## Basement Flooding Protection Program

## Sanitary and Storm Sewer Upgrades on

## St Clair Avenue East and other local roads

Contract: 23ECS-LU-03FP  
 Start Date: Spring 2025 End Date: Spring 2027  
*\*Timeline is subject to change.*

The City of Toronto will be upgrading and improving the storm and sanitary sewer systems in your area to help reduce basement flooding. As part of this project, some watermain replacements will also be completed. The planned work will take place on the following streets:

- |                    |                        |                      |
|--------------------|------------------------|----------------------|
| • Amsterdam Avenue | • Peard Road           | • Valor Boulevard    |
| • Furnival Road    | • St Clair Avenue East | • Warvet Crescent    |
| • Glenburn Road    | • Topham Road          | • Westview Boulevard |
| • Joanith Drive    | • Squires Avenue       |                      |
| • Merrit Road      | • Squires Court        |                      |

The work also involves replacing the City-owned portion of substandard water services and sanitary sewer laterals. The sanitary service lateral is the pipe connecting your home's sewage plumbing to the City's sewer. The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

This project is part of the Council-approved Basement Flooding Protection Program to improve the water distribution system, renew our aging infrastructure and reduce the risk of sewer collapse or blockages that cause sewer backups and flooding.

### IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live in the areas depicted on the map in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

### MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- The City will not be responsible for damage to any privately owned items on City property.

	<b>Accessible Accommodation:</b> The City's contractor must ensure safe and accessible walkways and entryways are maintained for everyone during construction. Any temporary access disruptions will be communicated as soon as possible. If you experience a disruption, have a specific access need or related accommodation request, contact the <b>Field Ambassador</b> listed below.
	<b>Access to Your Home:</b> The City-hired contractor may need access to the interior and exterior of your home to complete a pre-construction condition survey. Affected properties will receive a request to schedule a time to complete the pre-construction condition survey. Although participation is voluntary, the pre-construction survey results may be useful to confirm claims for potential damage caused by City construction.
	<b>Important information for owners of sprinkler systems / heated driveways and private landscaping features.</b> Property owners should remove items located within City property limits (boulevard) to avoid damage.  This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. If you have a sprinkler system or heated driveway, please contact the <b>Field Ambassador</b> listed below.
	<b>Substandard Water Service Replacement:</b> Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. <b>First, you need to find out if your water service is lead</b> – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes. <b>PLEASE NOTE:</b> The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at <a href="https://toronto.ca/leadpipes">toronto.ca/leadpipes</a>
