Flemingdon Park Streets Plan

The City is developing a Neighbourhood Streets Plan for the Flemingdon Park area that will investigate four main areas of concern:

- 1. Road safety for vulnerable road users (i.e. older adults, school children, pedestrians and people cycling)
- 2. Excessive speeding
- 3. Excessive motor vehicle traffic on neighbourhood streets
- 4. Opportunities for active transportation (walking and cycling) and access to transit stops and stations

Project Area

The Flemingdon Park Streets Plan project area is located between Eglinton Avenue East to the north, Don Mills Road to the west, the east branch of the Don River to the east and Overlea Boulevard to the south.

The City invites residents to learn more about the project and participate in identifying issues, opportunities, and ideas for the neighbourhood.

What is a Neighbourhood Streets Plan?

Neighbourhood Streets Plans (NSPs) are a service for neighbourhoods where traffic and travel patterns may be impacting the safety and mobility of people using the streets. Through the NSP process, a team of City staff will work with communities to identify local issues and opportunities, prioritize the greatest needs, and recommend changes to traffic operations and street designs.

NSPs consider the needs of all road users and emphasize the safety of vulnerable road users such as seniors, school children, and people walking and cycling.

What types of changes will be considered?

NSPs will result in short-term actions (one to two years) which can be made using temporary, flexible materials like signs, paint, and bollards, and will identify longer term changes which can be accomplished alongside future programmed road work.

The outcomes of each NSP will be different based on local conditions and the needs of each neighbourhood. Generally, NSPs will recommend actions related to motor vehicle speed and volume management, and traffic safety conflicts on local streets. NSP recommendations are informed by the City’s Traffic Calming Guide, Vision Zero Road Safety Plan, and Complete Streets Guidelines.

Some examples of actions that may be considered include:

- Speed limit reduction
- Turn prohibitions
- Changes to the location of street parking
- Traffic calming measures (e.g. speed humps)
- Intersection safety improvements
- Changes to road design

Process

Public consultation on the Neighbourhood Streets Plan will take place in two stages. The participation of local residents and interest groups is essential to identifying appropriate actions and effective changes for the neighbourhood.
