

STRATEGIC CARBON MANAGEMENT PROGRAM

UNLOCK YOUR ORGANIZATION'S POTENTIAL AND DEFINE YOUR PATHWAY TO NET ZERO.

WHAT IS IT?

The City of Toronto's Strategic Carbon Management (SCM) program is designed to support building portfolio owners in reducing greenhouse gas (GHG) emissions and developing their Pathway to Net Zero Plan. The program focuses on practical pathways to reduce emissions to net zero through ongoing management of energy use to continuously improve energy performance, reduce building-related greenhouse gas (GHG) and costs over the long term.

WHY PARTICIPATE?

To address the climate crisis, the City of Toronto has set an ambitious target to reduce community-wide emissions from all buildings to net zero by 2040. Buildings generate about 58 per cent of the greenhouse gas emissions in Toronto today.

You will receive support to develop a net zero plan that facilitates deep, portfolio-wide GHG emissions reductions. You will also learn from the experiences and best practices of others.

BENEFITS TO YOU

**Reduce
environmental
impact**

**Reduce
operating
costs**

**Advance
preparation for
future regulations**

**Recognition from
the City of
Toronto**

**Increase employee
engagement**

**Peer learning and
collaboration**

STRATEGIC CARBON MANAGEMENT PROGRAM

HOW IT WORKS

Participants will be engaged through a one-year curriculum.

Series of interactive workshops within a group of up to 10 similar organizations.

One-on-one energy coaching throughout for support and guidance.

Access to resources that support net zero integration including templates, tools, case studies.

WORKSHOP OVERVIEW

Workshop 1
Stakeholder
Engagement

Workshop 2
Target Setting

Workshop 3
Operational
Improvements

Workshop 4
Net Zero Capital
Planning

Workshop 5
Key Performance
Indicators &
Continuous
Improvement

Recognition Event

WHO IS A GOOD FIT?

Participants in the City's Green Will Initiative (GWI) without established Strategic Carbon Management plans.

COMMITMENT

- Identify a 'Pathway Champion' to participate and lead your internal team.
- Executive commitment to support participation in all events and workshops.
- Participate and complete all program activities.
- Upload 2019-2022 building consumption data via Energy Star Portfolio Manager to establish your baseline.
- Provide three years of annual data following program completion.
