## Road Reconstruction, Road Resurfacing and Bikeway Construction on Steeles Avenue East from Midland Avenue to McCowan Road

**Contract: 23ECS-RD-05MR**  
**Start Date: May 2024 End Date: August 2025**  
*\*Timeline is subject to change.*

The City of Toronto is planning construction on Steeles Avenue East from Midland Avenue to McCowan Road. The inspection of the road shows that it needs reconstruction, and the curb and sidewalk need to be replaced to bring them to a state of good repair.

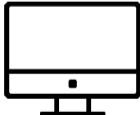

On Steeles Avenue East from Midland Avenue to Brimley Road, the City is planning to reconstruct the road, construct raised cycle tracks and intersection safety features, and install green infrastructure such as permeable surfaces and plant trees. Road reconstruction involves replacing the entire road pavement structure, including the asphalt surface and concrete road base.

On Steeles Avenue East from Brimley Road to McCowan Road, the City is planning to resurface the road, construct a raised cycle track and install green infrastructure such as permeable surfaces and plant trees. Road resurfacing involves removing and replacing the asphalt surface of the road.

On April 7, 2022, City Council adopted IE28.7- Cycling Network Plan - 2022 Cycling Infrastructure Installation - First Quarter and 2021 ActiveTO Cycling Network Expansion Project Updates – Item 13, authorizing the installation of the Steeles Avenue East Complete Street.

## MAP OF WORK AREA

## WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark sidewalks and curbs requiring replacement and the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- The City will not be responsible for damage to any privately owned items on City property.

	<p><b>Accessible Accommodation:</b> The City's contractor must ensure safe and accessible walkways and entryways are maintained for everyone during construction. Any temporary access disruptions will be communicated as soon as possible. If you experience a disruption, have a specific access need or related accommodation request, contact the <b>Project Manager</b> listed below.</p>
	<p><b>Access to Your Home:</b> The City-hired contractor may need access to the interior and exterior of your home to complete a pre-construction condition survey. Affected properties will receive a request to schedule a time to complete the pre-construction condition survey. Although participation is voluntary, the pre-construction survey results may be useful to confirm claims for potential damage caused by City construction.</p>
	<p><b>Important information for owners of sprinkler systems / heated driveways and private landscaping features.</b> Property owners should remove items located within City property limits (boulevard) to avoid damage.</p> <p>This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways.
