

Cultural Heritage in North York

What is a Cultural Heritage Resource Assessment (CHRA)?

A CHRA is used to:

1. Document and analyze how the area has developed over time.
2. Gather an understanding of how communities value the cultural heritage of the study area
3. Identify properties and landscapes with potential cultural heritage value or interest to be considered for inclusion on the City of Toronto's Heritage Register
4. Inform other components of the North York Centre Secondary Plan review and ensure that cultural heritage resources are integrated into future policies for growth.
