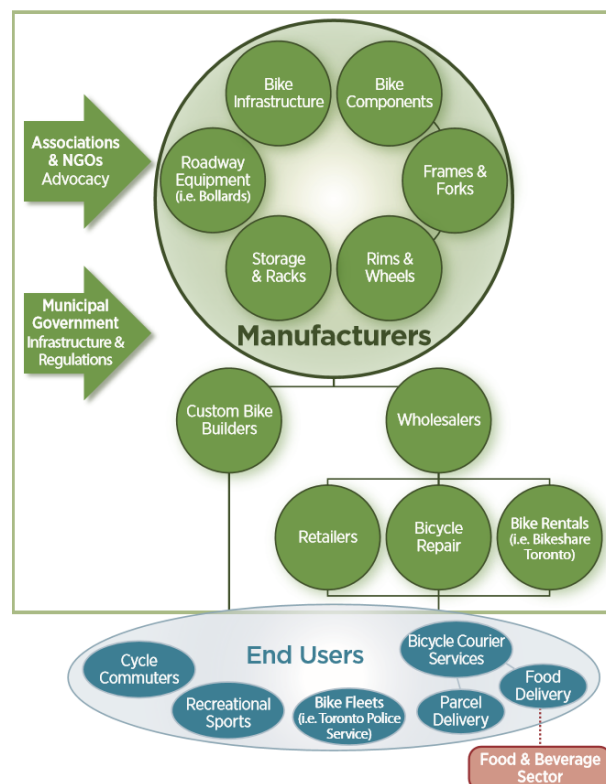

Figure 2: Composition of Toronto's Bike Cluster

¹ [Bicycle Market Size Worth USD 127.83 Billion, Globally, by 2029 at 6.5% CAGR: \(globenewswire.com\)](https://www.globenewswire.com/press-releases/bicycle-market-size-worth-usd-12783-billion-globally-by-2029-at-65-cagr-138848428.html)

Bike Directory Categories

This directory is designed to help consumers identify locally and Canadian made products and the local companies that sell and service those products. This contributes to the economic vitality of Toronto and the surrounding region by creating jobs and keeping money in the local economy. It is broken down into eight categories:

1. Manufacturers

1.1 Local Bike/E-bike/Light EV Manufacturers

For individuals who are looking at purchasing local made this provides a listing of Toronto area firms that make bikes or who are custom bike makers. They either sell directly or work through local bike retailers stores. This list includes both conventional bikes as well as e-bikes, scooters and light EVs. These “micro-mobility” vehicles can both be environmentally sustainable and cost-effective alternatives to gas-powered cars for short trips. For a definition of micromobility please go to the inside of the back cover.

1.2 Local Bike Rack Manufacturers

Cyclists need a place to park their bikes that is secure. Bike racks are installed by many types of organizations including governments and public agencies, school boards, and real estate owners (condos, apartments, office towers and retailers). These racks can follow standard designs or can be custom made to suit the needs of the property owner. These firms will also often make other bike infrastructure items such as bollards and kerbs.

1.3 Local Bike Parts and Accessories Manufacturers

Many local bike makers also make parts and accessories, and they are listed in the above section. There are also firms that just specialize in parts, accessories or bike making services (such as frame painting or design) and these firms are listed in this section.

2. Bicycle Industry Organizations

These bicycle organizers are key to strengthening the local bike industry by providing training, conducting research on the industry, spreading awareness and promoting the use of bicycles as a mode of transportation.

3. Bike Hubs

Bike hubs are non-profits that can include repair and training facilities, as well as industry trade support. They often help to foster not only more of a culture of repair and reuse, but also a sense of community among bike riders.

4. Wholesalers

These businesses distribute large quantities of bike industry products to retailers.

5. Bike Rental Services

These businesses are often referred to as providing “mobility as a service.” They provide micromobility vehicles on short term bases for a fee.

6. Bike Service and Repair Shops

These repair shops provide repair services for bikes for maintaining bicycles in working order. This segment of the supply chain often consists of one-man services that work out of a small garage or provide mobile repairs. They often can come to your home or place or work to fix your bike.

7. Bike Shops

Bike stores sell bicycles from different manufacturers from around the world directly to the public. They can range from small businesses building custom bikes to large retailers that sell an extensive list of brands and cater to a wide range of demographics. They provide a variety of services to the cyclists including selling parts and accessories, providing advice and undertaking repair and maintenance of bikes.

What is A Made in Toronto Bike Anyways?

Like most technologies, bikes are made up of many engineered and crafted parts and there is a complex supply chain behind producing the final street (or dirt) bike. The best bike makers will select their suppliers with both quality and cost considerations in mind and this can result in a bike being literally made in 10 countries when stripped down to its essential parts. Most products are built that way today - from bikes, to planes, trains and automobiles.

So how do we define a locally made bike? It's all about touch points and who has control of the supply chain and the final process. Are there things actually made in Toronto (bike frames, handle bars, fabric cutting and stitching, surface preparation and painting)? Is the bike (or bike infrastructure) designed (i.e. decisions made on who will supply the components) in the Toronto region? Is the final assembly done in Toronto? Are there critical components of the manufacturing operation in Toronto (the head office counts, warehousing doesn't). So we include Toronto-based bike manufacturers in this lists as, in the end, this comes down to what types of local jobs the firm supplies. The manufacturing industry includes designers, skilled trades, and decision makers while service industries such as importers and distributors create jobs primarily in warehousing, distribution and retail.

Supporting Local Bicycle Maintenance, Repair and Reuse

There are several ways that consumers can support the Toronto region bike industry while also contributing to reducing our environmental footprint, traffic congestion and following distancing guidelines.

Where available, consider purchasing a pre-owned or refurbished bike from a local company. This can be done either directly from bike owners, or through local bike shops. Many bike stores will take trade-ins of used bikes, which they then sell refurbished. Some stores even specialize in refurbishing and renewing bikes - this way you get an "almost new" bike with more local content.

To expand the lifespan of your existing bike you can also purchase bike repair tools, equipment, and repair services from local Canadian companies. In addition to this being a cost-conscious option for consumers, purchasing pre-owned bicycles or utilizing local maintenance and repair services can help to keep waste out of landfill by giving a new life to bicycles that would otherwise become scrap metal.

There are nine bicycle repair hubs in the city of Toronto which provide dedicated workshop spaces to train residents in bicycle assembly, as well as access to tools, equipment, supplies and skills needed to repair and maintain bicycles. Program activities include Earn-a-Bike, DIY sessions, Repair Clinics and more. As of January 2020, 2,000 bikes had been repaired and refurbished through a program that was offered by the City's Solid Waste Management division.

Finally, consumers can also consider donating their old bicycles to companies that can redistribute them to people in need. Several of these organizations are listed in the bike organization table of the directory.

Bike Parking in Toronto

The City of Toronto has been actively engaged in providing safe and secure bike parking for cyclists for more than 50 years and in 1984 was the designer of the iconic Post-and-Ring bicycle parking rack which can now be found in cities around the world. There are four principal types of bike parking available through the city:

- Bicycle Lockers
- Bicycle Stations
- Bicycle Corrals
- Bicycle Lock-Up Rings (Post and Ring)

Details and locations of City operated bike parking can be found at <https://www.toronto.ca/services-payments/streets-parking-transportation/cycling-in-toronto/bicycle-parking/>

The City has also produced an extensive Guideline for The Design and Management of Bicycle Parking Facilities. These guidelines provide planners, developers, and property managers with information to support the design, construction, and management of high-quality bicycle parking facilities.

<https://www.toronto.ca/wp-content/uploads/2017/08/8d75-Guidelines-for-the-Design-and-Management-of-Bicycle-Parking-Facilities.pdf>

Bike Repair Training for Owners and Industry

Learning to Cycle Safely and Maintain Your Own Bike

CAN-BIKE is the only accredited program in Canada that teaches courses on cycling and riding safety. Courses are taught exclusively by instructors certified by the CAN-BIKE program. You can learn more about CAN-BIKE and locally offered courses at this link:

<https://www.toronto.ca/services-payments/streets-parking-transportation/cycling-in-toronto/cycling-events-and-programs/can-bike-courses-and-information/>

Cycle Toronto

Cycle Toronto is a member-supported organization that offers free basic bike maintenance workshops by request. <https://www.cycleto.ca/Workshops>

Cycle Toronto also maintains a list of spaces where the public can learn how to repair bikes

<https://www.cycleto.ca/DIY>

For additional information: info@cycleto.ca

Want to Work in the Bike Industry?

Love bikes and cycling culture? There are many roles to pursue within the biking industry, from floor tech or shop mechanic to store manager and local brand rep. Below are several bike repair training programs in Toronto that can lead you to employment in the industry.

The Learning Enrichment Foundation (LEF) - <https://lefca.org/skills-main/bicycle-assembly>

LEF operates a bike shop and bicycle mechanics training facility. It offers a variety of Bicycle Assembly and Maintenance Training Programs which provide the skills required to start a career as a bicycle mechanic.

For additional information: info@lefca.org

Charlie's Freewheels - <https://www.charliesfreewheels.ca/programming>

Charlie's Freewheels improves youth access to bicycles, facilitating bicycle-related skill development through the Pre-Employment Bike Mechanic Training program (for participants aged 16 to 30) and the Build-A-Bike Program (for participants aged 12 to 25).

For additional information: info@charliesfreewheels.ca

The Canadian Electric Bicycle Association (CEBA) - <https://cebassociation.com/e-bike-technician-certification-training/>

CEBA offers training that covers every major component on an e-bike, focusing on using the proper diagnostic equipment and techniques to diagnose any make or model of e-bike:

For additional information: info@cebassociation.ca

CultureLink - <https://www.culturelink.ca/work-hard-earn-a-bike/>

Culture Link offers a free, eight-week program enabling participants to repair their own bikes, gain more confidence while cycling and maybe even start a career as a bike mechanic. All participants can keep the bike they refurbished, earning it through their work.

For additional information: bikehub@culturelink.ca

For more on these and other industry training programs please visit: <https://www.toronto.ca/business-economy/industry-sector-support/green/>

1b. Manufacturers Details

Company/Organization	City	Email	Website	Description
Aquila Cycles	Toronto	No email	https://aquilacycles.com/	Bicycle manufacturer and retailer.
Barco Products Canada	Toronto	info@barcoproducts.ca	https://www.barcoproducts.ca/	Bike racks offered by Barco Products Canada are commercial-grade solutions that help protect bikes against theft and vandalism. Our indoor racks and outdoor racks are made of durable materials and are available in different colours and bike capacities.
Bicycle Booth	Toronto	sales@bicyclebooth.com	https://www.bicyclebooth.com	Clothes for cyclists.
Bike Rack Mfg. & Dist. Co.	Dundas	bikerack@rogers.com	http://www.bikerack.ca/	Bike Rack Mfg. & Dist. Company is located in Toronto Ontario, Canada and is presently distributing bike racks throughout North America.
Bluerev	Toronto	ride@bluerev.ca	https://bluerev.ca	Our E-Bikes are designed with Canada in mind and built to survive every season. Whether it's mud, ice, snow, gravel or urban commutes, Bluerev has you covered.
Bridge Bike Works	Newmarket	sales@bridgebikeworks.com	https://bridgebikeworks.com/	Carbon bike designer, engineer, and manufacturer.
Cervelo Cycles	Toronto	No email	https://www.cervelo.com/	Builds the fastest and lightest pro bikes for road, triathlon/time trial and track.
CIRCA Bicycle Company	North York	info@circa.bike	https://circa.bike/	CIRCA Bicycle Company began as a passion project by founder Moise Bensimon of Toronto. These bikes include models for Gravel, City Singles, Cyclo-cross, and Road riding.
Classic Displays	Toronto	info@classicdisplays.com	https://classicdisplays.com/	Classic Displays manufactures, supplies and installs a variety of bike racks, lane separators and bollards. Rack styles include interior wall mounted units and exterior racks such as the current specified post & ring rack used by the city of Toronto and the Stacker bike rack that can be found along the Bloor bike lane.
Daymak	Toronto	info@daymak.com	https://www.daymak.com/	Daymak is a renowned Canadian pioneer in light electric vehicle (LEV) technology, known for cutting-edge eBike design and constantly pushing the boundaries of green technology in Canada.
Elby Mobility	Toronto	info@elbymobility.com	https://elbymobility.com/	Elby is an elegantly designed and well thought out e-bike that combines simplicity, fully integrated technology and category-leading range with the pure joy of riding a bicycle.
Emmo	Toronto	info@emmo.ca	https://emmo.ca/	Emmo is a proud Canadian company based in Toronto, Ontario. As the leading manufacturer of electric bikes, Emmo has provided over 500,000 people with environmentally friendly transportation throughout North America.

Company/Organization	City	Email	Website	Description
Frost Products	Toronto	info@frostproductsltd.com	https://www.frostproductsltd.com/	Frost is a family owned and operated Canadian manufacturer of high-quality commercial site furnishings and washroom/lobby accessories. We have been manufacturing since 1961 and use high grade Canadian steel and stainless steel.
Global/Avenue	Toronto	sales@globalindustrial.ca	https://www.globalindustrial.ca/	A leading supplier of MRO, safety and PPE in Canada as well as Janitorial and outdoor grounds maintenance.
Greenspoke	Belwood	info@gogreenspoke.com	https://gogreenspoke.com/	Greenspoke offers a diverse collection of bike parking and repair solutions with an unwavering commitment to producing durable, attractive and eco-friendly products.
Helix Labs Inc	Waterloo	hello@helix.ca	https://helix.ca/	Helix is a revolutionary new folding bike with big wheels. It rides like a real bike but folds small enough to fit in a suitcase. Helix is your key to the city: ride it through the park, take it on the subway, store it in your condo.
Kevin Quan Studios (KQS)	Guelph	info@kqbikes.com	https://kqbikes.com/	Bicycle designer and manufacturer.
KindHuman	Brampton	info@kindhuman.cc	https://www.kindhuman.cc/	Every KindHuman Bicycle is custom built, by you - The Rider. You build your bike from the wheels up using parts and accessories from the best suppliers in the world.
Mariposa Bikes	Vaughan	info@mariposabicycles.ca	https://mariposabicycles.ca/	Hand built custom steel Mariposa Bicycles, Allied carbon bicycle, Linus City bicycles, bicycle repair, bicycle painting, Mariposa Cycling Tours.
Maxarya Design and Manufacturing Inc.	Mississauga	info@maxarya.com	https://www.maxarya.com/	Sleek, classy, and exceptionally comfortable, its European-inspired design mixed with North American standards makes riding around town enjoyable.
No. 22 Bicycle Company	Burlington	info@22bicycles.com	https://22bicycles.com/	We build bicycles for the rider who appreciates perfectly tuned ride quality as much as stiffness and low weight – the rider who loves to ride for riding's sake.
Parco	Richmond Hill	No email	http://www.parcoproducts.com/	Since 1966 we have added many different products suitable for building owners, residential & commercial managers, stores, government, and industry suppliers.
Project 321	Princeton	sales@project321.com	https://project321.com/	Bicycle hub manufacturing started in 2011, initially utilizing drive rings and pawls sourced from Industry Nine.
Revelo Bikes	Toronto	info@revelo.ca	https://www.revelo.ca/	Revelo THINstem turns any full-size bike into a THIN bike by rotating the handlebar 90 degrees. We design, prototype, assemble, customize and service our bikes in our Toronto studio.
Rocky Mountain Bikes	Toronto	info@bikes.com	https://ca.bikes.com/	Inspired by Vancouver's North Shore mountains, home to some of the world's most diverse and rugged terrain, Rocky Mountain has been developing high performance mountain bikes since 1981.

Company/Organization	City	Email	Website	Description
RSD Bikes	Toronto	info@rsdbikes.com	https://rsdbikes.com/	Bicycle manufacturer and retailer.
SARIT Mobility	Toronto	info@gosarit.com	https://saritmobility.com/	The SARIT is designed to help you get around safely and congestion-free. It can go anywhere a bike can go and is small enough to take advantage of city bike lanes and parking.
Staran Cycles	Scarborough	No email	https://www.starancycles.com/	Mountain bike manufacturer.
Toronto Fabricating & Mfg. Co	Mississauga	sales@tfmc.com	https://www.tfmc.com/products/bicycleracks	TFMC manufactures a broad range of bike racks from single rings to multi-bike applications.
True North Cycles Ltd	Mississauga	truenorthcycles@gmail.com	https://truenorthcycles.com/	True North is a manufacturer of high quality, custom bicycles. Whether you like biking for sports, commuting or world exploring, your ride will be so much better if the bicycle you're riding on is a perfect custom fit!
Vastos	Toronto	vastosbicycle@gmail.com	https://vastos.ca/	All our bicycles are handcrafted in Ontario. We do 100% carbon fiber work in-house in Ontario.
Velocolour	Vaughan	info@velocolour.com	https://www.velocolour.com/	VeloColour is a custom paint company specializing in all types of bicycles (road, mountain, commuter, etc.). In our west end location we produce (and sell) a line of cycling bags and carry a small range of cycling tools, components, and accessories.
WIKE	Toronto	customerservice@wike.ca	https://wicycle.com/	We are WIKE... the Walk and Bike Company. Our mission is to design bike trailers that allow people to walk and cycle effortlessly through their everyday needs.
YNOT	Newmarket	info@ynotmade.com	https://ynotmade.com/	Bicycle and gear manufacturer and retailer.

2. Bike Industry Organizations

Company/ Organization	Address	City	Email	Website	Description
32 Spokes	567 Kingston Road	Toronto	32spokesto@gmail.com	https://www.32spokes.org/	32 Spokes is a group of residents in Toronto's Beaches and East York who care about safe streets and love all things bike! Through community events and our monthly meetings, we aim to assist people who bike, encourage others to consider cycling, and advocate for better cycling infrastructure. New members welcome anytime!
46forGeorge		Toronto	Online messaging on website	https://46forgeorge.com/	Through Bicycles we want to change lives. #46forGeorge is based on a movement that started in 2020 in light of the murder of George Floyd. The movement is rooted in the fight against racial injustice and police brutality around the globe has partnered with Qhubeka Charity to aid in fundraising for underprivileged individuals and families in Africa. In addition to fundraising for Qhubeka, #46forGeorge, with help from the community, is also donating bicycles to BIPOC youth within the city.
Bikes Without Borders	45 Esandar Dr	Toronto	info@bikeswithoutborders.org	https://bikeswithoutborders.org/	At Bikes Without Borders, we use bikes and bike-related solutions to empower individuals in marginalized communities through mobility. We believe in the humble bicycle as a means to increase access to vital community services and networks that allow individuals to meet their basic needs and build better lives.
Our Greenway Conservancy	4700 Keele Street	Toronto	info@ourgreenway.ca	http://ourgreenway.ca/	Our Greenway seeks to craft practical local mobility networks by working directly with businesses, decision-makers and residents to enable access to the research, advocacy and practical cargo cycle tools they to build greener and more equitable communities.
The Centre for Active Transportation	75 Elizabeth Street	Toronto	tcats@cleanairpartnership.org	https://www.tcat.ca/	Our mission is to advance knowledge and evidence to build support for safe and inclusive streets for walking and cycling. We believe that active transportation plays a critical role in creating environmentally and economically sustainable cities.
Toronto Community Bike Collectives		Toronto	info@torontocommunitybikecollectives.com	https://torontocommunitybikecollectives.com/	We are not for profit organizations focused on providing a venue for people (beginners to advanced mechanics!) to learn how to fix their own bikes and build community
Transportation Options	850 Coxwell Ave	Toronto	info@transportationoptions.org	https://www.transportationoptions.org/	Transportation Options (T.O.) is a non-profit organization dedicated to fostering sustainable transportation and tourism ideas and innovations by providing organizational structure and support to projects and innovations that are healthy, integrated, convenient, economically beneficial, and environmentally sound.

Definitions Of Technologies

Definition of the Sustainable Transportation Sector

The City of Toronto defines the sustainable transportation sectors as follows:

Businesses and other organizations involved in the supply of products and services that move people and goods by vehicles that are low environmental impact, use less energy, lower emissions, or are less environmentally impactful than the standard for that mode of transportation.

We break the sector into several classes of vehicles such as micro-mobility, E-motorcycles, light electric vehicles, electric and other non-carbon fueled cars and trucks (EVs); and mass transportation (low emission buses and trains). We also include charging infrastructure, smart transportation technologies and transportation as a service (i.e. TTC, Bike Share) as important parts of this industry sector.

What is Micromobility?

Over the past decade there has been an explosion in the use of a variety of small, light-weight vehicles that have expanded options for travellers. Not long ago, cars, buses and the occasional motorcycle on roads and streetcars, and subways and trains on rails were the only commuter options - at least in North America where bicycles were often viewed as just a form of recreation. Now there is a wide variety of vehicles like hoverboards, powered one-wheel or two-wheeled “boards,” and electric standing kick scooters that often defy descriptions and regulations and are being used more and more to get from point A to point B. These vehicles are often referred to as micromobility vehicles with those vehicles that are electric powered often referred to as Personal Electric Vehicles (PEVs).

These micromobility vehicles are classified by the number of wheels (1 through 4); the source of power (human, electric or a combination); vehicle weight (can they be carried?); width (do they fit on a bike path?) and speed (what appropriate infrastructure can they operate on, e.g. a traffic lane on a major road?). SAE International, a global professional association and standards developing organization for mobility professionals, has tried to describe and classify what is considered a powered micromobility vehicle.^[1]

We break micro-mobility into four types:

1. Lightweight micromobility (i.e. skateboards, and standing scooters);
2. Midweight micromobility (i.e. bikes, E-bikes);
3. Heavy weight micromobility (i.e. cargo bicycles, seated scooters);
4. Light Electric Vehicles – this is a “new” tech in Ontario although people may be familiar with golf carts which are a prototypical LEV and which in Ontario can be broken into two types (defined by # of wheels and speed):
 - Low Speed Vehicles (LSV): Defined in regulation under the federal Motor Vehicle Safety Act, a low-speed vehicle is an electric, four-wheeled vehicle that is smaller and lighter than a regular car. Low speed vehicles have a maximum speed of 40 kilometres per hour.
 - Urban Mobility Vehicles (UMVs): UMVs are defined (by the Ontario Ministry of Transportation) as small, compact, enclosed, three-wheeled, slow-moving (maximum speed of up to 32 km/h) electric vehicles usually built with one seat.
