Watermain Replacement, Sanitary Sewer Replacement, and Local Road Resurfacing on Queen Elizabeth Boulevard (from Canmotor Avenue to Royal York Road)

Contract: 26ECS-LU-04SU
Start Date: Summer 2026 End Date: Spring 2027
**Timeline is subject to change.*

The City of Toronto will be upgrading the water and sewer infrastructure on Queen Elizabeth Boulevard (between 87 Queen Elizabeth Blvd and Royal York Rd). This work involves replacing the watermain, City-owned substandard water services, and the sanitary sewer system. Following the underground installations, the City will complete a full road resurfacing to improve driving conditions.

The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

New sidewalk installations are also planned for Queen Elizabeth Boulevard to improve pedestrian access. This work will take place between 10 Queen Elizabeth Street and Taymall Avenue and from Plastics Avenue to Canmotor Avenue.

This project is part of the Council-approved 2026 Capital Works Program to renew our aging infrastructure, improve water distribution and reduce the risk of watermain breaks.

IMPORTANT INFORMATION ABOUT LEAD WATER SERVICES

If you live on Queen Elizabeth Boulevard in a house that was built before the mid-1950s, your water service may be made of lead. Please read the attached fact sheet with important information about the risks of lead in drinking water, especially if someone in your house is pregnant, there are children under six years old, or there is an infant drinking formula made using tap water.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- The City will not be responsible for damage to any privately owned items on City property.

	Accessible Accommodation: The City's contractor must ensure safe and accessible walkways and entryways are maintained for everyone during construction. Any temporary access disruptions will be communicated as soon as possible. If you experience a disruption, have a specific access need or related accommodation request, contact the Field Ambassador listed below.
	Access to Your Home: The City-hired contractor may need access to the interior and exterior of your home to complete a pre-construction condition survey (inspection). Affected properties will receive a request to schedule a time to complete the pre-construction condition survey. Although participation is voluntary, the pre-construction survey results may be useful to confirm claims for potential damage caused by City construction.
	Important information for owners of sprinkler systems / heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage. This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. If you have a sprinkler system or heated driveway, please contact the Field Ambassador listed below.
	Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. If you want to replace the private portion of the water service pipe, the City of Toronto recommends that you obtain several quotes before selecting a contractor. Please note: The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at www.toronto.ca/leadpipes
