Watermain Replacement, Road Resurfacing and Road Safety Upgrades on Bathurst Street from Steeles Avenue to Kingsbridge Court

Contract: 25ECS-RD-01MR

Start Date: Late May/Early June 2026 End Date: October 2027

**Timeline is subject to change.*

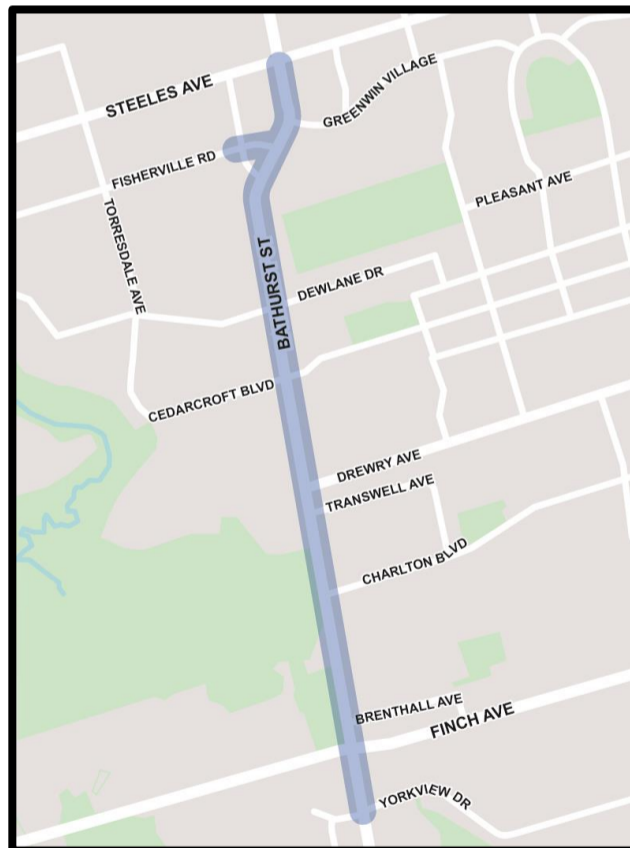

The City of Toronto plans to replace the watermain and the City-owned portion of substandard water services on Bathurst Street from Steeles Avenue to Kingsbridge Court. This construction work also includes road resurfacing, installing one-way cycle tracks in the boulevard on both sides of the road, installation of TTC priority measures, pedestrian safety improvements, new streetscaping with greening, and traffic signal upgrades. With this construction, intermittent lane closures will be on going where work is occurring.

The water service is the underground pipe that brings water to your water meter and is owned by you and by the City. The part you own is from your house to the end of your property, the part the City owns is from the end of your property to the watermain.

This project is part of the Council-approved 2026 Capital Works Program to renew our aging infrastructure, improve water distribution and reduce the risk of watermain breaks.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- The City will not be responsible for damage to any privately owned items on City property.

	<p>Accessible Accommodation: The City's contractor must ensure safe and accessible walkways and entryways are maintained for everyone during construction. Any temporary access disruptions will be communicated as soon as possible. If you experience a disruption, have a specific access need or related accommodation request, contact the City of Toronto staff listed below.</p>
	<p>Access to Your Home: The City-hired contractor may need access to the interior and exterior of your home to complete a pre-construction condition survey (inspection). Affected properties will receive a request to schedule a time to complete the pre-construction condition survey. Although participation is voluntary, the pre-construction survey results may be useful to confirm claims for potential damage caused by City construction.</p>
	<p>Important information for owners of sprinkler systems / heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage.</p> <p>This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. If you have a sprinkler system or heated driveway, please contact the City of Toronto staff listed below.</p>
	<p>Tree Removal: The City makes an effort to minimize the number of trees that are impacted by construction. Tree removals related to construction are reviewed by Urban Forestry and require approval. Trees within the construction zone that will not be removed are protected.</p> <p>To carry out this project, 73 trees will need to be removed from the City's boulevard. If this affects a tree near your property, you will receive a separate notice. After construction is completed, new trees will be planted on streets where there is sufficient space in the boulevard, in parks and ravine areas. The City plants three trees for every one tree that is removed due to construction. 166 new trees will be planted within the work area and Urban Forestry will plant additional trees outside the project area.</p>
	<p>Substandard Water Service Replacement: Please take the time to read the attached fact sheet carefully as it contains important information on lead in drinking water and how to prepare for replacement. If you want to replace the private portion-of the water service pipe, the City of Toronto recommends that you obtain several quotes before selecting a contractor. Please note: The City is not able to get involved in any contract to have work done on private property. Property owners are responsible for ensuring contractors do not interfere with the work being done on City property. Learn more at www.toronto.ca/leadpipes</p>
