Road Reconstruction on Greenwood Avenue from Mortimer Avenue to Strathmore Boulevard

Contract: 25ECS-RD-06MR
Start Date: June 2025
End Date: November 2025
**Timeline is subject to change.*

The City of Toronto is planning to reconstruct the road and replace the City-owned portion of substandard water services on Greenwood Avenue from south of Mortimer Avenue. to north of Strathmore Blvd. Our inspection of the road shows that it needs reconstruction, and the curbs, gutters and sidewalks need to be replaced to bring them to a state of good repair. The City will also install pedestrian raised crosswalks, curb extensions (bump-outs) and accessibility upgrades at Queensdale Avenue, Springdale Blvd., Milverton Blvd., and Glebeholme Blvd., and reduce curb radius at all corners to improve visibility.

The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

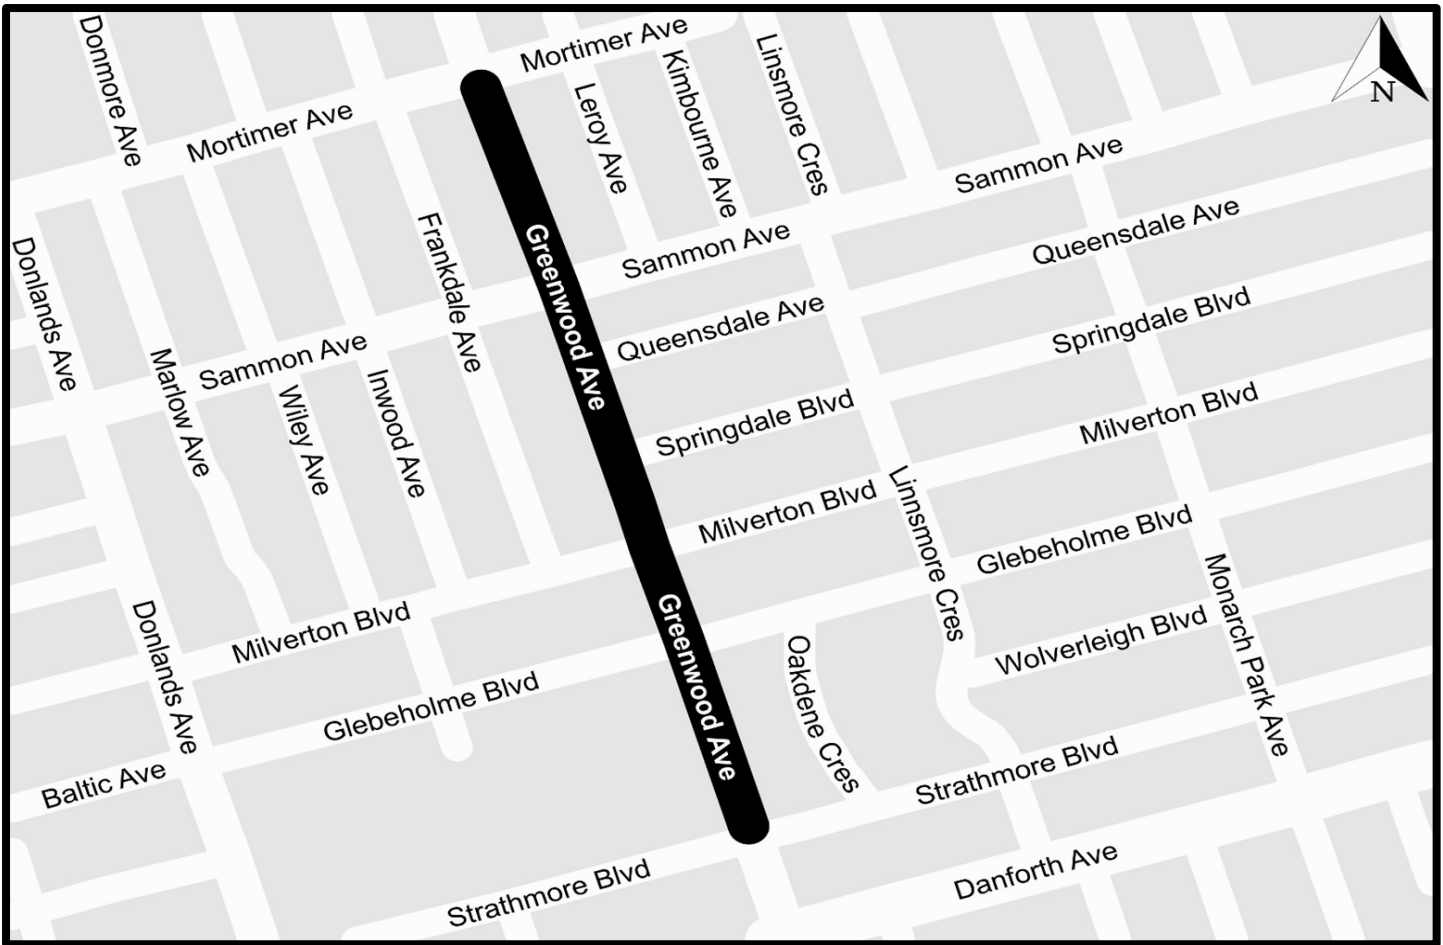

During construction, the area will be closed to vehicular traffic. Affected homeowners will be provided on-street parking permits and temporary parking areas.

This project is part of the Council-approved 2025 Capital Works Program to renew aging city roads and sidewalk for current and future needs.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live on Greenwood Avenue in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark sidewalks and curbs requiring replacement and the locations of underground utilities, such as gas, water, and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- The City will not be responsible for damage to any privately owned items on City property.

	Accessible Accommodation: The City's contractor must ensure safe and accessible walkways and entryways are maintained for everyone during construction. Any temporary access disruptions will be communicated as soon as possible. If you experience a disruption, have a specific access need or related accommodation request, contact the Project Contact listed below.
	Access to Your Home: The City-hired contractor may need access to the interior and exterior of your home to complete a pre-construction condition survey. Affected properties will receive a request to schedule a time to complete the pre-construction condition survey. Although participation is voluntary, the pre-construction survey results may be useful to confirm claims for potential damage caused by City construction.
	Important information for owners of sprinkler systems / heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage. This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. If you have a sprinkler system or heated driveway, please contact the Project Contact listed below.
	Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. First, you need to find out if your water service is lead – a licensed plumber can help you with this. If it is lead, the City of Toronto encourages you to replace it. We recommend you obtain several quotes. PLEASE NOTE: The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at www.toronto.ca/leadpipes
