Dear Resident,

The City of Toronto is planning new sidewalk construction between the western dead end of Bartonville Avenue West and Jane Street in 2023. Sidewalks support safety, accessibility, affordable transportation, physical activity, safe routes to school, aging in place, and sustainable growth. This project presents an opportunity to incorporate changes that reflect the City's priorities for improved road safety and greater accessibility. Sidewalks are a fundamental requirement for an accessible city.

In accordance with City standards the sidewalk will be 1.8m metres wide and provide accessible access for pedestrians between these two streets. Existing parking and traffic operations will not be impacted. The sidewalk design minimizes the impact to items on the right-of-way. We will contact you if any items need to be removed in order for the construction to proceed. Driveways, lawns and walkways that are impacted during construction will be restored at the completion of the road work.

If you have questions about the planned sidewalk or would like to discuss the project in greater detail, please contact me at Katherine.Wilson@toronto.ca or 416-392-0828.

Sincerely,

Katherine Wilson
Project Lead, Cycling and Pedestrian Projects
Transportation Services, City of Toronto
