**Local Road Resurfacing on Silverthorn Avenue from St. Clair Avenue West to Rockwell Avenue;
Cycling Infrastructure Installation on Silverthorn Avenue from St. Clair Avenue West to Rogers Road;
Intersection Improvements at Silverthorn Avenue and Rockwell Avenue**

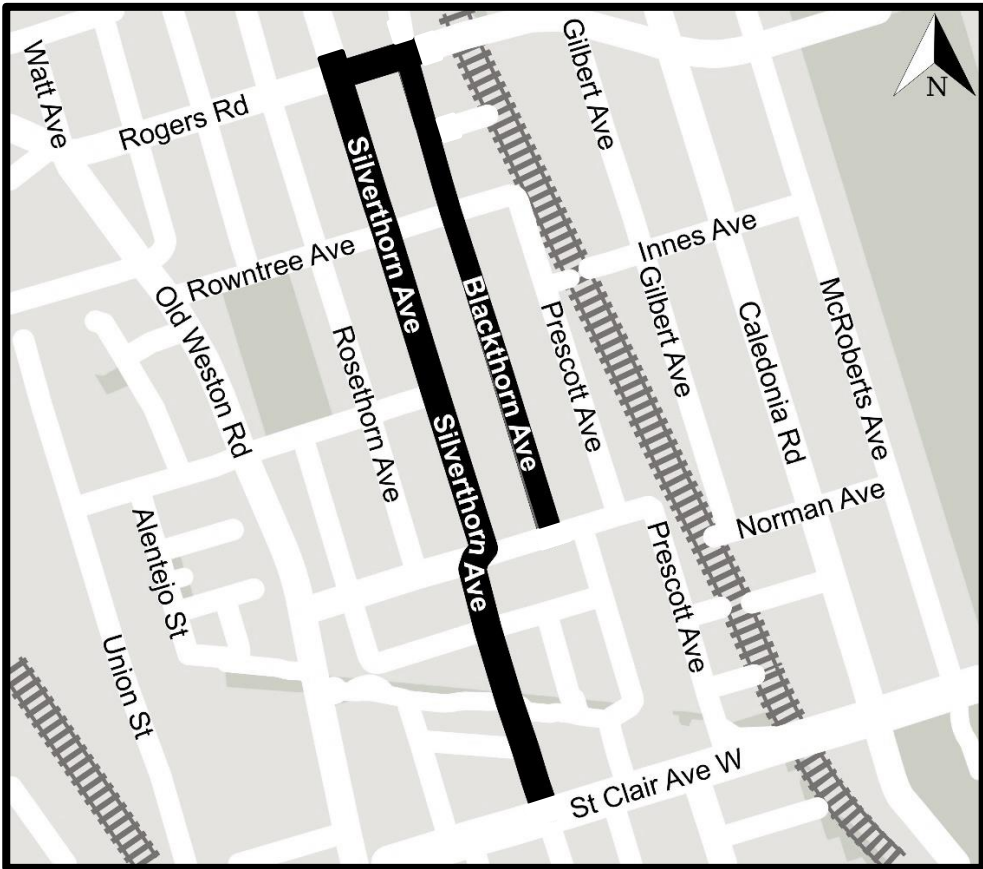

Contract: 24ECS-RD-02LR
Start Date: Fall 2024 | End Date: Spring 2025
**Timeline is subject to change.*

The City of Toronto is planning to resurface Silverthorn Avenue from St. Clair Avenue West to Rockwell Avenue. Our inspection of the road shows that it needs repaving, and sections of damaged curb and sidewalk need to be replaced to bring them to a state of good repair.

As part of the road resurfacing, new bikeways, non-local traffic reduction measures and road safety improvements will be implemented as part of the Council approved Silverthorn Cycling Connection. The changes include creating a cycling and walking-only block on Rockwell Avenue between the two legs of Silverthorn Avenue, street directional flips on Silverthorn Avenue and Blackthorn Avenue and the installation of a contra-flow bike lane. To learn more about the final design, please visit [Toronto.ca/silverthorn](https://toronto.ca/silverthorn).

This project is part of the Council-approved 2024 Capital Works Program to renew aging City roads and sidewalk for current and future needs.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark curbs requiring replacement and the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- **The City will not be responsible for damage to any privately owned items on City property.**

	Accessible Accommodation: The City's contractor must ensure safe and accessible walkways and entryways are maintained for everyone during construction. Any temporary access disruptions will be communicated as soon as possible. If you experience a disruption, have a specific access need or related accommodation request, contact the Local Roads Enquiries email listed below.
	Access to Your Home: The City-hired contractor may need access to the interior and exterior of your home to complete a pre-construction condition survey. Affected properties will receive a request to schedule a time to complete the pre-construction condition survey. Although participation is voluntary, the pre-construction survey results may be useful to confirm claims for potential damage caused by City construction.
	Important information for owners of sprinkler systems / heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage. This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. If you have a sprinkler system or heated driveway , please contact the Local Roads Enquiries email listed below.
	Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. First, you need to find out if your water service is lead – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes. PLEASE NOTE: The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at www.toronto.ca/leadpipes
