

## Bed Request Closeout Screen

Updated on October 2023

[Home](#) > [Program Management – Search](#) > [Service Queue](#) > [Closeout](#)

### Business Purpose:

1. The **Client Management – Bed Request Closeout** allows the user to process either a client withdraw or staff closeout action.
2. The **Closeout** action is to be chosen if the client has withdrawn their shelter request or if the destination program is unable to admit the client even after an Intake has already been done. The Staff Closeout option should only be selected as a final option to assist with queue maintenance. Every effort should be made to find the client a bed.

### How to:

1. In the Destination Program's Service Queue, select the **Closeout** action from the dropdown list of client's referral record in the queue.

**Bed Request Closeout**

Reason\* Client withdraw ▾

Note\* (0/4000 characters)

3. Select the Reason from the dropdown list either **Client Withdraw** or **Staff Closeout**.
4. Enter Note regarding this Closeout action to a maximum of 4000 characters.
5. Click the **Save** action button to save the closeout details.
  - Withdraw details are completed and saved.

- Staff closeout details are completed and saved.

6. Click the **Close** action button to back to the **Service Queue** screen.
7. Once a client withdraws or staff closeout action is processed at the destination program, the client's referral record will be moved from the **Service Queue** to the **Queue History** and will show a **Client Status** of "Withdrawn" or "Staff Closeout".

## Important Notes:

1. Note the Bed Request Closeout Reason are as follows:

- *Client Withdraw (when a client decided to withdraw their request for a room/bed)*
- *Staff Closeout (only select as a final option to assist with queue maintenance)*
