Laneway Reconstruction on Laneway West Florence North Eileen

Contract: 24ECS-LU-02SM

Start Date: September, 2026 End Date: November, 2026

**Timeline is subject to change.*

The City of Toronto plans to reconstruct the laneway west of Eileen Avenue and north of Florence Crescent, specifically targeting the sections extending 54 metres east of Eileen Avenue and between 39 to 70 metres north of Florence Crescent.

The City intends to install a pervious concrete surface with vegetated paving grids along the pavement centerline. This green infrastructure captures and filters stormwater at the source, reducing runoff volume and improving water quality before it enters the sewer system and local waterways.

This project is part of the Council-approved 2026 Capital Works Program to renew the City’s aging infrastructure and improve stormwater management.

MAP OF WORK AREA

WHAT TO EXPECT BEFORE CONSTRUCTION

- Work crews will mark curbs requiring replacement and the locations of underground utilities, such as gas, water and cable so that the construction work does not interfere with these utilities.
- Affected properties will receive a Construction Notice approximately two weeks before work begins with more information about the work.
- The City will not be responsible for damage to any privately owned items on City property.

	Accessible Accommodation: The City's contractor must ensure safe and accessible walkways and entryways are maintained for everyone during construction. Any temporary access disruptions will be communicated as soon as possible. If you experience a disruption, have a specific access need or related accommodation request, contact the Field Ambassador listed below.
---	--

	Access to Your Home: The City-hired contractor may need access to the interior and exterior of your home to complete a pre-construction condition survey (inspection). Affected properties will receive a request to schedule a time to complete the pre-construction condition survey. Although participation is voluntary, the pre-construction survey results may be useful to confirm claims for potential damage caused by City construction.
	Important information for owners of sprinkler systems / heated driveways and private landscaping features. Property owners should remove items located within City property limits (boulevard) to avoid damage. This includes items such as landscaping (plants and pavers), decorative objects, sprinkler systems or heated driveways. If you have a sprinkler system or heated driveway, please contact the Field Ambassador listed below.
