**CROSSING NO. 1
PLAN**

EXISTING GABION BASKET

EROSION SCAR

FLOW

The plan view map shows a river channel flowing from the top left towards the bottom right. The river is depicted with a light blue fill and a black outline. A pink line with circular markers follows the right bank of the river. A black arrow labeled 'FLOW' points downstream. A large, irregularly shaped area with a cross-hatch pattern represents the 'EXISTING GABION BASKET'. A line points from the label 'EROSION SCAR' to a specific area on the right bank. Topographic contour lines are shown as thin, wavy lines. A north arrow is located in the top right corner. A small circular symbol with 'SV' is on the left bank.
