

KEY FINDINGS: AQUATIC SPECIES & HABITAT

IMPACTS

- Widening or replacement of bridges at Markham and Malvern Branches of Highland Creek may require in-water works, with the potential for harmful alteration, disruption or destruction (HADD) of fish habitat.

MITIGATION MEASURES

- ✓ Maintain and protect riparian (riverbank) vegetation.
- ✓ Reduce water exposure to soils; control erosion and sediments; protect surface water.
- ✓ Avoid contamination of surface water from construction materials.
- ✓ Avoid changes to water quality and quantity.
- ✓ Ensure site-specific mitigation measures.

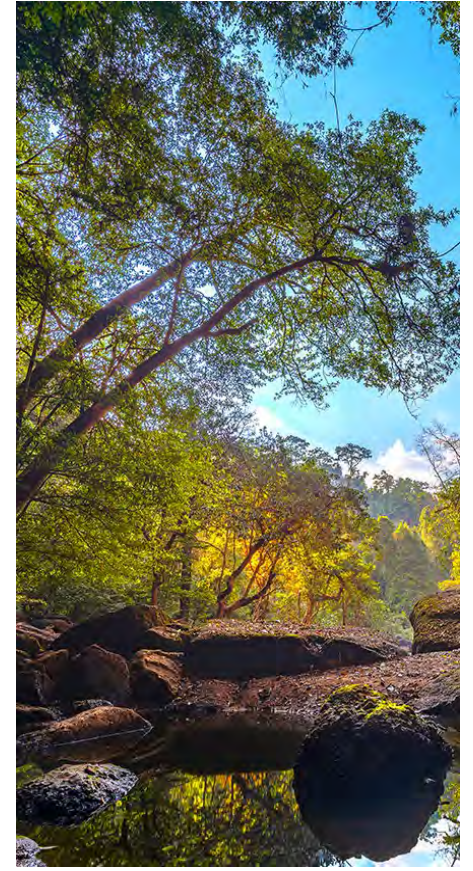

KEY FINDINGS: VEGETATION COMMUNITIES

IMPACTS

- Displacement and Disturbance:
 - Removal of about 10.46 ha of naturalized and human-influenced areas.
- Impact on Rare Vegetation:
 - Disruption to Rare, Threatened, or Endangered Vegetation and Vegetation Communities.
 - Removal of 9.89 ha of human-influenced lands, cultural vegetation communities.
 - Removal of 0.57 ha of wetland communities.

MITIGATION MEASURES

- ✓ Pre-construction: Design to avoid and minimize impact on terrestrial ecosystems; plan for planting of forest and wetland habitat.
- ✓ During construction: Best management practices for vegetation protection.
- ✓ Post-construction: Restoration and Enhancement; Invasive Species Management.

KEY FINDINGS: WILDLIFE AND HABITAT

IMPACTS

- Wildlife habitat removal will be required at Conlins MSF.
- Removal of the following vegetation communities at Conlins MSF and other areas:
 - Cultural Meadow Communities (CUM1-1); Mineral Cultural Woodland (CUW1); Shallow Marsh (MAS2); Deciduous Forest (FOD).
 - majority of FOD community on Rouge River Valley slope likely not impacted
- Overall, limited impact due to previous disturbances to terrestrial wildlife habitat and low habitat structure and diversity in encroached area.

MITIGATION MEASURES

- ✓ Wildlife Sweep: Prior to construction; wildlife to be dispersed from work zone.
- ✓ Wildlife Capture and Transport: Undispersed wildlife to be captured and moved to nearby suitable habitats.
- ✓ Scientific Collectors Permit to be obtained from MNRF for wildlife salvage activities.
- ✓ Continuous Monitoring and Adherence to permits to ensure responsible wildlife management.

KEY FINDINGS: SOIL

IMPACTS

- Soil erosion due to construction activity (clearing, excavation, grading, etc).
- Construction activity may cause soil to deposit/settle in watercourses.

MITIGATION MEASURES

- ✓ Standard erosion and sediment control measures as per Ontario Provincial Standard Specification 805 - Construction Specification for Temporary Erosion and Sediment Control Measures (2010).
- ✓ Erosion and Sediment Control Plan for site-specific erosion and sedimentation control measures.
- ✓ Compliance with best management practices.

NATURAL ENVIRONMENT: FUTURE COMMITMENTS

Environmental management plans

- ✓ Restoration and Enhancement Plans.
- ✓ Erosion and Sediment Control Plan.
- ✓ Environmental Inspection and Monitoring Plan.

Wetlands protection

- ✓ Further correspondence with TRCA about permits under Ontario Regulation 166/06 and to assess boundaries of wetlands near EELRT.

Self-assessment for harmful alteration, disruption or destruction (HADD) of fish habitat

- ✓ Further correspondence with DFO about species at risk and Fisheries Act.

Tree inventory

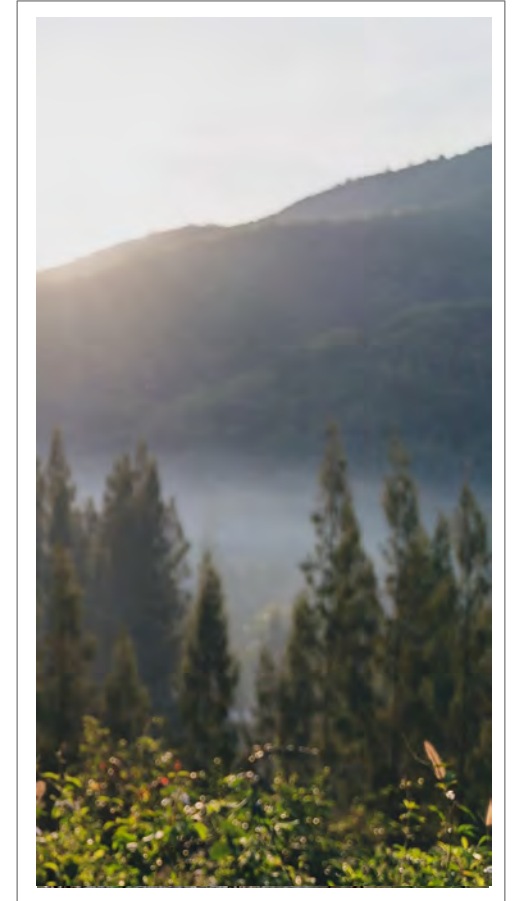

- ✓ To be conducted once design permits individual tree impact assessments.

Species at risk protection

- ✓ Further correspondence with MECP about identified and potential species at risk in study area, and Ontario ESA requirements.

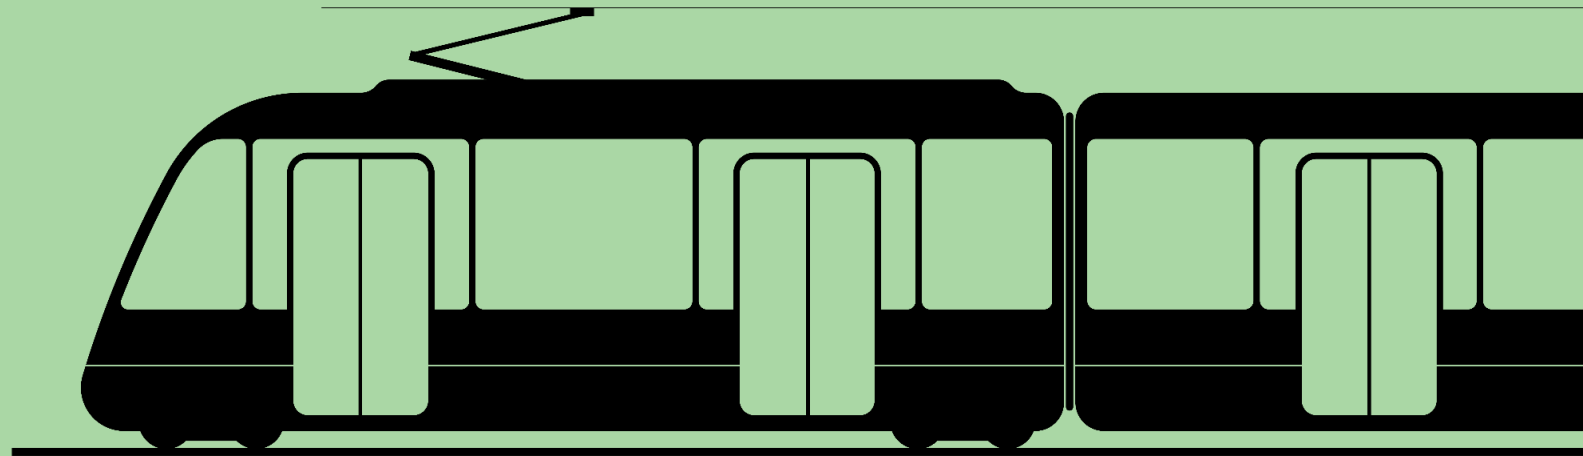

Field investigations

- ✓ Further work during appropriate seasons using MNRF protocols.

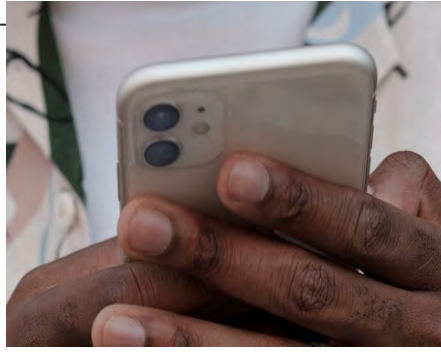

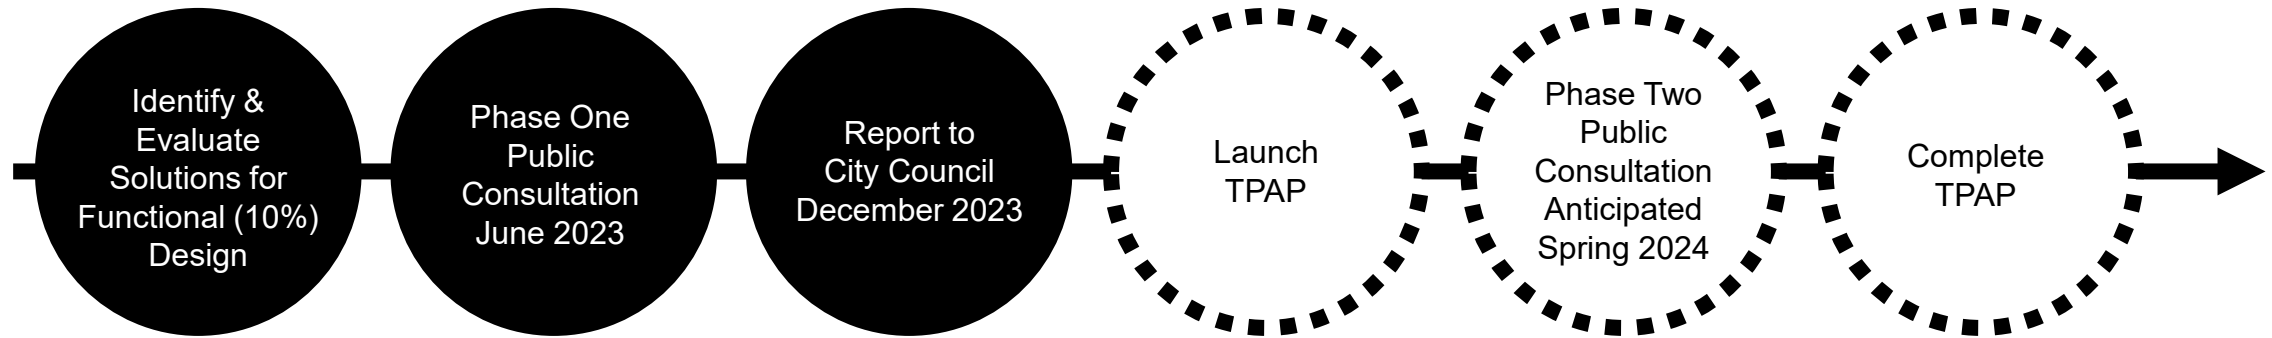

PART III

Current Study Process and Timeline

OVERVIEW OF CURRENT STUDY PROCESS

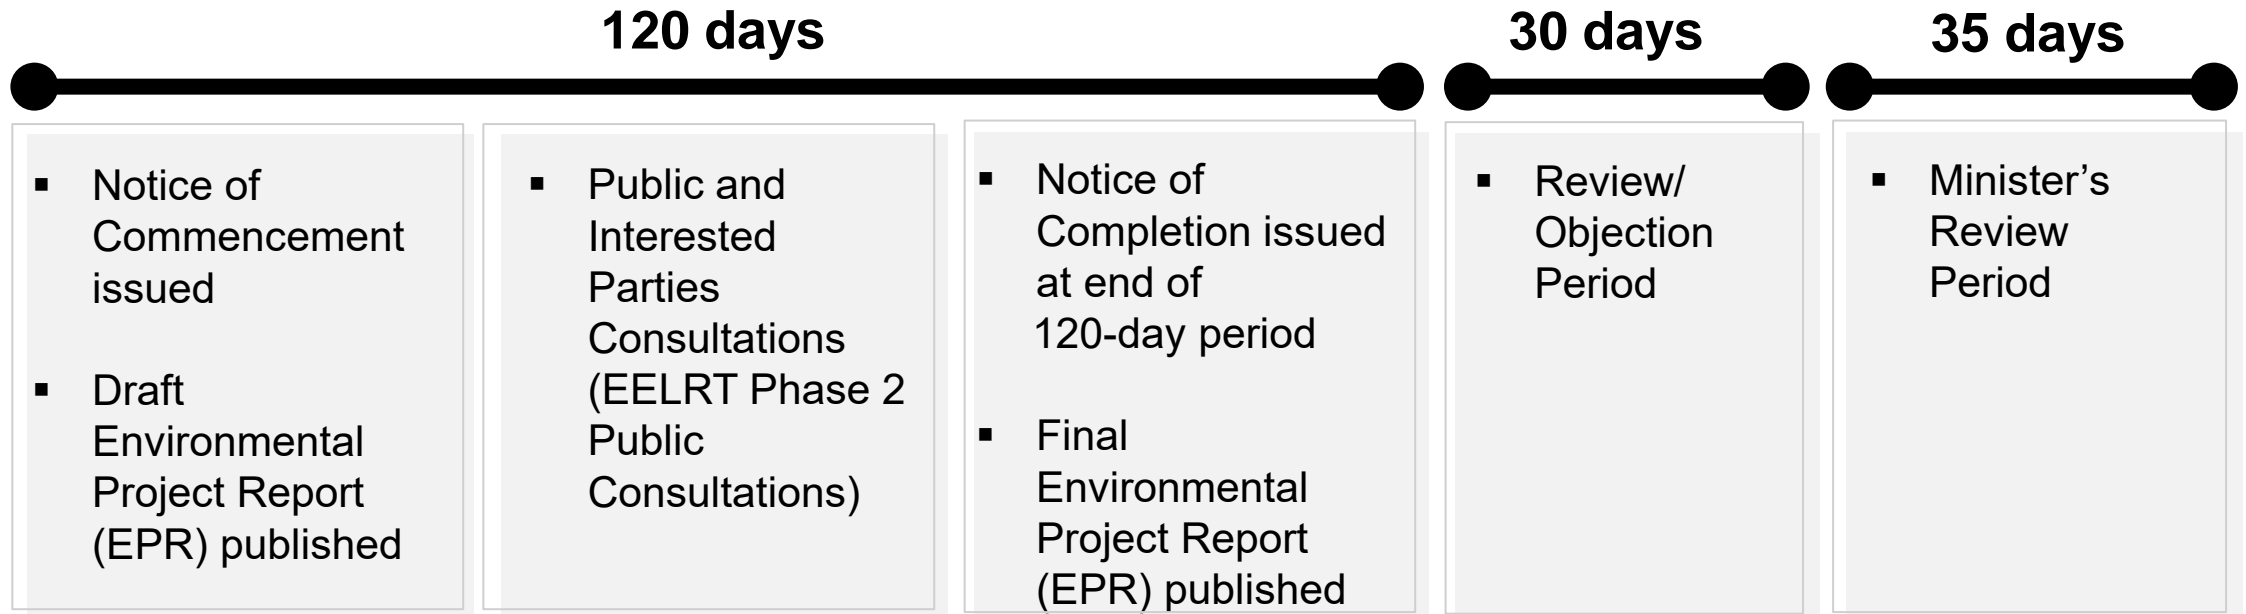

TRANSIT PROJECT ASSESSMENT PROCESS (TPAP) OVERVIEW

Key information about the TPAP:

- a time-limited streamlined required environmental assessment process specifically for transit projects that is pursuant to Ontario Regulation 231/08 of Environmental Assessments Act
- documents environmental impact of proposed transit projects through public and interested parties' engagement process
- emphasizes impacts on matters of provincial importance and constitutionally protected Aboriginal or treaty rights
- evaluates any potential impacts the transit project may have on the surrounding community or natural environment and recommend ways to mitigate or minimize those impacts
- culminates in comprehensive Environmental Project Report (EPR) made available for review by the public and interested parties

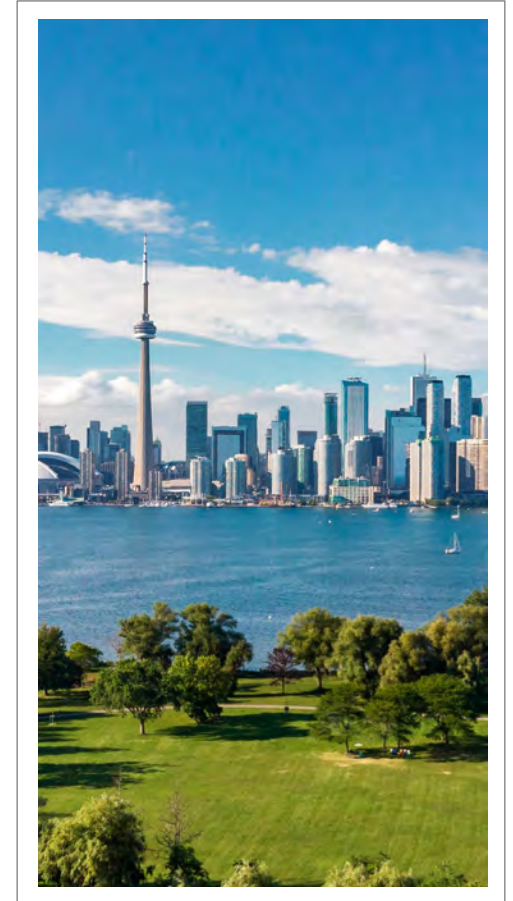

TRANSIT PROJECT ASSESSMENT PROCESS (TPAP) ROADMAP

TRANSIT PROJECT ASSESSMENT PROCESS (TPAP) DOCUMENTS

The TPAP **Environmental Project Report** is expected to include:

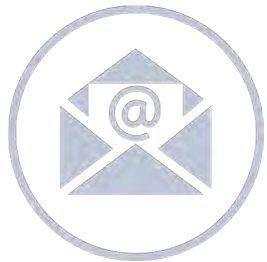

- Air Quality Baseline Conditions and Impact Assessment (ongoing)
- Archaeological Assessment Report (Stage 1)
- Cultural Heritage Resource Studies
- Natural Environment Baseline Conditions and Impact Assessment Report
- Noise and Vibration Baseline Conditions and Impact Assessment
- Property / Contamination Overview Study
- Socio-Economic and Land Use Baseline Conditions and Impact Assessment Report
- Transportation and Traffic Impact Analysis

Subject: Eglinton East LRT Project Meeting

Dear Abby and Mark,

Thank you again for taking the time to meet with the Eglinton East LRT Project Team today. It was a pleasure to meet you, to learn more about the Mississaugas of the Credit First Nation and to discuss the Eglinton East LRT project.

As we discussed in today's meeting:

- MCFN will be provided with the updated Stage 1 Archaeological Assessment Report when it becomes available.
- The City of Toronto will work with MCFN on Stage 2 archaeological studies should they be required.
- MCFN will be provided with the EPR when the TPAP launches which will include the cultural heritage report.
- MCFN will be updated about any involvement by the DFO in the project.

If you have any additional questions or comments about the project, kindly send us an email and we will respond at our earliest convenience.

Thank you again on behalf of the Eglinton East LRT Project Team,

Anna

Good Morning Anna,

Thank you for contacting MCFN DOCA regarding a virtual meeting request.
Yes, we have some availability January 29 – 1pm- 4pm
January 30, 31, February 2 – 9am- 12pm & 1pm – 4pm.

Just to give you an FYI, our calendars here at DOCA fill up pretty fast.

Have a Safe and Happy Holiday!

Subject: RE: Eglinton East LRT Public Notice

Dear Chief R. Stacey LaForme and Mark LaForme,

At this time we are following upon our previous email with a gentle reminder that the current phase of public consultation for the EELRT is closing on June 21, 2023.

Please note that this round of public consultation is only related to the functional 10% design of EELRT. This phase of the project is in preparation of the Transit Project Assessment Process (TPAP), currently targeted for Fall 2023. There will be another opportunity for feedback during the TPAP and when the Notice of Commencement is issued later this year.

To learn more about EELRT, a meeting can be arranged with the project team, or information can be accessed on the project website at toronto.ca/EglintonEastLRT.

Kindly confirm receipt of this email.

On behalf of the project team,

Carol Lee (she/her)

Subject: Eglinton East LRT Public Notice

Dear Chief R. Stacey LaForme and Mark LaForme,

The City of Toronto and the Toronto Transit Commission are working to bring rapid and reliable transit to Scarborough. The Eglinton East Light Rail Transit (EELRT) is a proposed 18 km light rail transit system through Scarborough, connecting Kennedy Station and the future Sheppard-McCowan Station to Malvern Town Centre and the University of Toronto Scarborough Campus. The Eglinton East LRT will increase transportation options in Scarborough and enhance access to the community, businesses, public amenities and create opportunities to improve the local economy and environment.

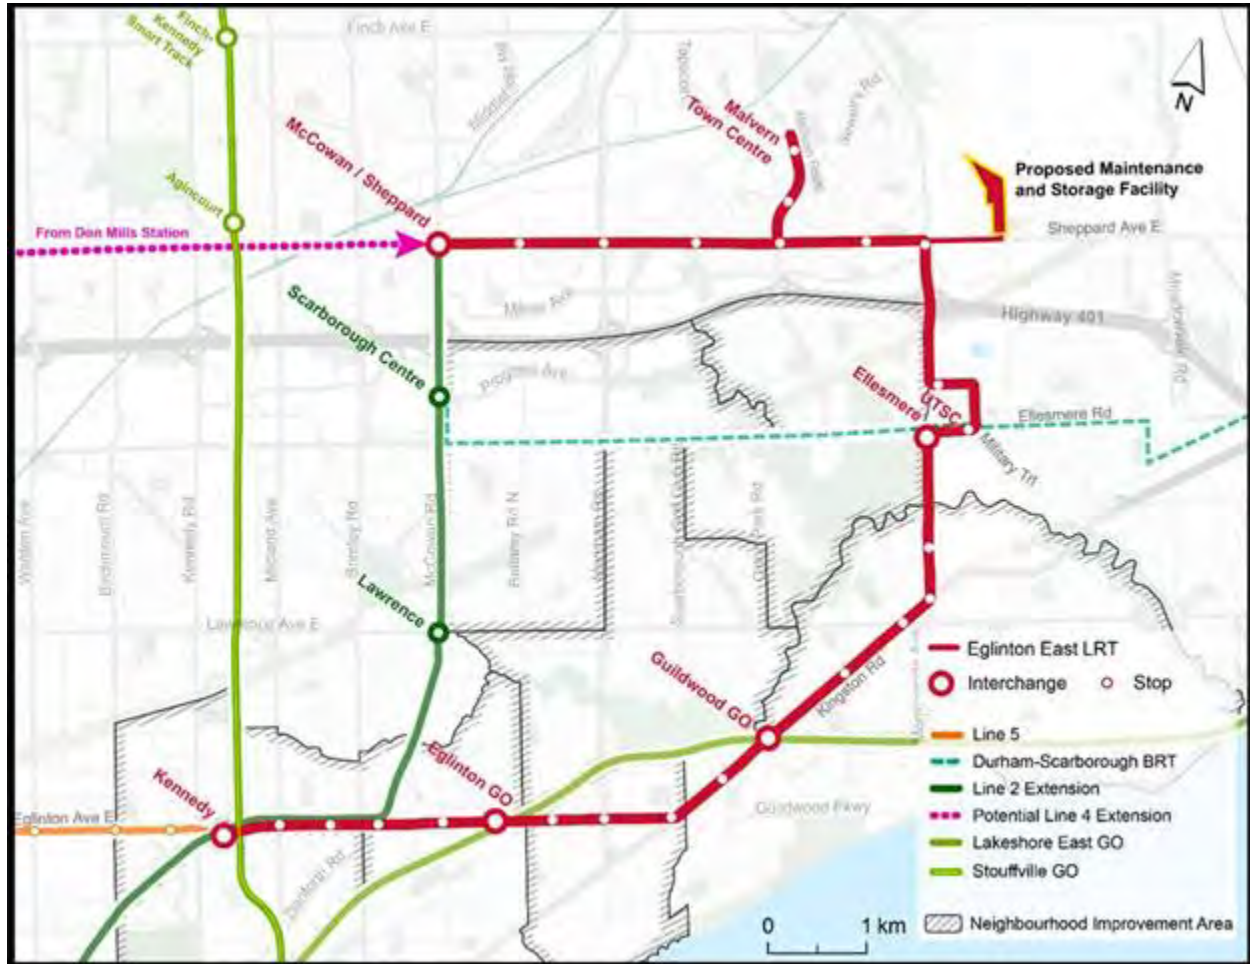

Stakeholders and members of the public are invited to learn more about the project and provide feedback on the functional (10 per cent) design, including Eglinton East LRT stop locations. Public input, along with policy guidelines and technical requirements will inform the functional design that will be presented to City Council later this year. The functional design will follow the requirements of a Transit Project Assessment Process (TPAP).

The public consultation for this phase of the project will take place May 15 – June 21, 2023. Additional information about these sessions is available on the project website at toronto.ca/EglintonEastLRT.

At this time we would like to extend an opportunity to the Mississaugas of the Credit First Nation to provide feedback on the project or request a meeting with the project team to learn more about EELRT.

Please note that this round of public consultation is only related to the functional 10% design of EELRT. This phase of the project includes the commencement of a Transit Project Assessment Process (TPAP), currently targeted for Fall 2023. You will be sent a second Notice requesting your questions and comments about the TPAP when the Notice of Commencement is issued later this year.

The currently proposed alignment for EELRT is shown below in context to other existing and planned transit networks in the Scarborough area:

We look forward to your reply. Should you have any questions, or if you would like to discuss the project in greater detail, please contact the Public Consultation Unit, via email, Eglintoneastlrt@toronto.ca.

On behalf of the project team,

Amanda Ratych (*she/her*)

Subject: Eglinton East LRT: Draft EPR
Attachments: 2024-04-08_EELRT_EPR_Rev02.1_DRAFT for Indigenous Circulation.pdf

Dear Abby and Mark,

Please find attached a **draft copy of the Environmental Project Report (EPR)** for the Eglinton East LRT.

Again, upon request, we can also make available the following Appendices to the EPR to you. Because of the size of the files, they would need be sent through a secure file transfer service:

- Appendix A: EELRT Alignment Plan and Profile Plates
- Appendix B: Utility Conflict Matrix and Related Annotation Drawings
- Appendix C: Drainage and Stormwater Management Report
- Appendix D: Socio-Economic Report
- Appendix E: Natural Environment Report
- Appendix F: Cultural Environment Report
- Appendix H: Air Quality Report
- Appendix I: Noise and Vibration Report
- Appendix J: Geotechnical Assessment Report
- Appendix K: Contamination – Limited Phase 1 ESA
- Appendix L: Record of Consultation and Public Consultation Report
- Appendix M: Traffic Impact Assessment Report
- Appendix N: Architectural Drawings at SSE Interfaces

If you would like to arrange a time to speak to the project team to ask any questions or provide comments, please follow up with us by May 1, 2024.

When the Transit and Rail Project Assessment Process officially begins this spring, we will send you a Notice of Commencement and information about how Mississaugas of the Credit First Nation can participate in the EELRT phase two public consultations. As part of the Transit and Rail Project Assessment Process, you will have another opportunity to review the EPR and related reports, ask questions and provide comments.

Attachments: Appendix G_21EA-120 Stage 1 Report 10_2024-02-12 (002)_reduced.pdf; 2024-04-03_EELRT Overview.pdf

Dear Abby and Mark,

I hope you are keeping well.

On behalf of the [Eglinton East Light Rail Transit](#) (EELRT) project, led by the City of Toronto and working in partnership with the Toronto Transit Commission (TTC), I am writing to share with you in advance of the start of the Transit and Rail Project Assessment Process set out in Ontario Regulation 231/08, as amended, the following attached documents related to the EELRT:

- **An overview of the project and environmental impacts and mitigation measures**
- **A copy of the revised Stage 1 Archaeology Assessment Report (Appendix G to EPR).** An earlier copy of the Stage 1 AA report was provided in January this year. The revised report includes additional archeological assessment for traction power sub-station sites located along the route of the LRT.

Owing to the size of the documents, I will be sending a **draft copy of the Environmental Project Report (EPR)** in a separate email.

Note that, in addition, upon request, we can also make available the following Appendices to the EPR to you. Because of the size of the files, they would need be sent through a secure file transfer service:

- Appendix A: EELRT Alignment Plan and Profile Plates
- Appendix B: Utility Conflict Matrix and Related Annotation Drawings
- Appendix C: Drainage and Stormwater Management Report
- Appendix D: Socio-Economic Report
- Appendix E: Natural Environment Report
- Appendix F: Cultural Environment Report
- Appendix H: Air Quality Report
- Appendix I: Noise and Vibration Report
- Appendix J: Geotechnical Assessment Report
- Appendix K: Contamination – Limited Phase 1 ESA
- Appendix L: Record of Consultation and Public Consultation Report
- Appendix M: Traffic Impact Assessment Report
- Appendix N: Architectural Drawings at SSE Interfaces

If you would like to arrange a time to speak to the project team to ask any questions or provide comments, please follow up with us by May 1, 2024.

When the Transit and Rail Project Assessment Process officially begins this spring, we will send you a Notice of Commencement and information about how Mississaugas of the Credit First Nation can participate in the EELRT phase

two public consultations. As part of the Transit and Rail Project Assessment Process, you will have another opportunity to review the EPR and related reports, ask questions and provide comments.
