Sanitary forcemain replacement on your street

Contract: 23TW-CTS-11CWD Phase 1
Start Date: October 2023
End Date: January 2025
**Timeline is subject to change.*

The City of Toronto will replace the sanitary forcemain (a pressurized sewer pipe that transports wastewater from a lower to higher elevation) that has reached the end of its life cycle. Work will take place on **Lawrence Ave East west from Goldberry Square to west of Centennial Rd and inside the Cumber Sewage Pumping Station**. Please see a map of the work area below.

This project is part of the Council-approved Capital Works Program to renew aging infrastructure reducing the risk of forcemain breaks and collapses.

MAP OF WORK AREA

WORK DETAILS

- In the first few weeks, the City’s contractor will move equipment on-site and prepare the work area before construction begins. Construction crews will then:
- Incrementally excavate the road and dig a trench to install the new sanitary forcemains.
- Install the new forcemains.
- Work inside the pumping station, including checking and replacing equipment.
- When underground works are complete, restore the disturbed roadway areas with temporary asphalt and restore all the other disturbed areas such as the grassed area to its original condition.

WHAT TO EXPECT DURING CONSTRUCTION

- You may experience dust, noise and other inconveniences. The City will make efforts to reduce the impacts. We appreciate your patience.
- The City will not be responsible for damage to any privately-owned items on City property.

	Work hours: Work will take place from 7 a.m. to 7 p.m., Monday to Friday, with work after hours and on weekends as required and in accordance with the City of Toronto’s Noise Bylaw. You will be notified in advance of any changes to work hours.
	Construction noise: You may experience intermittent noise and vibration during construction (from vacuum trucks, power generators, air compressors, etc.). All work will comply with the City of Toronto's Noise Bylaw.

	Road and sidewalk access: To safely complete the work, there will be road and sidewalk restrictions within the construction work zone. Access for emergency vehicles will be maintained at all times.
	Traffic management: Efforts have been made to manage traffic in the area for the safety of workers, road users and residents. Road users should expect delays and increased traffic on nearby main and side streets.
	Restoration: The construction work area will be restored with sod and/or asphalt where required. Interlocking bricks, flagstone on a granular base, or other similar features that are removed from public and private property during construction will be replaced. Lawn seeding and/or laying of sod will be done as needed during ideal growing seasons only - in the Spring (April to June) and Fall (September to October). Permanent restoration of the curb and sidewalk will take place within 18 to 24 months.
	Accessible accommodation: The City's contractor must ensure safe and accessible walkways and entryways are maintained for everyone during construction. Any temporary access disruptions will be communicated as soon as possible. If you experience a disruption, have a specific access need or related accommodation request, contact the Field Ambassador listed below.
	<p>Pre-Condition Survey: Due to the nature of the construction and the possibility of vibration from the activities, the City has hired a company called OZA Inspections to conduct a survey of your property to verify existing conditions. This condition survey is important in the unlikely event that issues arise during the construction. Survey involves an interior and/or exterior inspection and documentation of buildings and structures determined to be in close proximity to the project work area. Photographs will be taken as part of the survey. While there is no cost to you, the preconstruction inspection is voluntary and therefore your permission and cooperation in helping us complete this survey as soon as possible is greatly appreciated.</p> <p>Making an Appointment: To arrange for an appointment you may call 1-800-667-8263 extension 231. This is a 24-hour voice message centre, or you may email us at appt@ozainspections.com</p> <p>Please indicate your name, address, telephone number and availability and we will reply.</p> <p>NOTE: Please refer to file number 22734 when you call or email.</p>

Harassment at City of Toronto construction sites is not tolerated. If you would like to make a complaint, please call 311.
