1 Executive Summary

EXP Services Inc. (EXP) was retained by Build Toronto Inc. ("Client") to complete a Phase One Environmental Site Assessment (ESA) of the property located at 15 Denison Avenue, in Toronto, Ontario. The property municipally addressed as 15 Denison Avenue is hereinafter referred to as the 'Site'. (Refer to Figures 1 and 2).

The Site is located on the east side of Denison Avenue, west side of Augusta Avenue and south side of Wolseley Street, approximately 45 metres north of Queen Street West. The Site has an area of approximately 0.24 hectares (0.59 acres) and consisted of a parking lot.

It is EXP's understanding that Build Toronto Inc. intends to re-develop the Site as residential, which will require a Record of Site Condition (RSC) to be filed. As such, the objective of the investigation was to support the filing of a Record of Site Condition (RSC) in accordance with Ontario Regulation 153/04, as amended (O.Reg.153/04).

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a Site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by O.Reg.153/04, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

It is noted that general environmental management and housekeeping practices were reviewed as part of this assessment insofar as they could impact the environmental condition of the property. However, a detailed review of regulatory compliance issues was beyond the scope of our investigation. This Phase One ESA does not constitute an audit of environmental management practices, indicate geotechnical conditions or identify geologic hazards.

Based on the Phase One ESA findings, the following information is provided in Table 1-1 in support of the Phase One Qualified Person's (QP's) conclusion:

Table 1-1: Areas of Potential Environmental Concern

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)1	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Potential presence of fill material brought to site for construction of parking lot and infilling of former building cavities (PCA identifier 1)	Entire Site	PCA#30 - Importation of Fill Material of Unknown Quality	On-Site	PAHs, metals, As, Sb, Se, HWS-B, CN-, Hg, Cr(VI)	Soil
APEC 2: Potential use of de-icing salts in the parking lot.	Entire Site	PCA#Other – de-icing salts	On-Site	EC and SAR	Soil

DRAFT

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)1	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 3: Off-site PCAs to the south – historical dry cleaning, light manufacturing, metals work, coal storage and fuel tank (PCA identifiers 3, 4, 5, 6, 7, 8)	Southern portion of Site	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used) PCA#Other - historical manufacturing PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used) PCA#33 – Metal Treatment, Coating, Plating and Finishing PCA#Other – Coal Storage PCA#28 Gasoline and Associated Products in Fixed Tanks	Off-Site	PAHs, metals, As, Sb, Se, HWS-B, CN-, Hg, Cr(VI), PHCs, VOCs,	Groundwater
APEC 4: Off-site PCAs to the southeast – historic chemists, dry cleaning and dye works (PCA identifiers, 9, 10, 11)	Southeastern portion of site	PCA#8 – Chemical Manufacturing, Processing and Bulk Storage PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used) PCA#17 – Dye Manufacturing, Processing and Bulk Storage	Off-site	PHCs, VOCs, PAHs	Groundwater
APEC 5: Historic fuel oil tank to the west (PCA identifier 12)	Northwestern portion of site	PCA#28 Gasoline and Associated Products in Fixed Tanks	Off-site	PHCs	Groundwater
APEC 6: Historic repair garage to the	Northeastern portion of site	PCA#52 – Storage, maintenance, fueling and repair of equipment,	Off-site	PHCs, VOCs	Groundwater

DRAFT

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)1	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
north (PCA identifier 13)		vehicles, and material used to maintain transportation systems			

(1) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

Based on the findings of the Phase One ESA and conclusions, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site prior to submitting an RSC.

This executive summary is a brief synopsis of the report and should not be read in lieu of reading the report in its entirety.

DRAFT

2 Introduction

EXP Services Inc. (EXP) was retained by Build Toronto Inc. ("Client") to complete a Phase One Environmental Site Assessment (ESA) of the property located at 15 Denison Avenue, in Toronto, Ontario. The property municipally addressed as 15 Denison Avenue is hereinafter referred to as the 'Site'. (Refer to Figures 1 and 2).

The Site is located on the east side of Denison Avenue, west side of Augusta Avenue and south side of Wolseley Street, approximately 45 metres north of Queen Street West. The Site has an area of approximately 0.24 hectares (0.59 acres) and consisted of a parking lot.

It is EXP's understanding that Build Toronto Inc. intends to re-develop the Site as residential, which will require a Record of Site Condition (RSC) to be filed. As such, the objective of the investigation was to support the filing of a Record of Site Condition (RSC) in accordance with Ontario Regulation 153/04, as amended (O.Reg.153/04).

A Phase One ESA is a systematic qualitative process to assess the environmental condition of a Site based on its historical and current uses. This Phase One ESA was conducted in accordance with the Phase One ESA standard as defined by O.Reg.153/04, and in accordance with generally accepted professional practices. Subject to this standard of care, EXP makes no express or implied warranties regarding its services and no third-party beneficiaries are intended. Limitation of liability, scope of report and third-party reliance are outlined in Appendix A.

It should be noted that the objective of this review was to identify any environmental concerns associated with the Site.

2.1 Phase One Property Information

Details of the Site are as follows:

Municipal Address	15 Denison Avenue
Current Land Use	Commercial
Proposed Land Use	Residential
Legal Description	Lts 6-8, Pt Lt 9 Pl D127, Pt Lt 3 n/s Queen Street, Pl 65, Pt Unlettered Lot as in WA88252, WA88288, WA88331, WA88833, WA89463, WA90829, WA97766, WA88489 Pt Lt 1 Pl D127, Pt Lt 3 n/s Queen St, Plan 65, Pt Lot 9 Plan D127, Lane Pl 65&D127 Lots 1-5 Plan D127, Except WA95815, WA99649
Property Identification Number (PIN)	21238-0047 (LT) 21238-0045 (LT) 21238-0046 (LT)
Approximate Universal Transverse Mercator (UTM) coordinates	NAD83 17T 629009 m E 4834085 m N
Accuracy Estimate of UTM	10-15 m
Measurement Method	GPS
Site Area	0.24 hectares (0.59 acres)

DRAFT

3 Scope of Investigation

The scope of work for the Phase One ESA consisted of the following activities:

- Reviewing the historical occupancy of the Site through the use of available archived and relevant municipal and business directories, fire insurance plans (FIPs), topographical maps, and aerial photographs;
- Contacting municipal and provincial agencies to determine the existence of records of environmental regulatory non-compliance, if any, and reviewing such records where available;
- Obtaining an Environmental Risk Information Services Ltd. (ERIS) report for the Site and surrounding properties within a 250 metre radius of the Site;
- Reviewing available geological maps, well records and utility maps for the vicinity of the Site;
- Obtaining and reviewing a chain of title and assessment rolls for the Site;
- Reviewing available reports previously completed at the Site;
- Conducting interviews with designated Site representative(s) as a resource for current and historical Site information, as well as to provide EXP staff with unrestricted access to all areas of the Site and Site buildings (as required by O.Reg. 153/04, as amended);
- Conducting a Site reconnaissance in order to identify any land use practices that may have impacted the environmental condition of the Site;
- Conducting a reconnaissance of the surrounding properties from the Site and publicly accessible areas in order to identify any land use practices that may have impacted the environmental condition of the Site; and,
- Preparing a report to document the findings.

The following sections summarize the information gathered by EXP during the Phase One ESA and identifies Potentially Contaminating Activities (PCAs) on the Phase One property and in the Phase One study area, and Areas of Potential Environmental Concern (APECs) associated with the Site. APECs and PCAs are defined in the O. Reg 153/04, as amended.

In completing the scope of work, EXP did not conduct any intrusive investigations, including sampling, analyses or monitoring.

EXP has confirmed neither the completeness nor the accuracy of any of the records that were obtained or any of the statements made by others.

EXP personnel who conducted assessment work for this project included Ms. Kate Miles, P.Eng., Mr. Mike Luong, and Ms. Jennifer Hayman, B.Sc., P.Geo., QP_{ESA}. An outline of their qualifications is provided in Appendix C.

DRAFT

4 Record Review

4.1 General

4.1.1 Phase One Study Area Determination

The Phase One Study Area consists of properties within a distance of approximately 250 metres from the Site boundaries. The Site is bound by Wolseley Street to the north, Denison Avenue to the west, and Augusta Avenue to the east, followed by residential properties to the north, east and west and mixed residential and commercial properties to the south. The Phase One Study Area and a Surrounding Land Use Plan are shown on Figure 2.

4.1.2 First Developed Use Determination

Based on a review of fire insurance plans, municipal records, historical aerial photographs, chain of title information, and other records, the Site was first developed for residential use prior to 1875, and a bakery was opened at 13 Denison Avenue (central-western portion of the Site) in the 1920s. Circa 1970, the structures on-site were demolished and the Site was redeveloped into the current parking lot.

4.1.3 Insurance Products

4.1.3.1 Fire Insurance Plans

A search of the Catalogue of Canadian Fire Insurance Plans 1875 – 1975 (Catalogue) was conducted by Opta Information Intelligence (Opta) to determine if Fire Insurance Plans (FIPs) for the Site existed. Based on a review of the Catalogue, FIPs date 1935, 1948 and 1964 were available to the Phase One Study Area.

In addition, a search of the City of Toronto online archive identified fire insurance plans (FIPs) that provide coverage of the Site and/or the Phase One Study Area dated 1880, 1884, 1890, 1894, 1899, 1903, 1913 and 1924 were available for the Site and surrounding properties.

The following pertinent information was noted:

FIP Year	Observations
1880	• Four (4) townhouse structures are located at the Site, along Esther Avenue (numbered 8-14). • Five (5) townhouse structures (numbered 1, 3, 5, 7 and 9) are located at the Site, along Woolsley Avenue with smaller structures to the south (assumed to be for parking, stables and/or sheds). • Five (5) townhouse structures (numbered 7, 9, 13, 15 and 17) are located at the Site, along Denison Avenue. Small structures in the rear are assumed to be for parking, stables and/or storage. • One (1) structure (assumed to be used as parking/stable) is located along the laneway at the south of the site. • The Phase One Study Area consists mainly of residential properties with some commercial use along Queen Street West to the south. • The Site is bound by Denison Avenue, Woolsley Street and Esther Street.
1884	• The townhouse structures along Esther Avenue have been renumbered 16-22.

DRAFT

FIP Year	Observations
	• The remaining properties were similar to the 1880 FIP.
1890	• The Site and Phase One Study Area are similar to the 1884 FIP.
1894	• The Site and Phase One Study Area are similar to the 1890 FIP.
1899	• The Site and Phase One Study Area are similar to the 1894 FIP.
1903	• The Site and Phase One Study Area are similar to the 1899 FIP.
1913	• Woolsley Street has been renamed Wolseley Street and Esther Street has been renamed Augusta Avenue. • Eight (8) residential townhouse structures are located at the Site, along Augusta Avenue (numbered 14-24). • The remaining properties were similar to the 1903 FIP.
1924	• The Site and Phase One Study Area are similar to the 1913 FIP.
1935	• The Site is not shown. • A Chinese Laundry is located at 104 Augusta Avenue. • A Chinese Laundry is located at 57 Ryerson Avenue. • Ornamental Iron Works/Beaver Brass Co was located at 81 Ryerson Avenue. • Scott Knitting Co Factory and Dyments Printing are located at 24 Ryerson Avenue. • A repair garage is located at 41 Augusta Avenue. • Chesterfield and furniture manufacturing is located at 28-30 Vanauley Street. • Murray Printing Co is located at 192 and 194 Spadina Avenue. • General Motors Garage is located at 208-210 Spadina Avenue.
1948	• Eight (8) residential townhouse structures are located at the site, along Augusta Avenue (numbered 14-24). • Three (3) townhouse structures (numbered 5, 7 and 9) are located at the Site, along Wolseley Avenue with smaller structures to the south (assumed to be for parking and/or sheds) • Four (4) townhouse structures (numbered 7, 9, 15 and 17) and one bakery (number 13) are located at the Site, along Denison Avenue. Small structures in the rear are assumed to be for parking and/or storage. • One (1) parking garage is located along the laneway at the south of the Site. • Various light factories are located at 1-5 Denison Avenue. • A metal works company is located at the rear of 472 and 474 Queen Street West. • Beare's Limited Printing is located at 51 Wolseley Avenue. • A UST is located on the roadway in front of 534 Queen Street West. • Corman Engineering Co Ltd. Machine Shop is located at 525 Queen Street West.

FIP Year	Observations
	• A junk yard is located at 530 Adelaide Street West.
1964	• The Site is similar to that observed in the 1948 FIP. • Ornamental Iron and Aluminum Works is located at the rear of 63 Wolseley Avenue. • A cloak, shirt and pant factory is located at 551 and 553 Queen Street West. • King's Lumber is located at 552 Queen Street West. • Various Light manufacturing companies are located at 530R Queen Street West. • A garage and machine shop are located at 505-511 Richmond Street West. • Corman Engineering Co Ltd. Machine Shop is located at 525 Queen Street West. • Master Pad Co. Ltd. (mill construction) is located at 22 Maud Street. • Webster Printing and Legal Forms is located at 30 Maud Street. • A Chinese Laundry is located at 149 Portland Street. • Collett Sproule Paper Box Factory is located at 127-129 Portland Street. • A Chinese Laundry is located at 164 Portland Street. • Maple Leaf Cleaners, Central Overall Cleaners and Reliable Linen Service is located at 8 to 20 Vanauley Street, extending west approximately 40 metres from the site. • An autobody shop is located at 477 Richmond Street. • Various light manufacturing factories are located at 431 to 445 Richmond Street West. • Various light manufacturing factories are located on the south side of Camden Street. • A furniture manufacturing company is located at 180 Spadina Avenue.

Based on the information provided the following PCAs were identified:

- Various light factories are located at 1-5 Denison Avenue; PCA#Other – historical manufacturing
- A metal works company is located at the rear of 472 and 474 Queen Street West. PCA#33 – Metal Treatment, Coating, Plating and Finishing
- Beare's Limited Printing is located at 51 Wolseley Avenue. PCA#31 – Ink Manufacturing, Processing and Bulk Storage
- Ornamental Iron and Aluminum Works is located at the rear of 63 Wolseley Avenue. PCA#33 – Metal Treatment, Coating, Plating and Finishing
- A UST is located on the roadway in front of 534 Queen Street West. PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks
- A cloak, shirt and pant factory is located at 551 and 553 Queen Street West. PCA#54 – Textile Manufacturing and Processing
- King's Lumber is located at 552 Queen Street West. PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products
- Various Light manufacturing companies are located at 530R Queen Street West. PCA#Other - historical manufacturing

- A garage and machine shop are located at 505-511 Richmond Street West. PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
- Corman Engineering Co Ltd. Machine Shop is located at 525 Queen Street West. PCA#33 – Metal Treatment, Coating, Plating and Finishing
- A junk yard is located at 530 Adelaide Street West. PCA#49 – Salvage Yard, including automobile wrecking
- Master Pad Co. Ltd. (mill construction) is located at 22 Maud Street. PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products
- Webster Printing and Legal Forms is located at 30 Maud Street. PCA#31 – Ink Manufacturing, Processing and Bulk Storage
- A Chinese Laundry is located at 149 Portland Street. PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)
- Collett Sproule Paper Box Factory is located at 127-129 Portland Street. PCA#45 – Pulp, Paper, and Paperboard Manufacturing and Processing
- A Chinese Laundry is located at 164 Portland Street. PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)
- Maple Leaf Cleaners, Central Overall Cleaners and Reliable Linen Service is located at 8 to 20 Vanauley Street, extending west approximately 40 metres from the site. PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)
- An autobody shop is located at 477 Richmond Street. PCA#10 – Commercial Autobody Shops
- Various light manufacturing factories are located at 431 to 445 Richmond Street West. PCA#54 – Textile Manufacturing and Processing
- Various light manufacturing factories are located on the south side of Camden Street. PCA#33 – Metal Treatment, Coating, Plating and Finishing
- A furniture manufacturing company is located at 180 Spadina Avenue. PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products
- A Chinese Laundry is located at 104 Augusta Avenue. PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)
- A Chinese Laundry is located at 57 Ryerson Avenue. PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)
- Ornamental Iron Works/Beaver Brass Co was located at 83 Ryerson Avenue. PCA#34 – Metal Fabrication
- Scott Knitting Co Factory and Dyments Printing are located at 24 Ryerson Avenue. PCA#31 – Ink Manufacturing, Processing and Bulk Storage, PCA#54 – Textile Manufacturing and Processing
- A repair garage is located at 41 Augusta Avenue. PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems
- Chesterfield and furniture manufacturing is located at 28-30 Vanauley Street. PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products
- Murray Printing Co is located at 192 and 194 Spadina Avenue. PCA#31 – Ink Manufacturing, Processing and Bulk Storage
- General Motors Garage is located at 208-210 Spadina Avenue. PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems

DRAFT

A copy of the response from Opta is included in Appendix D.

4.1.3.2 Insurance Reports

A search of Insurance Reports was completed by Opta, no Insurance Reports were available for the Site. A copy of the response from Opta is included in Appendix D.

4.1.4 Chain of Title

The search for the historic chain of titles that comprise of the Site were completed by Dominic Bertucci, an independent title searcher.

The search identified that the Site consists of the following PINs: 21238-0047 (LT), 21238-0045 (LT) and 21238-0046 (LT).

Based on the information provided in the chain of titles, the lands were crown land until 1798 at the earliest. The following summary is provided since 1798:

- 1798 – 1920 – Agricultural/Residential
- 1920 – 1967 Residential/Commercial
- 1967 – present – Commercial Parking Lot

The completed chain of title is provided in Appendix E, and a list of previous owners and lessors of the Site are summarized in Table II.

4.1.5 Environmental Reports

The following reports were made available at the time of this Phase One ESA:

1. A report entitled "Summary of Environmental Investigation – 15 Denison Avenue, Toronto, Ontario", prepared by Terrapex Environmental Ltd. (Terrapex) for the City of Toronto on April 30th, 2020.

    - The Site was described as a commercial parking lot operated by the Toronto Parking Authority (TPA), encompassing an area of approximately 2,800 m^2 (0.28 ha)
    - The report was completed for due-diligence purposes to assist in determining the feasibility of redeveloping the Site with Emergency Housing. The report included a historical records review of the Site and surrounding properties, and a limited environmental subsurface investigation completed at the Site. The report was noted to not provide sufficient support for the filing of a Record of Site Condition (RSC).
    - Based on a historical record review, the Site was previously developed with mixed residential and commercial buildings from prior to 1900 to the late 1960s/early 1970s, later being demolished and

DRAFT

developed into a parking lot in the 1970's. Based on past uses identified at the Site, fill material of unknown quality was identified as a potential environmental concern on the Site.

- Based on a historical record review of surrounding properties, several dry cleaners were located approximately 30 m southwest of the Site, and 20 to 50 m east of the Site. Given the close proximity to the Site, they were identified as posing a potential environmental concern to the Site.

- Based on a historical review of surrounding properties, historical fuel tanks were identified at several residential and commercial properties located 50 m south and 20 m west of the Site. Given the close proximity to the Site, they were identified as posing a potential environmental concern to the Site.

- Based on the concerns identified at the Site, a limited environmental subsurface investigation was completed in April 2020. Eight (8) boreholes were advanced at the Site to a maximum depth of 4.4 m below ground surface (mbgs). Characterization of fill material included the chemical analysis of PHCs, VOCs, Metals and Inorganics, and PAHs. An additional soil sample was submitted for chemical analysis for six (6) of the eight (8) boreholes for vertical characterization of shallow soil impacts. Samples were submitted to Bureau Veritas Laboratory (BV Labs) and were compared to full-depth Site Condition Standards (SCS) for residential/parkland/institutional land use in a non-potable groundwater condition with coarse textured soil. It was noted that groundwater quality at the Site was not investigated during the limited environmental subsurface investigation.

- The soil conditions at the Site generally consisted of asphalt, granular fill, fill material extending from 0.7 or 1.0 to 1.5 or 1.9 mbgs, and a till deposit extending to 4.4 mbgs

- Based on the results of the submitted soil samples, six (6) of the eight (8) sampling locations resulted in elevated concentrations of Metals and Inorganics, PAHs and/or VOCs. The results of PHCs analysis met the table 3 SCS in all tested soil samples. The exceedances were listed as follows:

    - PAH exceedances were noted in BH101, BH102, BH104 and BH 108. Impacted soil was generally identified at a depth ranging from 0.3 to 0.6 mbgs in the fill unit at the northwest, central and southeast portions of the Site, and suspected to be related to poor quality fill material used at the Site;
    - Chloroform exceedance was noted in BH102. Impacted soil was generally identified at a depth ranging from 0.8 to 1.1 mbgs in the north central portion of the Site, and suspected to be related to a water main leak in the Wolseley Street Road allowance;
    - Metal exceedances were noted in BH101, BH102, BH105, BH106, BH107, and BH108. Impacted soil was generally identified at a depth ranging from 0.3 to 1.1 mbgs, and is suspected to be related to poor quality fill material used at the Site;
    - Salt-related parameters at all eight (8) boreholes were identified at an elevated level exceeting the Table 3 SCS. Impacted soil was generally identified at a depth ranging from 0.3 to 4.4 mbgs

DRAFT

in the fill and native silty clay till units, and is suspected to be related to road salt placed at the Site for vehicular and pedestrian safety purposes.

- Based on the Site investigation, recommendations concluded the following:
  - If the Site is selected for redevelopment with Emergency Housing, it is understood that the filing of an RSC will be required by MECP, including the requirement of additional Phase One and Phase Two ESA's, and Site Remediation and/or a Risk Assessment; and,
  - A Soil Management Plan should be developed and implemented that meets O.Reg 406/19 requirements prior to undertaking earthworks at the Site.

4.2 Environmental Source Information

4.2.1 Federal and Provincial Database Search

A search of provincial, federal and private environmental databases for records pertaining to the Site and properties within the Phase One Study Area was completed by Environmental Risk Information Services (ERIS) for the surrounding Phase One Study Area. EXP has confirmed neither the completeness nor the accuracy of the records that were provided. The ERIS Report is provided in Appendix F.

A summary of the significant findings is provided below:

Address	Description	Database	Associated PCA(s)
Surrounding Properties			
472 Queen Street West (immediately south of the site)	In 2018, Canada Cartage spilled 200 litres of cooking oil to roadway and catchbasin.	SPL	This is not considered to be an environmental concern due to the nature of the spill (cooking oil).
478 Queen Street West (immediately south of the site)	J Brelin had a fuel tank installed in 1919. In 2017, a natural gas leak occurred.	TANK, SPL	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks
468 Queen Street West (immediately south of the site)	In 2006, 409 litres of vegetable oil was spilled to the catchbasin at the rear of the building.	SPL	This is not considered to be an environmental concern due to the nature of the spill (cooking oil).
474 Queen Street West (immediately south of the site)	BBF's was registered as a limited pesticides vendor.	PES	Based on the small amounts of pesticides stored for sale at the property and being listed as a vendor, this is not considered to be an environmental concern.

4.2.3.1 Ministry of the Environment, Conservation and Parks (MECP)

The MECP was contacted through the Freedom of Information and Protection of Privacy Act (FOI) for copies of any records they had pertaining to the Site on December 21, 2021.

A written response from the MECP typically requires several months. Upon receipt of the response from the MECP, any significant environmental issues identified will be summarized in the report.

A copy of the request is provided in Appendix H.

4.2.3.2 Ministry of the Environment and Climate Change Databases

The ERIS report summarized in the Federal and Provincial Database Search section of the report included a summary of MECP databases (see section 4.2.1). The databases include the following: Environmental Bill of Rights (EBR), Brownfields Environmental Site Registry, Hazardous Waste Information Network (HWIN) and Waste Disposal Sites.

4.2.4 Technical Standards and Safety Authority

A request was made to the TSSA by email on November 25, 2021, for information regarding fuel storage at the Site and adjacent properties.

A written response for the TSSA was received on November 25, 2021. According to a search of their database, no records were found for the Site or for properties surrounding the Site.

A copy of the e-mail correspondence with the TSSA is provided in Appendix H.

4.3 Physical Setting Sources

4.3.1 Aerial Photographs

Aerial photographs dated 1939, 1954, 1965, 1978, 1985, 1992, 2005, 2009, 2015, and 2020 were obtained in order to review the development and land use history of the Site, as well as to the land in the immediate vicinity of the Site.

The development and land use history of the Site and adjacent properties as depicted on the reviewed aerial photography is summarized in the table below. Copies of the aerial photographs are included in Appendix I.

Aerial Photography Year	Observations
1939	• Multiple structures are located at the site. • Roadways are located to the immediate east (Denison Avenue), north (Wolseley Street) and west (Augusta Avenue) of the Site. • The surrounding properties appear to consist of a mixture of residential and commercial/industrial structures.
1957	• The Site appears similar to the 1939 aerial photograph. • The Phase One Study Area appears similar to the 1939 aerial photograph.
1965	• The Site appears similar to the 1957 aerial photograph.

DRAFT

Aerial Photography Year	Observations
	• The Phase One Study Area appears similar to the 1957 aerial photograph.
1978	• The Structures have been demolished and the site consists of a parking lot. • The Phase One Study Area appears similar to the 1965 aerial photograph.
1985	• The Site appears similar to the 1978 aerial photograph. • The Phase One Study Area appears similar to the 1978 aerial photograph.
1992	• The Site appears similar to the 1985 aerial photograph. • The Phase One Study Area appears similar to the 1985 aerial photograph.
2005	• The Site appears similar to the 1992 aerial photograph. • The Phase One Study Area appears similar to the 1992 aerial photograph.
2009	• The Site appears similar to the 2005 aerial photograph. • The Phase One Study Area appears similar to the 2005 aerial photograph.
2015	• The Site appears similar to the 2009 aerial photograph. • The Phase One Study Area appears similar to the 2009 aerial photograph.
2020	• The Site appears similar to the 2015 aerial photograph. • The Phase One Study Area appears similar to the 2015 aerial photograph.

Based on the reviewed aerial photographs, potential fill material being brought to the Site for redevelopment activities is considered to be a PCA; PCA#30 - Importation of Fill Material of Unknown Quality.

4.3.2 Topography, Hydrology and Geology

The following physiographic, geological and soil maps were reviewed:

- "Toporama"; Natural Resources Canada. Map 030M11. Scale 1:15,000. 2008.
- York County Atlas. 1878.
- Quaternary Geology of Ontario - geology_ll.shp [computer file], Ontario: Ontario Geological Survey, 2000.
- Bedrock Geology of Ontario - geology_ll.shp [computer file], Ontario: Ontario Geological Survey, 2000.

Based on the review of the above maps, the following information was obtained:

- The Site is approximately 94 m above sea level and is generally flat.
- A review of the topographic map indicated that the closest water body is Lake Ontario, located approximately 1.3 km south of the site. Based on the local topography, the anticipated groundwater flow direction is south.
- According to the York County Atlas (1878), the property was located within a developed area of the City of Toronto.
- The Site is located in the Iroquois Plain which is expected to consist of undifferentiated older tills and may include stratified deposits.

DRAFT

- The bedrock in the general area of the Site is part of a group belonging to the Georgian Bay Formation, Blue Mountain Formation, Billings Formation, Collingwood Member and Eastview Member, consisting of shale, limestone, dolostone and siltstone.

4.3.3 Fill Materials

Fill material is typically brought to a property as a base for buildings and pavement areas. Fill can also be used to re-grade a property, and to backfill excavations.

Based on the reviewed information, it is possible that poor quality fill material was used as a base for the parking lot in addition to the infilling of the former building cavities. Based on a review of the summary of an Environmental Investigation completed at the Site by Golder in 2020, PAH and Metal and Inorganic soil impacts were identified at the Site, and were inferred to be related to the poor quality of fill used at the Site for backfilling and grading purposes. The potential for poor quality fill material is considered to be a PCA: PCA#30 - Importation of Fill Material of Unknown Quality.

4.3.4 Areas of Natural Significance

Based on the review of available resources from the Ministry of Natural Resources and Forestry website December 21, 2021, no areas of natural significance were identified at the Site or within 30 m of the Site.

4.3.5 Well Records

4.3.5.1 Water Wells

A search of the water well database was conducted by ERIS of the surrounding Phase One Study Area and Ontario Well Records Database to identify water wells within the Phase One Study Area.

Based on the ERIS database records and Ontario Well Records, no well records were noted on-Site, and approximately one hundred and twenty-three (123) well records were located on lands within the Phase One Study Area.

4.3.5.2 Oil, Gas, and Salt Wells

A search of the Oil, Gas & Salt Resources Library (2014) was completed by ERIS. According to the findings of ERIS's search, no oil, gas or salt wells are located on-Site or within the Phase One Study Area.

4.4 Site Operating Records

In general, a request is usually made to the property representative for copies of any operating records pertaining to the environmental conditions at the Site. Records would include: regulatory permits; Material Safety Data Sheets (MSDS) for all chemicals that were handled on-Site; underground utility drawings; inventories of chemicals, chemical usage, and chemical storage areas; inventory of aboveground storage tanks (ASTs) and underground storage tanks (USTs); environmental monitoring data; correspondence pertaining to an order or request by the MECP or TSSA; waste management records; process, production, and maintenance documents; records of spills and records of discharges of chemicals; emergency response and contingency plans, including spill prevention and contingency plans; environmental audit reports; and Site plans of the facility showing areas of production and manufacturing

There were no records of environmental significance available for review at the time of this Phase One ESA.

DRAFT

5. Interviews

Interviews were conducted by EXP staff with the individuals identified to be the most knowledgeable with respect to both the current and historical Site uses. The interviews were conducted during the Site reconnaissance in order to obtain information to assist in identifying details of potentially contaminating activities, potential contaminant pathways in, on, or below the Site, and areas of potential environmental concern. Any information provided during the interviews is presented alongside information from the Site reconnaissance in Section 5.

During the completion of this Phase One ESA, the following individual was interviewed:

1. Mr. Darcy Watt, the Planning and Policy Analyst for Toronto Parking Authority for approximately 3 years was interviewed via email on December 19, 2021, for information regarding the on-Site operations and history.

Information collected from the Site representative was used in the completion of Section 5.0.

DRAFT

6. Site Reconnaissance

6.1 General Requirements

The Phase One Site reconnaissance was conducted on December 2, 2021, between 10:00 am and 11:00 am by Mr. Mike Luong, under the supervision of Ms. Jennifer Hayman, QP_{ESA}, a Qualified Person as defined by O.Reg. 153/04, as amended. On the day of the Site reconnaissance, the weather was overcast and approximately 9°C.

The Site and the adjoining properties were observed from the Site and/or publicly accessible areas. Photographs documenting the Site visit are included in Appendix J.

6.2 Specific Observations at Phase One ESA Property

6.2.1 Site Description and Buildings

The Site consists of an asphalt paved Green P parking lot, bordered by Denison Avenue to the west, Wolseley Street to the north and Augusta Avenue to south and is approximately 0.24 hectares (0.59 acres). No structures are located at the site. There is potential for the use of de-icing salts at the site. PCA#Other – use of de-icing salts.

6.2.2 Heating and Cooling Systems

No heating or cooling systems were present at the site.

6.2.3 Site Utilities and Services

The Site utilities and services were identified at the Site based on information provided in environmental records, relevant utility infrastructure observed during the Site reconnaissance. The Site utilities are summarized in the table below and noted on Figure 3, where available. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Source	Location	Site Entry
Natural Gas	Enbridge Gas	Underground	Unknown
Sanitary Sewer	City of Toronto	Underground	Unknown
Storm Sewer	City of Toronto	Underground	Various storm sewers observed in the asphalt portion of the Site.
Water	City of Toronto	Underground	Unknown.
Electricity	Toronto Hydro	Underground	Unknown
Telecommunications	Bell Canada / Telus / Rogers	Underground	Unknown

6.2.4 Sewage and Wastewater Disposal

The Site and surrounding area are served by municipal sanitary and storm sewer systems.

6.2.5 Potable Water Sources

The Site and surrounding area are serviced by the municipal water source at the time of the Site visit.

DRAFT

6.2.6 Abandoned and Existing Wells

No abandoned or existing potable water wells were observed on the Site during the Site visit.

6.2.7 Site Production and Manufacturing

There are no on-Site production or manufacturing activities.

6.2.8 Drains, Pits and Sumps

No drains, pits, or sumps were observed on the Site at the time of the Site visit.

6.2.9 Storage Tanks

The presence/absence and condition (if present) of underground storage tanks (USTs) and aboveground storage tanks (ASTs) at the Site were assessed during the Site visit. No USTs or ASTs were observed at the site.

6.2.10 Water Wells

No potable water wells were observed at the time of the Site visit.

6.2.11 Site Housekeeping

The Site was well maintained, with no evidence of misplaced/excessive waste or spills being observed at the time of the Site visit.

6.2.12 Chemical Storage and Handling and Floor Condition

No chemicals were observed on the Site at the time of the Site visit.

6.2.13 Areas of Stained Soil, Pavement or Stressed Vegetation

There were minor stains on the asphalt parking lot. There were no discernable major cracks around the stained floor.

No other evidence of staining or stressed vegetation was observed during the Site visit.

6.2.14 Fill and Debris

Fill material is typically brought to a property as a base for buildings and pavement areas. Fill can also be used to re-grade a property and to backfill excavations.

The Site was graded to be level with the surrounding properties.

For a discussion on possible fill materials located beneath the surface at the Site refer to Section 4.3.3.

6.2.15 Air Emissions

Air emissions in Ontario are regulated under the Environmental Protection Act (EPA) and its Regulations (O. Reg. 419/05, O. Reg. 245/11, O.Reg 1/17). Owners and operators of activities that may discharge a contaminant into the natural environment must seek permissions from the Ministry of Environment, Conservation and Parks (MECP) to carry out these activities. As of October 31, 2011, amendments to the EPA resulted in a two-path environmental approval process, the Environmental Compliance Approval (ECA) and Environmental Activity and Sector Registry (EASR). The EASR allows businesses to register certain activities with the ministry, rather than apply for approvals. The EASR is for common systems and processes, initially for heating systems, standby power systems and automotive refinishing, to which preset rules of operation can be applied. Effective January 3, 2017 additional activities were allowed through the EASR process based on the facility's North American Industry Classification System

DRAFT

(NAICS) code but required full assessment for compliance of emissions under O.Reg. 419/05. Unless explicitly exempted, most industrial processes or modification to industrial processes and equipment require an ECA, formerly a Certificate of Approval (Air and Noise).

Based on the Site visit, there was no evidence of operations would require MECP approval for air emissions.

6.2.16 Polychlorinated Biphenyls (PCBs)

As there are no buildings, it is unlikely that any PCBs are located on site.

6.3 Enhanced Investigation Property Observations

An Enhanced Investigation Property is "(i) a property used, or has ever been used, in whole or part, for an industrial purpose, or (ii) a commercial property used as a garage, a bulk liquid dispensing facility, including a gasoline outlet or for the operation of dry-cleaning equipment" (O.Reg. 153/04).

Based on the information reviewed on the historical and current use (commercial), the Site is not classified as an Enhanced Investigation Property.

6.4 Adjacent and Surrounding Properties

A visual reconnaissance of the adjacent properties, and properties within the Phase One Study Area was conducted from publicly accessible areas to identify the occupants; and document any PCAs that may be contributing to an APEC at the Site.

Based on the visual reconnaissance of adjacent and surrounding properties within the Phase One Study Area, no adjacent or surrounding properties within the Phase One Study Area were identified as having operations that contribute towards a PCA as defined in Table 2 of Schedule D;

6.5 Written Description of Investigation

A reconnaissance of the Site was conducted by EXP to examine the exterior of the Site. Access was provided to the entirety of the Phase One Property. The exterior portions of the Site were examined for evidence of utilities and related infrastructure; water wells; Site drainage and related infrastructure; stained areas; stressed vegetation; and, evidence of fill material.

The reconnaissance of the Site included an examination of all properties within the Phase One Study Area from public access ways to document and characterize PCAs, water bodies and areas of natural significance.

DRAFT

7. Review and Evaluation of Information

7.1 Current and Past Uses

Based on a review of fire insurance plans, municipal records, historical aerial photographs, chain of title information, and other records, the Site was first developed for residential use prior to 1875, a bakery was opened at 13 Denison Avenue (central-western portion of the site) prior to 1929. Circa 1970, the structures on-site were demolished, and the site was redeveloped into the current parking lot.

The current and past ownership of the Site is summarized in Table II.

7.2 Potentially Contaminating Activities (PCAs)

A list of all the PCAs identified at the Site and within the Phase One Study Area are listed in the CSM Appendix K and shown on Figure 2.

7.3 Areas of Potential Environmental Concern (APECs)

Since the inferred groundwater flow direction is inferred to be to the south/southeast, the properties within the Phase One Study Area south and southeast of the Site were considered to be hydraulically down-gradient of the Site; and, the properties to the east and west of the Site were considered to be hydraulically trans-gradient to the Site. Furthermore, any PCAs located significantly distant from the Site (>100 m) were considered to be too distant to be contributing to an APEC on the Site.

The following PCAs were considered to contribute to an APEC:

- PCAs identified at the Site; and
- PCAs located on immediately adjacent properties (off-Site) or situated up-gradient to the Site with respect to the anticipated groundwater flow direction;

The APECs identified at the Site are summarized in the CSM (Appendix K) and on Figure 4.

DRAFT

8. Conclusions

8.1 Whether Phase Two ESA Required Before RSC Submitted

Based on the results and findings of the Phase One ESA, a Phase Two ESA is required before a RSC may be submitted to investigate the following APECs identified on the Phase One Property:

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)1	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Potential presence of fill material brought to site for construction of parking lot and infilling of former building cavities (PCA identifier 1)	Entire Site	PCA#30 - Importation of Fill Material of Unknown Quality	On-Site	PAHs, metals, As, Sb, Se, HWS-B, CN-, Hg, Cr(VI)	Soil
APEC 2: Potential use of de-icing salts in the parking lot.	Entire Site	PCA#Other – de-icing salts	On-Site	EC and SAR	Soil
APEC 3: Off-site PCAs to the south – historical dry cleaning, light manufacturing, metals work, coal storage and fuel tank (PCA identifiers 3, 4, 5, 6, 7, 8)	Southern portion of Site	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used) PCA#Other - historical manufacturing PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used) PCA#33 – Metal Treatment, Coating, Plating and Finishing PCA#Other – Coal Storage PCA#28 Gasoline and Associated Products in Fixed Tanks	Off-Site	PAHs, metals, As, Sb, Se, HWS-B, CN-, Hg, Cr(VI), PHCs, VOCs,	Groundwater

DRAFT

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)1	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 4: Off-site PCAs to the southeast – historic chemists, dry cleaning and dye works (PCA identifiers, 9, 10, 11)	Southeastern portion of site	PCA#8 – Chemical Manufacturing, Processing and Bulk Storage PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used) PCA#17 – Dye Manufacturing, Processing and Bulk Storage	Off-site	PHCs, VOCs, PAHs	Groundwater
APEC 5: Historic fuel oil tank to the west (PCA identifier 12)	Northwestern portion of site	PCA#28 Gasoline and Associated Products in Fixed Tanks	Off-site	PHCs	Groundwater
APEC 6: Historic repair garage to the north (PCA identifier 13)	Northeastern portion of site	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Off-site	PHCs, VOCs	Groundwater

(1) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

8.2 RSC Based on Phase One ESA Alone

As such, an RSC cannot be filed based on the Phase One ESA alone.

A Phase Two ESA is required to investigate the APECs identified in this Phase One ESA, prior to filing a RSC, if required.

9 Closure

We trust this report is satisfactory for your purposes. Should you have any questions, please do not hesitate to contact this office.

Yours truly,

EXP Services Inc.

1872-1888	Samuel Marshall	Residential Houses	Residential Use	
1888-1896	Louisa Todd			
1896-1911	Charlotte McGregor			
1903-1911	Louisa Todd			
1911-1911	Dora Reider			
1911-1929	Hersh Shnoll	Residential Houses and Bakery	Commercial Use	Based on the municipal records and fire insurance plans, a bakery was opened at the site circa 1920. The remaining buildings at the site were used for residential purposes.
1929-1944	Samuel Blivass			
1944-1945	Joseph Graner			
1945-1949	Mary Romsky			
1949-1952	Karol Stanek			
1952-1957	Domenico Primucci			
1957-1961	Rocco Faiella			
1961-1965	Spyros Lkonizakis			
1965-1968	Jose Matias			
1968-Present	The Corporation of The City Of Toronto	Public Parking Lot		Based on the aerial photographs, chain of title information and site inspection, the site is a parking lot. PCA#Other - de-icing salts

Notes:

1 - for each owner, specify one of the following types of property use (as defined in O.Reg. 153/04) that applies:

Agriculture or other use
Commercial use
Community use
Industrial use
Institutional use
Parkland use

Appendix A – Liability

DRAFT

LIMITATIONS AND USE OF REPORT

BASIS OF REPORT

The Report is based on site conditions known or inferred by the investigation undertaken as of the date of the Report. Should changes occur which potentially impact the condition of the site the recommendations of EXP may require re-evaluation. Where special concerns exist, or the Client has special considerations or requirements, these should be disclosed to EXP to allow for additional or special investigations to be undertaken not otherwise within the scope of investigation conducted for the purpose of the Report.

Where applicable, recommended field services are the minimum necessary to ascertain that construction is being carried out in general conformity with building code guidelines, generally accepted practices and EXP's recommendations. Any reduction in the level of services recommended will result in EXP providing qualified opinions regarding the adequacy of the work. EXP can assist design professionals or contractors retained by the Client to review applicable plans, drawings, and specifications as they relate to the Report or to conduct field reviews during construction.

RELIANCE ON INFORMATION PROVIDED

The evaluation and conclusions contained in the Report are based on conditions in evidence at the time of site inspections and information provided to EXP by the Client and others. The Report has been prepared for the specific site, development, building, design or building assessment objectives and purpose as communicated by the Client. EXP has relied in good faith upon such representations, information and instructions and accepts no responsibility for any deficiency, misstatement or inaccuracy contained in the Report as a result of any misstatements, omissions, misrepresentation or fraudulent acts of persons providing information. Unless specifically stated otherwise, the applicability and reliability of the findings, recommendations, suggestions or opinions expressed in the Report are only valid to the extent that there has been no material alteration to or variation from any of the information provided to EXP.

STANDARD OF CARE

This report ("Report") has been prepared in a manner consistent with the degree of care and skill exercised by engineering consultants currently practicing under similar circumstances and locale. No other warranty, expressed or implied, is made. Unless specifically stated otherwise, the Report does not contain environmental consulting advice.

COMPLETE REPORT

All documents, records, data and files, whether electronic or otherwise, generated as part of this assignment form part of the Report. This material includes, but is not limited to, the terms of reference given to EXP by the Client, communications between EXP and the Client, other reports, proposals or documents prepared by EXP for the Client in connection with the site described in the Report. In order to properly understand the suggestions, recommendations and opinions expressed in the Report, reference must be made to the Report in its entirety. EXP is not responsible for use by any party of portions of the Report.

USE OF REPORT

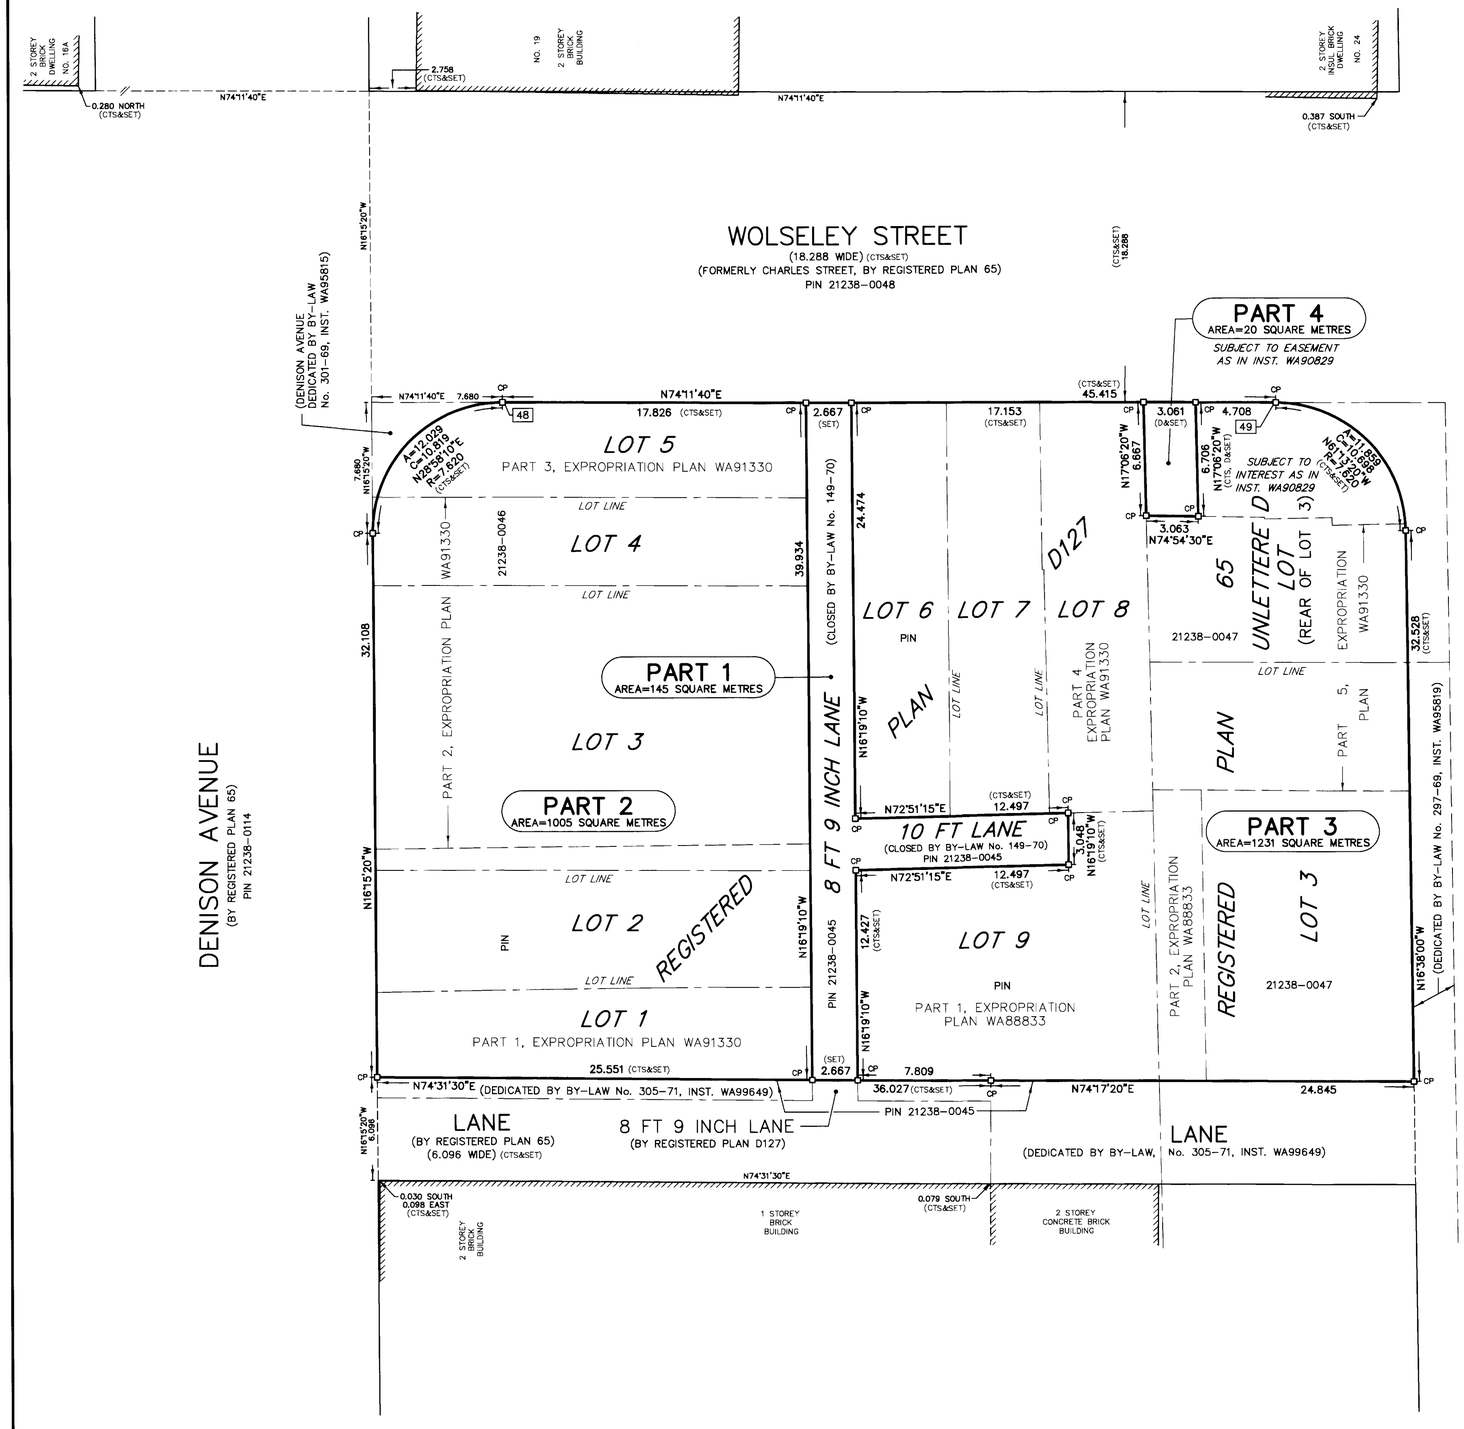
The information and opinions expressed in the Report, or any document forming part of the Report, are for the sole benefit of the Client. No other party may use or rely upon the Report in whole or in part without the written consent of EXP. Any use of the Report, or any portion of the Report, by a third party are the sole responsibility of such third party. EXP is not responsible for damages suffered by any third party resulting from unauthorised use of the Report.

REPORT FORMAT

Where EXP has submitted both electronic file and a hard copy of the Report, or any document forming part of the Report, only the signed and sealed hard copy shall be the original documents for record and working purposes. In the event of a dispute or discrepancy, the hard copy shall govern. Electronic files transmitted by EXP utilize specific software and hardware systems. EXP makes no representation about the compatibility of these files with the Client's current or future software and hardware systems. Regardless of format, the documents described herein are EXP's instruments of professional service and shall not be altered without the written consent of EXP.

Appendix B – Survey Plan

DRAFT



I require this plan to be deposited under the Land Titles Act.

Date NOVEMBER 19, 2020

BEARING, DISTANCE AND CO-ORDINATE NOTES

BEARINGS AND CO-ORDINATES ARE GRID AND ARE DERIVED FROM SPECIFIED CONTROL POINTS No. 02219740238 AND No. 02219740700 AND ARE REFERRED TO THE 3° MODIFIED TRANSVERSE MERCATOR GRID PROJECTION, ZONE 10, CENTRAL MERIDIAN 79°30' WEST LONGITUDE, TOR_H-1974.

CO-ORDINATES TO URBAN ACCURACY PER SEC. 14(2) OF O. REG. 216/10.

DISTANCES ARE GROUND AND CAN BE CONVERTED TO GRID BY MULTIPLYING BY THE COMBINED SCALE FACTOR OF 0.99988622.
AREAS SHOWN HEREON ARE CALCULATED FROM GROUND DISTANCES.

POINT ID	EASTING	NORTHING
SCP 02219740238	312885.890	4834012.414
48	312796.815	4834085.810
49	312840.508	4834098.178

CO-ORDINATES CANNOT, IN THEMSELVES, BE USED TO RE-ESTABLISH CORNERS OR BOUNDARIES SHOWN ON THIS PLAN.

DISTANCES AND CO-ORDINATES SHOWN ON THIS PLAN ARE IN METRES AND CAN BE CONVERTED TO FEET BY DIVIDING BY 0.3048.

SURVEYOR'S CERTIFICATE

I CERTIFY THAT:

1. THIS SURVEY AND PLAN ARE CORRECT AND IN ACCORDANCE WITH THE SURVEYS ACT, THE SURVEYORS ACT AND THE LAND TITLES ACT AND THE REGULATIONS MADE UNDER THEM.
2. THE SURVEY WAS COMPLETED ON NOVEMBER 19, 2020.

Appendix C – Qualifications

DRAFT

Qualifications of Assessors

The site inspection was conducted by Mr. Mike Luong, who has been trained to conduct Phase One ESAs in accordance with O.Reg 153. Since joining EXP in 2019, Mr. Luong has been involved in the oversight, planning and execution of numerous Phase One and Two Environmental Site Assessments, and remediation projects. His work has included test hole drilling, soil and ground water sampling and analysis, supervision of in-situ and ex-situ remediation projects, and report writing.

The records review was conducted by Ms. Kate Miles, who has been trained to conduct Phase One ESAs in accordance with O.Reg 153. Ms. Miles graduated from Queen's University with a Bachelor of Science in Chemical Engineering in 2010, and from Ryerson University's Chang School of Continuing Education with a certificate in Environmental Engineering Science in 2014. She has over six years experience in environmental consulting and is a licensed professional engineer in Ontario.

This senior review of the records review portion of the Phase One ESA was conducted by Ms. Jennifer Hayman, P.Geo. Jennifer is a Senior Project Manager at EXP with 18 years of environmental consulting experience in Canada. Ms. Hayman has managed and conducted numerous Phase I/One and Phase II/Two Environmental Site Assessments and Record of Site Condition as well as other due diligence and regulatory projects. She is a Qualified Person for Environmental Site Assessment.

EXP Services Inc. is a full service consulting and engineering firm and provides a full range of environmental services through the Environmental Services Group. EXP's Environmental Services Group has developed a strong working relationship with clients in both the private and public sectors and has developed a positive relationship with the Ontario Ministry of the Environment. Personnel in the numerous branch offices form part of a large network of full-time dedicated environmental professionals in the EXP organization.

Opta Historical Environmental Services Enviroscan™ Terms and Conditions

Report

The documents (hereinafter referred to as the "Documents") to be released as part of the report (hereinafter referred to as the "Report") to be delivered to the purchaser as set out above are documents in Opta's records relating to the described property (hereinafter referred to as the "Property"). Opta makes no representations or warranties respecting the Documents whatsoever, including, without limitation, with respect to the completeness, accuracy or usefulness of the Documents, and does not represent or warrant that these are the only plans and reports prepared in association with the Property or in Opta's possession at the time of Report delivery to the purchaser. The Documents are current as of the date(s) indicated on them. Interpretation of the Documents, if any, is by inference based upon the information which is apparent and obvious on the face of the Documents only. Opta does not represent, warrant or guarantee that interpretations other than those referred to do not exist from other sources. The Report will be prepared for use by the purchaser of the services as shown above hereof only.

Disclaimer

Opta disclaims responsibility for any losses or damages of any kind whatsoever, whether consequential or other, however caused, incurred or suffered, arising directly or indirectly as a result of the services (which services include, but are not limited to, the preparation of the Report provided hereunder), including but not limited to, any losses or damages arising directly or indirectly from any breach of contract, fundamental or otherwise, from reliance on Opta Reports or from any tortious acts or omissions of Opta's agents, employees or representatives.

Entire Agreement

The parties hereto acknowledge and agree to be bound by the terms and conditions hereof. The request form constitutes the entire agreement between the parties pertaining to the subject matter hereof and supersedes all prior and contemporaneous agreements, negotiations and discussions, whether oral or written, and there are no representations or warranties, or other agreements between the parties in connection with the subject matter hereof except as specifically set forth herein. No supplement, modification, waiver, or termination of the request shall be binding, unless confirmed in writing by the parties hereto.

Governing Document

In the event of any conflicts or inconsistencies between the provisions hereof and the Reports, the rights and obligations of the parties shall be deemed to be governed by the request form, which shall be the paramount document.

Law

This agreement shall be governed by and construed in accordance with the laws of the Province of Ontario and the laws of Canada applicable therein.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Limited Partnership ("ERIS") using various sources of information, including information provided by Federal and Provincial government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report (s) are protected by copyright owned by ERIS Information Limited Partnership. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Historical Summary:

Fills, St. Andrew's Square In 1881 ashes, mud and scrapings were being deposited here (TCM 1881 Appendix: Committee on Markets & Health 35th report 11.1.82). In 1884 the Property Committee had the ground dressed with material (TCM 1884: Appendix #26 January 14 1885). In 1884 ashes, refuse, mud and scrapings were being deposited here (TCM 1884: Appendix #26 January 14 1885). Filling and grading in 1888. 1923 Goad's Atlas I: 18 St Andrew's Market, Hall and City Yard occupy the northern half of the St Andrew's Square property, a playground occupies the southern half. Square is bounded by Maud St, Richmond St W, Brant and Adelaide St W. It appears to be subdivided by plan 135. Take a centroid @ UTM 629090--4833665.

Waste Type: garbage, street sweepings, ashes & rubbish
UTM X Nad 27: 629090
UTM Y Nad 27: 4833665
UTM Zone: 17

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ***Note:*** *Databases denoted with " * " indicates that the database will no longer be updated. See the individual database description for more information.*

Abandoned Aggregate Inventory: Provincial AAGR

The MAAP Program maintains a database of abandoned pits and quarries. Please note that the database is only referenced by lot and concession and city/town location. The database provides information regarding the location, type, size, land use, status and general comments.*

Government Publication Date: Sept 2002*

Aggregate Inventory: Provincial AGR

The Ontario Ministry of Natural Resources maintains a database of all active pits and quarries. The database provides information regarding the registered owner/operator, location name, operation type, approval type, and maximum annual tonnage.

Government Publication Date: Up to Sep 2020

Abandoned Mine Information System: Provincial AMIS

The Abandoned Mines Information System contains data on known abandoned and inactive mines located on both Crown and privately held lands. The information was provided by the Ministry of Northern Development and Mines (MNDM), with the following disclaimer: "the database provided has been compiled from various sources, and the Ministry of Northern Development and Mines makes no representation and takes no responsibility that such information is accurate, current or complete". Reported information includes official mine name, status, background information, mine start/end date, primary commodity, mine features, hazards and remediation.

Government Publication Date: 1800-Oct 2018

Anderson's Waste Disposal Sites: Private ANDR

The information provided in this database was collected by examining various historical documents which aimed to characterize the likely position of former waste disposal sites from 1860 to present. The research initiative behind the creation of this database was to identify those sites that are missing from the Ontario MOE Waste Disposal Site Inventory, as well as to provide revisions and corrections to the positions and descriptions of sites currently listed in the MOE inventory. In addition to historic waste disposal facilities, the database also identifies certain auto wreckers and scrap yards that have been extrapolated from documentary sources. Please note that the data is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1860s-Present

Aboveground Storage Tanks: Provincial AST

Historical listing of aboveground storage tanks made available by the Department of Natural Resources and Forestry. Includes tanks used to hold water or petroleum. This dataset has been retired as of September 25, 2014 and will no longer be updated.

Government Publication Date: May 31, 2014

Automobile Wrecking & Supplies: Private AUWR

This database provides an inventory of known locations that are involved in the scrap metal, automobile wrecking/recycling, and automobile parts & supplies industry. Information is provided on the company name, location and business type.

Government Publication Date: 1999-Sep 30, 2021

Borehole: Provincial BORE

A borehole is the generalized term for any narrow shaft drilled in the ground, either vertically or horizontally. The information here includes geotechnical investigations or environmental site assessments, mineral exploration, or as a pilot hole for installing piers or underground utilities. Information is from many sources such as the Ministry of Transportation (MTO) boreholes from engineering reports and projects from the 1950 to 1990's in Southern Ontario. Boreholes from the Ontario Geological Survey (OGS) including The Urban Geology Analysis Information System (UGAIS) and the York Peel Durham Toronto (YPDT) database of the Conservation Authority Moraine Coalition. This database will include fields such as location, stratigraphy, depth, elevation, year drilled, etc. For all water well data or oil and gas well data for Ontario please refer to WWIS and OOGW.

Government Publication Date: 1875-Jul 2018

Certificates of Approval: Provincial CA

This database contains the following types of approvals: Air & Noise, Industrial Sewage, Municipal & Private Sewage, Waste Management Systems and Renewable Energy Approvals. The MOE in Ontario states that any facility that releases emissions to the atmosphere, discharges contaminants to ground or surface water, provides potable water supplies, or stores, transports or disposes of waste, must have a Certificate of Approval before it can operate lawfully. Fields include approval number, business name, address, approval date, approval type and status. This database will no longer be updated, as CofA's have been replaced by either Environmental Activity and Sector Registry (EASR) or Environmental Compliance Approval (ECA). Please refer to those individual databases for any information after Oct.31, 2011.

Government Publication Date: 1985-Oct 30, 2011*

Dry Cleaning Facilities: Federal CDRY

List of dry cleaning facilities made available by Environment and Climate Change Canada. Environment and Climate Change Canada's Tetrachloroethylene (Use in Dry Cleaning and Reporting Requirements) Regulations (SOR/2003-79) are intended to reduce releases of tetrachloroethylene to the environment from dry cleaning facilities.

Government Publication Date: Jan 2004-Dec 2019

Commercial Fuel Oil Tanks: Provincial CFOT

Locations of commercial underground fuel oil tanks. This is not a comprehensive or complete inventory of commercial fuel tanks in the province; this listing is a copy of records of registered commercial underground fuel oil tanks obtained under Access to Public Information.
Note that the following types of tanks do not require registration: waste oil tanks in apartments, office buildings, residences, etc.; aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Chemical Manufacturers and Distributors: Private CHEM

This database includes information from both a one time study conducted in 1992 and private source and is a listing of facilities that manufacture or distribute chemicals. The production of these chemical substances may involve one or more chemical reactions and/or chemical separation processes (i.e. fractionation, solvent extraction, crystallization, etc.).

Government Publication Date: 1999-Jan 31, 2020

Chemical Register: Private CHM

This database includes a listing of locations of facilities within the Province or Territory that either manufacture and/or distributes chemicals.

Government Publication Date: 1999-Sep 30, 2021

Compressed Natural Gas Stations: Private CNG

Canada has a network of public access compressed natural gas (CNG) refuelling stations. These stations dispense natural gas in compressed form at 3,000 pounds per square inch (psi), the pressure which is allowed within the current Canadian codes and standards. The majority of natural gas refuelling is located at existing retail gasoline that have a separate refuelling island for natural gas. This list of stations is made available by the Canadian Natural Gas Vehicle Alliance.

Government Publication Date: Dec 2012 -Aug 2021

Inventory of Coal Gasification Plants and Coal Tar Sites: Provincial COAL

This inventory includes both the "Inventory of Coal Gasification Plant Waste Sites in Ontario-April 1987" and the Inventory of Industrial Sites Producing or Using Coal Tar and Related Tars in Ontario-November 1988) collected by the MOE. It identifies industrial sites that produced and continue to produce or use coal tar and other related tars. Detailed information is available and includes: facility type, size, land use, information on adjoining properties, soil condition, site operators/occupants, site description, potential environmental impacts and historic maps available. This was a one-time inventory.*

Government Publication Date: Apr 1987 and Nov 1988*

Compliance and Convictions: Provincial CONV

This database summarizes the fines and convictions handed down by the Ontario courts beginning in 1989. Companies and individuals named here have been found guilty of environmental offenses in Ontario courts of law.

Government Publication Date: 1989-Jul 2021

Certificates of Property Use: Provincial CPU

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all CPU's on the registry such as (EPA s. 168.6) - Certificate of Property Use.

Government Publication Date: 1994 - Sep 30, 2021

Drill Hole Database: Provincial DRL

The Ontario Drill Hole Database contains information on more than 113,000 percussion, overburden, sonic and diamond drill holes from assessment files on record with the department of Mines and Minerals. Please note that limited data is available for southern Ontario, as it was the last area to be completed. The database was created when surveys submitted to the Ministry were converted in the Assessment File Research Image Database (AFRI) project. However, the degree of accuracy (coordinates) as to the exact location of drill holes is dependent upon the source document submitted to the MNDM. Levels of accuracy used to locate holes are: centering on the mining claim; a sketch of the mining claim; a 1:50,000 map; a detailed company map; or from submitted a "Report of Work".

Government Publication Date: 1886 - Sep 2020

Delisted Fuel Tanks: Provincial DTNK

List of fuel storage tank sites that were once found in - and have since been removed from - the list of fuel storage tanks made available by the regulatory agency under Access to Public Information.

Government Publication Date: May 31, 2021

Environmental Activity and Sector Registry: Provincial EASR

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. The EASR allows businesses to register certain activities with the ministry, rather than apply for an approval. The registry is available for common systems and processes, to which preset rules of operation can be applied. The EASR is currently available for: heating systems, standby power systems and automotive refinishing. Businesses whose activities aren't subject to the EASR may apply for an ECA (Environmental Compliance Approval), Please see our ECA database.

Government Publication Date: Oct 2011- Sep 30, 2021

Environmental Registry: Provincial EBR

The Environmental Registry lists proposals, decisions and exceptions regarding policies, Acts, instruments, or regulations that could significantly affect the environment. Through the Registry, thirteen provincial ministries notify the public of upcoming proposals and invite their comments. For example, if a local business is requesting a permit, license, or certificate of approval to release substances into the air or water; these are notified on the registry. Data includes: Approval for discharge into the natural environment other than water (i.e. Air) - EPA s. 9, Approval for sewage works - OWRA s. 53(1), and EPA s. 27 - Approval for a waste disposal site. For information regarding Permit to Take Water (PTTW), Certificate of Property Use (CPU) and (ORD) Orders please refer to those individual databases.

Government Publication Date: 1994- Sep 30, 2021

Environmental Compliance Approval: Provincial ECA

On October 31, 2011, a smarter, faster environmental approvals system came into effect in Ontario. In the past, a business had to apply for multiple approvals (known as certificates of approval) for individual processes and pieces of equipment. Today, a business either registers itself, or applies for a single approval, depending on the types of activities it conducts. Businesses whose activities aren't subject to the EASR may apply for an ECA. A single ECA addresses all of a business's emissions, discharges and wastes. Separate approvals for air, noise and waste are no longer required. This database will also include Renewable Energy Approvals. For certificates of approval prior to Nov 1st, 2011, please refer to the CA database. For all Waste Disposal Sites please refer to the WDS database.

Government Publication Date: Oct 2011- Aug 31, 2021

Environmental Effects Monitoring: Federal EEM

The Environmental Effects Monitoring program assesses the effects of effluent from industrial or other sources on fish, fish habitat and human usage of fisheries resources. Since 1992, pulp and paper mills have been required to conduct EEM studies under the Pulp and Paper Effluent Regulations. This database provides information on the mill name, geographical location and sub-lethal toxicity data.

Government Publication Date: 1992-2007*

ERIS Historical Searches: Private EHS

ERIS has compiled a database of all environmental risk reports completed since March 1999. Available fields for this database include: site location, date of report, type of report, and search radius. As per all other databases, the ERIS database can be referenced on both the map and "Statistical Profile" page.

Government Publication Date: 1999-Jun 30, 2021

Environmental Issues Inventory System: Federal EIIS

The Environmental Issues Inventory System was developed through the implementation of the Environmental Issues and Remediation Plan. This plan was established to determine the location and severity of contaminated sites on inhabited First Nation reserves, and where necessary, to remediate those that posed a risk to health and safety; and to prevent future environmental problems. The EIIS provides information on the reserve under investigation, inventory number, name of site, environmental issue, site action (Remediation, Site Assessment), and date investigation completed.

Government Publication Date: 1992-2001*

Emergency Management Historical Event: Provincial EMHE

List of locations of historical occurrences of emergency events, including those assigned to the Ministry of Natural Resources by Order-In-Council (OIC) under the Emergency Management and Civil Protection Act, as well as events where MNR provided requested emergency response assistance. Many of these events will have involved community evacuations, significant structural loss, and/or involvement of MNR emergency response staff. These events fall into one of ten (10) type categories: Dam Failure; Drought / Low Water; Erosion; Flood; Forest Fire; Soil and Bedrock Instability; Petroleum Resource Center Event, EMO Requested Assistance, Continuity of Operations Event, Other Requested Assistance. EMHE record details are reproduced by ERIS under License with the Ontario Ministry of Natural Resources © Queen's Printer for Ontario, 2017.

Government Publication Date: Dec 31, 2016

Environmental Penalty Annual Report: Provincial EPAR

This database contains data from Ontario's annual environmental penalty report published by the Ministry of the Environment and Climate Change. These reports provide information on environmental penalties for land or water violations issued to companies in one of the nine industrial sectors covered by the Municipal Industrial Strategy for Abatement (MISA) regulations.

Government Publication Date: Jan 1, 2011 - Dec 31, 2020

List of Expired Fuels Safety Facilities: Provincial EXP

List of facilities and tanks for which there was once a fuel registration. This is not a comprehensive or complete inventory of expired tanks/tank facilities in the province; this listing is a copy of previously registered tanks and facilities obtained under Access to Public Information. Includes private fuel outlets, bulk plants, fuel oil tanks, gasoline stations, marinas, propane filling stations, liquid fuel tanks, piping systems, etc; includes tanks which have been removed from the ground.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2020

Federal Convictions: Federal FCON

Environment Canada maintains a database referred to as the "Environmental Registry" that details prosecutions under the Canadian Environmental Protection Act (CEPA) and the Fisheries Act (FA). Information is provided on the company name, location, charge date, offence and penalty.

Government Publication Date: 1988-Jun 2007*

Contaminated Sites on Federal Land: Federal FCS

The Federal Contaminated Sites Inventory includes information on known federal contaminated sites under the custodianship of departments, agencies and consolidated Crown corporations as well as those that are being or have been investigated to determine whether they have contamination arising from past use that could pose a risk to human health or the environment. The inventory also includes non-federal contaminated sites for which the Government of Canada has accepted some or all financial responsibility. It does not include sites where contamination has been caused by, and which are under the control of, enterprise Crown corporations, private individuals, firms or other levels of government. Includes fire training sites and sites at which Per- and Polyfluoroalkyl Substances (PFAS) are a concern.

Government Publication Date: Jun 2000-Aug 2021

Fisheries & Oceans Fuel Tanks: Federal FOFT

Fisheries & Oceans Canada maintains an inventory of aboveground & underground fuel storage tanks located on Fisheries & Oceans property or controlled by DFO. Our inventory provides information on the site name, location, tank owner, tank operator, facility type, storage tank location, tank contents & capacity, and date of tank installation.

Government Publication Date: 1964-Sep 2019

Federal Identification Registry for Storage Tank Systems (FIRSTS): Federal FRST

A list of federally regulated Storage tanks from the Federal Identification Registry for Storage Tank Systems (FIRSTS). FIRSTS is Environment and Climate Change Canada's database of storage tank systems subject to the Storage Tank for Petroleum Products and Allied Petroleum Products Regulations. The main objective of the Regulations is to prevent soil and groundwater contamination from storage tank systems located on federal and aboriginal lands. Storage tank systems that do not have a valid identification number displayed in a readily visible location on or near the storage tank system may be refused product delivery.

Government Publication Date: May 31, 2018

Fuel Storage Tank: Provincial FST

List of registered private and retail fuel storage tanks. This is not a comprehensive or complete inventory of private and retail fuel storage tanks in the province; this listing is a copy of registered private and retail fuel storage tanks, obtained under Access to Public Information.
Notes: registration was not required for private fuel underground/aboveground storage tanks prior to January 1990, nor for furnace oil tanks prior to May 1, 2002; registration is not required for waste oil tanks in apartments, office buildings, residences, etc., or aboveground gas or diesel tanks. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Fuel Storage Tank - Historic: Provincial FSTH

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks. Public records of private fuel storage tanks are only available since the registration became effective in September 1989. This information is now collected by the Technical Standards and Safety Authority.

Government Publication Date: Pre-Jan 2010*

Ontario Regulation 347 Waste Generators Summary: Provincial GEN

Regulation 347 of the Ontario EPA defines a waste generation site as any site, equipment and/or operation involved in the production, collection, handling and/or storage of regulated wastes. A generator of regulated waste is required to register the waste generation site and each waste produced, collected, handled, or stored at the site. This database contains the registration number, company name and address of registered generators including the types of hazardous wastes generated. It includes data on waste generating facilities such as: drycleaners, waste treatment and disposal facilities, machine shops, electric power distribution etc. This information is a summary of all years from 1986 including the most currently available data. Some records may contain, within the company name, the phrase "See & Use..." followed by a series of letters and numbers. This occurs when one company is amalgamated with or taken over by another registered company. The number listed as "See & Use", refers to the new ownership and the other identification number refers to the original ownership. This phrase serves as a link between the 2 companies until operations have been fully transferred.

Government Publication Date: 1986-Apr 30, 2021

Greenhouse Gas Emissions from Large Facilities: Federal GHG

List of greenhouse gas emissions from large facilities made available by Environment Canada. Greenhouse gas emissions in kilotonnes of carbon dioxide equivalents (kt CO2 eq).

Government Publication Date: 2013-Dec 2019

TSSA Historic Incidents: Provincial HINC

List of historic incidences of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen recorded by the TSSA in their previous incident tracking system. The TSSA's Fuels Safety Program administers the Technical Standards & Safety Act 2000, providing fuel-related safety services associated with the safe transportation, storage, handling and use of fuels such as gasoline, diesel, propane, natural gas and hydrogen. Under this Act, the TSSA regulates fuel suppliers, storage facilities, transport trucks, pipelines, contractors and equipment or appliances that use fuels. Records are not verified for accuracy or completeness. This is not a comprehensive or complete inventory of historical fuel spills and leaks in the province. This listing is a copy of the data captured at one moment in time and is hence limited by the record date provided here.

Government Publication Date: 2006-June 2009*

Indian & Northern Affairs Fuel Tanks: Federal IAFT

The Department of Indian & Northern Affairs Canada (INAC) maintains an inventory of aboveground & underground fuel storage tanks located on both federal and crown land. Our inventory provides information on the reserve name, location, facility type, site/facility name, tank type, material & ID number, tank contents & capacity, and date of tank installation.

Government Publication Date: 1950-Aug 2003*

Fuel Oil Spills and Leaks: Provincial INC

Listing of spills and leaks of diesel, fuel oil, gasoline, natural gas, propane, and hydrogen reported to the Spills Action Centre (SAC). This is not a comprehensive or complete inventory of fuel-related leaks, spills, and incidents in the province; this listing in a copy of incidents reported to the SAC, obtained under Access to Public Information. Includes incidents from fuel-related hazards such as spills, fires, and explosions. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Landfill Inventory Management Ontario: Provincial LIMO

The Landfill Inventory Management Ontario (LIMO) database is updated every year, as the Ministry of the Environment, Conservation and Parks compiles new and updated information. Includes small and large landfills currently operating as well as those which are closed and historic. Operators of larger landfills provide landfill information for the previous operating year to the ministry for LIMO including: estimated amount of total waste received, landfill capacity, estimated total remaining landfill capacity, fill rates, engineering designs, reporting and monitoring details, size of location, service area, approved waste types, leachate of site treatment, contaminant attenuation zone and more. The small landfills include information such as site owner, site location and certificate of approval # and status.

Government Publication Date: Feb 28, 2019

Canadian Mine Locations: Private MINE

This information is collected from the Canadian & American Mines Handbook. The Mines database is a national database that provides over 290 listings on mines (listed as public companies) dealing primarily with precious metals and hard rocks. Listed are mines that are currently in operation, closed, suspended, or are still being developed (advanced projects). Their locations are provided as geographic coordinates (x, y and/or longitude, latitude). As of 2002, data pertaining to Canadian smelters and refineries has been appended to this database.

Government Publication Date: 1998-2009*

Mineral Occurrences: Provincial MNR

In the early 70's, the Ministry of Northern Development and Mines created an inventory of approximately 19,000 mineral occurrences in Ontario, in regard to metallic and industrial minerals, as well as some information on building stones and aggregate deposits. Please note that the "Horizontal Positional Accuracy" is approximately +/- 200 m. Many reference elements for each record were derived from field sketches using pace or chain/tape measurements against claim posts or topographic features in the area. The primary limiting factor for the level of positional accuracy is the scale of the source material. The testing of horizontal accuracy of the source materials was accomplished by comparing the plan metric (X and Y) coordinates of that point with the coordinates of the same point as defined from a source of higher accuracy.

Government Publication Date: 1846-Dec 2020

National Analysis of Trends in Emergencies System (NATES): Federal NATE

In 1974 Environment Canada established the National Analysis of Trends in Emergencies System (NATES) database, for the voluntary reporting of significant spill incidents. The data was to be used to assist in directing the work of the emergencies program. NATES ran from 1974 to 1994. Extensive information is available within this database including company names, place where the spill occurred, date of spill, cause, reason and source of spill, damage incurred, and amount, concentration, and volume of materials released.

Government Publication Date: 1974-1994*

Non-Compliance Reports: Provincial NCPL

The Ministry of the Environment provides information about non-compliant discharges of contaminants to air and water that exceed legal allowable limits, from regulated industrial and municipal facilities. A reported non-compliance failure may be in regard to a Control Order, Certificate of Approval, Sectoral Regulation or specific regulation/act.

Government Publication Date: Dec 31, 2019

National Defense & Canadian Forces Fuel Tanks: Federal NDFT

The Department of National Defense and the Canadian Forces maintains an inventory of all aboveground & underground fuel storage tanks located on DND lands. Our inventory provides information on the base name, location, tank type & capacity, tank contents, tank class, date of tank installation, date tank last used, and status of tank as of May 2001. This database will no longer be updated due to the new National Security protocols which have prohibited any release of this database.

Government Publication Date: Up to May 2001*

National Defense & Canadian Forces Spills: Federal NDSP

The Department of National Defense and the Canadian Forces maintains an inventory of spills to land and water. All spill sites have been classified under the "Transportation of Dangerous Goods Act - 1992". Our inventory provides information on the facility name, location, spill ID #, spill date, type of spill, as well as the quantity of substance spilled & recovered.

Government Publication Date: Mar 1999-Apr 2018

National Defence & Canadian Forces Waste Disposal Sites: Federal NDWD

The Department of National Defence and the Canadian Forces maintains an inventory of waste disposal sites located on DND lands. Where available, our inventory provides information on the base name, location, type of waste received, area of site, depth of site, year site opened/closed and status.

Government Publication Date: 2001-Apr 2007*

National Energy Board Pipeline Incidents: Federal NEBI

Locations of pipeline incidents from 2008 to present, made available by the Canada Energy Regulator (CER) - previously the National Energy Board (NEB). Includes incidents reported under the Onshore Pipeline Regulations and the Processing Plant Regulations related to pipelines under federal jurisdiction, does not include incident data related to pipelines under provincial or territorial jurisdiction.

Government Publication Date: 2008-Jun 30, 2021

National Energy Board Wells: Federal NEBP

The NEBW database contains information on onshore & offshore oil and gas wells that are outside provincial jurisdiction(s) and are thereby regulated by the National Energy Board. Data is provided regarding the operator, well name, well ID No./UWI, status, classification, well depth, spud and release date.

Government Publication Date: 1920-Feb 2003*

National Environmental Emergencies System (NEES): Federal NEES

In 2000, the Emergencies program implemented NEES, a reporting system for spills of hazardous substances. For the most part, this system only captured data from the Atlantic Provinces, some from Quebec and Ontario and a portion from British Columbia. Data for Alberta, Saskatchewan, Manitoba and the Territories was not captured. However, NEES is also a repository for previous Environment Canada spill datasets. NEES is composed of the historic datasets ' or Trends ' which dates from approximately 1974 to present. NEES Trends is a compilation of historic databases, which were merged and includes data from NATES (National Analysis of Trends in Emergencies System), ARTS (Atlantic Regional Trends System), and NEES. In 2001, the Emergencies Program determined that variations in reporting regimes and requirements between federal and provincial agencies made national spill reporting and trend analysis difficult to achieve. As a consequence, the department has focused efforts on capturing data on spills of substances which fall under its legislative authority only (CEPA and FA). As such, the NEES database will be decommissioned in December 2004.

Government Publication Date: 1974-2003*

National PCB Inventory: Federal NPCB

Environment Canada's National PCB inventory includes information on in-use PCB containing equipment in Canada including federal, provincial and private facilities. Federal out-of-service PCB containing equipment and PCB waste owned by the federal government or by federally regulated industries such as airlines, railway companies, broadcasting companies, telephone and telecommunications companies, pipeline companies, etc. are also listed. Although it is not Environment Canada's mandate to collect data on non-federal PCB waste, the National PCB inventory includes some information on provincial and private PCB waste and storage sites. Some addresses provided may be Head Office addresses and are not necessarily the location of where the waste is being used or stored.

Government Publication Date: 1988-2008*

National Pollutant Release Inventory: Federal NPRI

Environment Canada has defined the National Pollutant Release Inventory ("NPRI") as a federal government initiative designed to collect comprehensive national data regarding releases to air, water, or land, and waste transfers for recycling for more than 300 listed substances.

Government Publication Date: 1993-May 2017

Oil and Gas Wells: Private OGWE

The Nickle's Energy Group (publisher of the Daily Oil Bulletin) collects information on drilling activity including operator and well statistics. The well information database includes name, location, class, status and depth. The main Nickle's database is updated on a daily basis, however, this database is updated on a monthly basis. More information is available at www.nickles.com.

Government Publication Date: 1988-Feb 28, 2021

Ontario Oil and Gas Wells: Provincial OOGW

In 1998, the MNR handed over to the Ontario Oil, Gas and Salt Resources Corporation, the responsibility of maintaining a database of oil and gas wells drilled in Ontario. The OGSR Library has over 20,000+ wells in their database. Information available for all wells in the ERIS database include well owner/operator, location, permit issue date, and well cap date, license No., status, depth and the primary target (rock unit) of the well being drilled. All geology/stratigraphy table information, plus all water table information is also provide for each well record.

Government Publication Date: 1800-Jan 2021

Inventory of PCB Storage Sites: Provincial OPCB

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of PCB storage sites within the province. Ontario Regulation 11/82 (Waste Management - PCB) and Regulation 347 (Generator Waste Management) under the Ontario EPA requires the registration of inactive PCB storage equipment and/or disposal sites of PCB waste with the Ontario Ministry of Environment. This database contains information on: 1) waste quantities; 2) major and minor sites storing liquid or solid waste; and 3) a waste storage inventory.

Government Publication Date: 1987-Oct 2004; 2012-Dec 2013

Orders: Provincial ORD

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all Orders on the registry such as (EPA s. 17) - Order for remedial work, (EPA s. 18) - Order for preventative measures, (EPA s. 43) - Order for removal of waste and restoration of site, (EPA s. 44) - Order for conformity with Act for waste disposal sites, (EPA s. 136) - Order for performance of environmental measures.

Government Publication Date: 1994-Sep 30, 2021

Canadian Pulp and Paper: Private PAP

This information is part of the Pulp and Paper Canada Directory. The Directory provides a comprehensive listing of the locations of pulp and paper mills and the products that they produce.

Government Publication Date: 1999, 2002, 2004, 2005, 2009-2014

Parks Canada Fuel Storage Tanks: Federal PCFT

Canadian Heritage maintains an inventory of known fuel storage tanks operated by Parks Canada, in both National Parks and at National Historic Sites. The database details information on site name, location, tank install/removal date, capacity, fuel type, facility type, tank design and owner/operator.

Government Publication Date: 1920-Jan 2005*

Pesticide Register: Provincial PES

The Ontario Ministry of the Environment and Climate Change maintains a database of licensed operators and vendors of registered pesticides.

Government Publication Date: Oct 2011- Aug 31, 2021

Pipeline Incidents: Provincial PINC

List of pipeline incidents (strikes, leaks, spills). This is not a comprehensive or complete inventory of pipeline incidents in the province; this listing in an historical copy of records previously obtained under Access to Public Information. Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Private and Retail Fuel Storage Tanks: Provincial PRT

The Fuels Safety Branch of the Ontario Ministry of Consumer and Commercial Relations maintained a database of all registered private fuel storage tanks and licensed retail fuel outlets. This database includes an inventory of locations that have gasoline, oil, waste oil, natural gas and/or propane storage tanks on their property. The MCCR no longer collects this information. This information is now collected by the Technical Standards and Safety Authority (TSSA).

Government Publication Date: 1989-1996*

Permit to Take Water: Provincial PTTW

This is a subset taken from Ontario's Environmental Registry (EBR) database. It will include all PTTW's on the registry such as OWRA s. 34 - Permit to take water.

Government Publication Date: 1994 - Sep 30, 2021

Ontario Regulation 347 Waste Receivers Summary: Provincial REC

Part V of the Ontario Environmental Protection Act ("EPA") regulates the disposal of regulated waste through an operating waste management system or a waste disposal site operated or used pursuant to the terms and conditions of a Certificate of Approval or a Provisional Certificate of Approval. Regulation 347 of the Ontario EPA defines a waste receiving site as any site or facility to which waste is transferred by a waste carrier. A receiver of regulated waste is required to register the waste receiving facility. This database represents registered receivers of regulated wastes, identified by registration number, company name and address, and includes receivers of waste such as: landfills, incinerators, transfer stations, PCB storage sites, sludge farms and water pollution control plants. This information is a summary of all years from 1986 including the most currently available data.

Government Publication Date: 1986-1990, 1992-2018

Record of Site Condition: Provincial RSC

The Record of Site Condition (RSC) is part of the Ministry of the Environment's Brownfields Environmental Site Registry. Protection from environmental cleanup orders for property owners is contingent upon documentation known as a record of site condition (RSC) being filed in the Environmental Site Registry. In order to file an RSC, the property must have been properly assessed and shown to meet the soil, sediment and groundwater standards appropriate for the use (such as residential) proposed to take place on the property. The Record of Site Condition Regulation (O. Reg. 153/04) details requirements related to site assessment and clean up.
RSCs filed after July 1, 2011 will also be included as part of the new (O.Reg. 511/09).

Government Publication Date: 1997-Sept 2001, Oct 2004-Sep 2021

Retail Fuel Storage Tanks: Private RST

This database includes an inventory of retail fuel outlet locations (including marinas) that have on their property gasoline, oil, waste oil, natural gas and / or propane storage tanks.

Government Publication Date: 1999-Sep 30, 2021

Scott's Manufacturing Directory: Private SCT

Scott's Directories is a data bank containing information on over 200,000 manufacturers across Canada. Even though Scott's listings are voluntary, it is the most comprehensive database of Canadian manufacturers available. Information concerning a company's address, plant size, and main products are included in this database.

Government Publication Date: 1992-Mar 2011*

Ontario Spills: Provincial SPL

List of spills and incidents made available the Ministry of the Environment, Conservation and Parks. This database identifies information such as location (approximate), type and quantity of contaminant, date of spill, environmental impact, cause, nature of impact, etc. Information from 1988-2002 was part of the ORIS (Occurrence Reporting Information System). The SAC (Spills Action Centre) handles all spills reported in Ontario. Regulations for spills in Ontario are part of the MOE's Environmental Protection Act, Part X.

Government Publication Date: 1988-Sep 2020

Wastewater Discharger Registration Database: Provincial SRDS

Information under this heading is combination of the following 2 programs. The Municipal/Industrial Strategy for Abatement (MISA) division of the Ontario Ministry of Environment maintained a database of all direct dischargers of toxic pollutants within nine sectors including: Electric Power Generation; Mining; Petroleum Refining; Organic Chemicals; Inorganic Chemicals; Pulp & Paper; Metal Casting; Iron & Steel; and Quarries. All sampling information is now collected and stored within the Sample Result Data Store (SRDS).

Government Publication Date: 1990-Dec 31, 2018

Anderson's Storage Tanks: Private TANK

The information provided in this database was collected by examining various historical documents, which identified the location of former storage tanks, containing substances such as fuel, water, gas, oil, and other various types of miscellaneous products. Information is available in regard to business operating at tank site, tank location, permit year, permit & installation type, no. of tanks installed & configuration and tank capacity. Data contained within this database pertains only to the city of Toronto and is not warranted to be complete, exhaustive or authoritative. The information was collected for research purposes only.

Government Publication Date: 1915-1953*

Transport Canada Fuel Storage Tanks: Federal TCFT

List of fuel storage tanks currently or previously owned or operated by Transport Canada. This inventory also includes tanks on The Pickering Lands, which refers to 7,530 hectares (18,600 acres) of land in Pickering, Markham, and Uxbridge owned by the Government of Canada since 1972; properties on this land has been leased by the government since 1975, and falls under the Site Management Policy of Transport Canada, but is administered by Public Works and Government Services Canada. This inventory provides information on the site name, location, tank age, capacity and fuel type.

Government Publication Date: 1970 - Dec 2020

Variances for Abandonment of Underground Storage Tanks: Provincial VAR

Listing of variances granted for storage tank abandonment. This is not a comprehensive or complete inventory of tank abandonment variances in the province; this listing is a copy of tank abandonment variance records previously obtained under Access to Public Information. In Ontario, registered underground storage tanks must be removed within two years of disuse; if removal of a tank is not feasible, an application may be sought for a variance from this code requirement.
Records are not verified for accuracy or completeness.

Government Publication Date: May 31, 2021

Waste Disposal Sites - MOE CA Inventory: Provincial WDS

The Ontario Ministry of Environment, Waste Management Branch, maintains an inventory of known open (active or inactive) and closed disposal sites in the Province of Ontario. Active sites maintain a Certificate of Approval, are approved to receive and are receiving waste. Inactive sites maintain Certificate(s) of Approval but are not receiving waste. Closed sites are not receiving waste. The data contained within this database was compiled from the MOE's Certificate of Approval database. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number. All new Environmental Compliance Approvals handed out after Oct 31, 2011 for Waste Disposal Sites will still be found in this database.

Government Publication Date: Oct 2011- Aug 31, 2021

Waste Disposal Sites - MOE 1991 Historical Approval Inventory: Provincial WDSH

In June 1991, the Ontario Ministry of Environment, Waste Management Branch, published the "June 1991 Waste Disposal Site Inventory", of all known active and closed waste disposal sites as of October 30st, 1990. For each "active" site as of October 31st 1990, information is provided on site location, site/CA number, waste type, site status and site classification. For each "closed" site as of October 31st 1990, information is provided on site location, site/CA number, closure date and site classification. Locations of these sites may be cross-referenced to the Anderson database described under ERIS's Private Source Database section, by the CA number.

Government Publication Date: Up to Oct 1990*

Water Well Information System: Provincial WWIS

This database describes locations and characteristics of water wells found within Ontario in accordance with Regulation 903. It includes such information as coordinates, construction date, well depth, primary and secondary use, pump rate, static water level, well status, etc. Also included are detailed stratigraphy information, approximate depth to bedrock and the approximate depth to the water table.

Government Publication Date: Apr 30, 2021

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

Bedrock Geology Report Metadata

Ontario Geological Survey 2011. 1:250 000 scale bedrock geology of Ontario; Ontario Geological Survey, Miscellaneous Release-Data 126 Revision1

ONTARIO MINISTRY OF NORTHERN DEVELOPMENT, MINES AND FORESTRY

ID - Unit ID **Unit Name** - Generalized geological unit classification

Type (All) - The geological unit number(s) or code(s) for all rock types present in an individual polygon.

Type (Primary) - The primary geological unit number or code for the primary rock type in an individual polygon

Type (Secondary) - The secondary geological unit number or code for the secondary rock type, if present, in an individual polygon

Type (Tertiary) - The tertiary geological unit number or code for the tertiary rock type, if present, in an individual polygon

Rock Type (Primary) - Rock type or sub-unit description

Status (Primary) - The Stratigraphic unit. Divided into:

```
Supergroup (two or more groups and lone formations)
Group (two or more formations)
Formation (primary unit of lithostratigraphy)
Member (named lithologic subdivision of a formation)
Bed (named distinctive layer in a member or formation)
```

Super Eon (Primary) - A name given to the largest defined unit of geological time, divided into Eons. Unique values which this field may contain (Domains) are:

```
PRECAMBRIAN (0.542 Ga to <3.85 Ga)
```

Eon (Primary) - A name given to a defined unit of geological time, divided into Eras. Unique values which this field may contain (Domains) are:

```
ARCHEAN (2.5 Ga to <3.85 Ga)
PROTEROZOIC (0.542 Ga to 2.50 Ga)
PHANEROZOIC (Present to 542.0 Ma)
```

Era (Primary) - A name given to a defined unit of geological time, divided into Periods. Each era on the scale is separated from the next by a major event or change. Unique values which this field may contain (Domains) are:

```
MESOARCHEAN (2.8 Ga to 3.2 Ga)
NEO-TO MESOARCHEAN (2.5 Ga to 3.2 Ga)
NEOARCHEAN (2.5 Ga to 2.8 Ga)
PALEOPROTEROZOIC (1.6 Ga to 2.5 Ga)
MESO-TO PALEOPROTEROZOIC (1.0 Ga to 2.5 Ga)
MESOPROTEROZOIC (1.0 Ga to 1.6 Ga)
EARLY PALEOZOIC TO NEOPROTEROZOIC (443.7 Ma to 1.0 Ga)
NEO-TO MESOPROTEROZOIC (0.542 Ga to 1.6 Ga)
PALEOZOIC (251.0 Ma to 542.0 Ma)
MESOZOIC (65.5 Ma to 251.0 Ma)
```

Period (Primary) - A name given to a defined unit of geological time, divided into Epochs. Unique values which this field may contain (Domains) are:

```
CAMBRIAN (488.3 Ma to 542.0 Ma)
ORDOVICIAN (443.7 Ma to 488.3 Ma)
SILURIAN (416.0 Ma to 443.7 Ma)
DEVONIAN (359.2 Ma to 416.0 Ma)
MISSISSIPPIAN TO DEVONIAN (318.1 Ma to 416.0 Ma)
JURASSIC (145.5 Ma to 199.6 Ma)
CRETACEOUS AND JURASSIC (65.5 Ma to 199.6 Ma)
```

Epoch (Primary) - A name given to a defined unit of geological time. Unique values which this field may contain (Domains) are:

```
LOWER ORDOVICIAN
MIDDLE ORDOVICIAN
UPPER ORDOVICIAN
MIDDLE AND LOWER SILURIAN
UPPER SILURIAN TO LOWER DEVONIAN
UPPER SILURIAN
LOWER DEVONIAN
MIDDLE DEVONIAN
UPPER DEVONIAN
LOWER CRETACEOUS AND MIDDLE JURASSIC
```

Province (Primary) - The Geological Province the geological unit is in. Unique values which this field may contain (Domains) are:

```
SUPERIOR
SOUTHERN
SUPERIOR
GRENVILLE
```

Surface Geology Report Metadata

Ontario Geological Survey 2010. Surficial geology of southern Ontario; Ontario Geological Survey, Miscellaneous Release - Data 128 - Revised.

ONTARIO MINISTRY OF NORTHERN DEVELOPMENT, MINES AND FORESTRY

ID - ID applied to the Unit

Unit Name - Name of deposit

Deposit Type Code - The geological unit number taken from the original map legend.

Deposit Age - to show the age when the sediments were deposited, e.g., Wisconsinan, postglacial or recent.

Map Number - Original map series number, eg., 'M2402' or 'P1973'. Each sgu_point feature is tagged to its original map.

Map Name - Usually NTS area where mapping was completed, e.g., 'Golden Lake'

Source Map Scale - The scale at which the original map was captured, e.g., '1:50 000'

Primary Material - This attribute provides the user with information regarding the most prevalent material present within a given area.

Primary Material Modifier- This attribute provides the user with a more refined description of the lithological classification of the primary material.

Secondary Material - This attribute provides the user with information regarding subordinate materials present within a given area.

Primary General - This attribute provides the user with an interpretation of the depositional environment within which the primary material was deposited.

Primary General Modifier - This attribute provides the user with a refined interpretation of the primary genetic modifier.

Veneer - This attribute provides the user with information regarding the type of material that forms a thin, discontinuous veneer over the primary material.

Sub Episode - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

Sub Episode - A diachronic stratigraphic unit in a lower order than Episode and the proposed sequence-stratigraphic classification, consists in descending order of Michigan, Elgin and Ontario in the eastern and northern Great Lakes area in the Wisconsin Episode (Johnson et al. 1997; Karrow et al. 2000).

Phase - A diachronic stratigraphic unit in a lower order than Subepisode, and the proposed sequence-stratigraphic classification is listed in the following table in the eastern and northern Great Lakes area (Karrow et al. 2000)

Stratus Modifier - This attribute provides the user information regarding the stratigraphic position of the mapped unit (i.e., whether the unit occurs primarily on the surface or in the subsurface).

Provenance - This attribute provides the user with information regarding the provenance of a particular till unit (i.e. direction or lobe from which the till is derived).

Carbon Content - This attribute provides the user with information regarding the carbonate content of till.

Formation - This attribute provides the user with information regarding the formation to which a given primary material belongs (e.g., Tavistock Till, Port Stanley Till, Scarborough Formation). This attribute is seamless and allows the user to create a map based on formation.

Permeability - This attribute provides the user with basic information about permeability of the sediments in a ranking of high, medium and low.

Material Description - Material or sediment description, e.g., 'sand and silty fine sand', 'silty sand and gravel' and 'silty till with low stone content'.

Re: GTR-21018382-A0 Freedom of Information Request Form
15 Denison Avenue, Toronto, Ontario

Dear Sir or Madam:

I would like to submit a Freedom of Information Request Form relating to the property with the municipal address, 15 Denison Avenue, Toronto, Ontario. Attached please find a cheque payment, payable to the Minister of Finance (FOI), in the amount of $35.00.

All documentation pertaining to this request should be referenced to EXP job number GTR-21018382-A0. Please call me at 905-695-3217 Ext. 3642 if you require any additional information in regards to this request.

Yours very truly,
EXP Services Inc.

Kate Miles, P.Eng.,
Project Scientist

Attachment: Freedom of Information Request Form

Subject: RE: Preliminary Search Request

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

Please refrain from sending documents to head office and only submit your requests electronically via email along with credit card payment. We are all working remotely and mailing in applications with cheques will lengthen the overall processing time.

NO RECORD FOUND

Hello,

Thank you for your request for confirmation of public information.

- We confirm that there are no records in our database of any fuel storage tanks at the subject addresses.

For a further search in our archives please complete our release of public information form found at https://www.tssa.org/en/about-tssa/release-of-public-information.aspx?_mid_=392 and email the completed form to publicinformationservices@tssa.org along with a fee of $56.50 (including HST) per location. The fee is payable with credit card (Visa or MasterCard).

Although TSSA believes the information provided pursuant to your request is accurate, please note that TSSA does not warrant this information in any way whatsoever.

Kind regards,

Mariah

Good Morning,

I would like to request a preliminary search to determine if there are any records of petroleum operations, including records of underground storage tanks and products stored that you might have on file for the following municipal addresses:

15 Denison Avenue, Toronto
19 Denison Avenue, Toronto
24 Augusta Avenue, Toronto
17 Wolseley Street, Toronto
12 Denison Avenue, Toronto
466 Queen Street West, Toronto
468 Queen Street West, Toronto
480 Queen Street West, Toronto
482 Queen Street West, Toronto
484 Queen Street West, Toronto

Thank you,

Kate Miles, B.Sc.

Appendix K – Phase One Conceptual Site Model

DRAFT

Phase One ESA Conceptual Site Model

15 Denison Avenue, Toronto, Ontario

This section presents the Phase One Conceptual Site Model (P1CSM), as it relates to the Site designated as 15 Denison Avenue, in Toronto, Ontario, providing a narrative and graphical description integrating information related to the areas of potential environmental concern/potential contaminating activities and the presence and distribution of potential contaminants of concern. The P1CSM was completed in accordance with Ontario Regulation 153/04, as amended (O.Reg.153/04), as defined by the Ontario Ministry Environment, Conservation and Parks (MECP). There is no uncertainty or absence of information noted in the Phase One Environmental Site Assessment.

1.1 Introduction

The Site is located on the east side of Denison Avenue, west side of Augusta Avenue and south side of Wolseley Street, approximately 45 metres north of Queen Street West. Details of the Site are as follows:

Table 1: Site Identification Information

Municipal Address	15 Denison Avenue
Current Land Use	Commercial
Proposed Land Use	Residential
Legal Description	Lts 6-8, Pt Lt 9 Pl D127, Pt Lt 3 n/s Queen Street, Pl 65, Pt Unlettered Lot as in WA88252, WA88288, WA88331, WA88833, WA89463, WA90829, WA97766, WA88489 Pt Lt 1 Pl D127, Pt Lt 3 n/s Queen St, Plan 65, Pt Lot 9 Plan D127, Lane Pl 65&D127 Lots 1-5 Plan D127, Except WA95815, WA99649
Property Identification Number (PIN)	21238-0047 (LT) 21238-0045 (LT) 21238-0046 (LT)
Approximate Universal Transverse Mercator (UTM) coordinates	NAD83 17T 629009 m E 4834085 m N
Accuracy Estimate of UTM	10-15 m
Measurement Method	GPS
Site Area	0.24 hectares (0.59 acres)
Property Owners, Owner Contact and Address	The Corporation of the City of Toronto 61 Front Street West, Union Station, East Wing, 3rd Floor Toronto, Ontario M5J 1E5 attn. Ms. Tracey Smith

DRAFT

1.2 Background

Based on a review of fire insurance plans, municipal records, historical aerial photographs, chain of title information, and other records, the Site was first developed for residential use prior to 1875, and a bakery was opened at 13 Denison Avenue (central-western portion of the site) in the 1920s. Circa 1970, the structures on-site were demolished and the site was redeveloped into the current parking lot.

1.3 Geological and Hydrogeological Conditions

The Site and surrounding areas are located within the Iroquois Plain which is expected to consist of undifferentiated older tills and may include stratified deposits. The bedrock in the general area of the Site is part of a group belonging to the Georgian Bay Formation, Blue Mountain Formation, Billings Formation, Collingwood Member and Eastview Member, consisting of shale, limestone, dolostone and siltstone.

According to the topographic map from Natural Resources of Canada (Toporama), the elevation of the Site is approximately 94 m above sea level. A review of the topographic map indicated that the nearest water body is Lake Ontario, located approximately 1.3 km south of the site. Based on the local topography, the anticipated groundwater flow direction is south.

Based on the review of available resources from the Ministry of Natural Resources and Forestry website on December 21, 2021, no areas of natural significance were identified at the Site or within 30 m of the Site.

1.4 Previous Investigations

The following reports were made available at the time of this Phase One ESA:

1. A report entitled "Summary of Environmental Investigation – 15 Denison Avenue, Toronto, Ontario", prepared by Terrapex Environmental Ltd. (Terrapex) for the City of Toronto on April 30th, 2020.

    - The Site was described as a commercial parking lot operated by the Toronto Parking Authority (TPA), encompassing an area of approximately 2,800 m^2 (0.28 ha)

    - The report was completed for due-diligence purposes to assist in determining the feasibility of redeveloping the Site with Emergency Housing. The report included a historical records review of the Site and surrounding properties, and a limited environmental subsurface investigation completed at the Site. The report was noted to not provide sufficient support for the filing of a Record of Site Condition (RSC).

    - Based on a historical record review, the Site was previously developed with mixed residential and commercial buildings from prior to 1900 to the late 1960s/early 1970s, later being demolished and developed into a parking lot in the 1970's. Based on past uses identified at the Site, fill material of unknown quality was identified as a potential environmental concern on the Site.

    - Based on a historical record review of surrounding properties, several dry cleaners were located approximately 30 m southwest of the Site, and 20 to 50 m east of the Site. Given the close proximity to the Site, they were identified as posing a potential environmental concern to the Site.

    - Based on a historical review of surrounding properties, historical fuel tanks were identified at several residential and commercial properties located 50 m south and 20 m west of the Site. Given the close proximity to the Site, they were identified as posing a potential environmental concern to the Site.

DRAFT

- Based on the concerns identified at the Site, a limited environmental subsurface investigation was completed in April 2020. Eight (8) boreholes were advanced at the Site to a maximum depth of 4.4 m below ground surface (mbgs). Characterization of fill material included the chemical analysis of PHCs, VOCs, Metals and Inorganics, and PAHs. An additional soil sample was submitted for chemical analysis for six (6) of the eight (8) boreholes for vertical characterization of shallow soil impacts. Samples were submitted to Bureau Veritas Laboratory (BV Labs) and were compared to full-depth Site Condition Standards (SCS) for residential/parkland/institutional land use in a non-potable groundwater condition with coarse textured soil. It was noted that groundwater quality at the Site was not investigated during the limited environmental subsurface investigation.

- The soil conditions at the Site generally consisted of asphalt, granular fill, fill material extending from 0.7 or 1.0 to 1.5 or 1.9 mbgs, and a till deposit extending to 4.4 mbgs

- Based on the results of the submitted soil samples, six (6) of the eight (8) sampling locations resulted in elevated concentrations of Metals and Inorganics, PAHs and/or VOCs. The results of PHCs analysis met the table 3 SCS in all tested soil samples. The exceedances were listed as follows:

    - PAH exceedances were noted in BH101, BH102, BH104 and BH 108. Impacted soil was generally identified at a depth ranging from 0.3 to 0.6 mbgs in the fill unit at the northwest, central and southeast portions of the Site, and suspected to be related to poor quality fill material used at the Site;
    - Chloroform exceedance was noted in BH102. Impacted soil was generally identified at a depth ranging from 0.8 to 1.1 mbgs in the north central portion of the Site, and suspected to be related to a water main leak in the Wolseley Street Road allowance;
    - Metal exceedances were noted in BH101, BH102, BH105, BH106, BH107, and BH108. Impacted soil was generally identified at a depth ranging from 0.3 to 1.1 mbgs, and is suspected to be related to poor quality fill material used at the Site;
    - Salt-related parameters at all eight (8) boreholes were identified at an elevated level exceeting the Table 3 SCS. Impacted soil was generally identified at a depth ranging from 0.3 to 4.4 mbgs in the fill and native silty clay till units, and is suspected to be related to road salt placed at the Site for vehicular and pedestrian safety purposes.

- Based on the Site investigation, recommendations concluded the following:
    - If the Site is selected for redevelopment with Emergency Housing, it is understood that the filing of an RSC will be required by MECP, including the requirement of additional Phase One and Phase Two ESA's, and Site Remediation and/or a Risk Assessment; and,
    - A Soil Management Plan should be developed and implemented that meets O.Reg 406/19 requirements prior to undertaking earthworks at the Site.

1.5 Underground Utilities

The Site utilities and services were identified at the Site based on information provided in environmental records, relevant utility infrastructure observed during the Site reconnaissance. The Site utilities are summarized in the table

DRAFT

below and noted on Figure 3, where available. It is noted that the precise underground location of the utilities cannot be determined without professional locate services.

Utility	Source	Location	Site Entry
Natural Gas	Enbridge Gas	Underground	Unknown
Sanitary Sewer	City of Toronto	Underground	Unknown
Storm Sewer	City of Toronto	Underground	Various storm sewers observed in the asphalt portion of the Site.
Water	City of Toronto	Underground	Unknown.
Electricity	Toronto Hydro	Underground	Unknown
Telecommunications	Bell Canada / Telus / Rogers	Underground	Unknown

DRAFT

1.6 Potentially Contaminating Activities and Areas of Potential Environmental Concern:

Refer to Table 2 and Figure 2 for the list of potentially contaminating activities (PCAs) that have occurred within the Phase One Study Area, which includes the Site and properties within 250 m radius of the Site boundaries.

Table 2: Potentially Contaminating Activities

PCA Identifier	Address	Location of Activity (in relation to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
Site					
1	Entire Site	On-site	PCA#30 – Importation of Fill Material of Unknown Quality	Fill material of unknown quality was used as a base for the parking lot, and in the former building cavities.	Yes, as the PCA is located on-Site.
2	Entire Site	On-site	PCA#Other – de-icing salts	De-icing salts were potentially used in the parking lot.	Yes, as the PCA is located on-Site.
Surrounding Properties					
3	5 Denison Avenue	5 m south	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records Denison Laundry was located at the property from 1936 to 1940.	Yes, based on the close proximity to the Site.
4	1-5 Denison Avenue	5 m south	PCA#Other - historical manufacturing	Based on the 1948 and 1961 FIPs, various light factories were located at the property.	Yes, based on the close proximity to the Site.
5	3 Denison Avenue	15 m south	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records Denison Cleaners was located at the property from 1955 to 1960.	Yes, based on the close proximity to the Site.
6	472-474 Queen Street West	5 m south	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the 1948 and 1961 FIPs, a metal works company was located at the rear of the property.	Yes, based on the close proximity to the Site.
7	468 Queen Street West	5 m south	PCA#Other – Coal Storage	Based on the municipal records, Rogers Elias Coal Co Ltd was located at the property from 1907 to 1940.	Yes, based on the close proximity to the Site.

DRAFT

PCA Identifier	Address	Location of Activity (in relation to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
8	478 Queen Street West	immediately south	PCA#28 Gasoline and Associated Products in Fixed Tanks	Based on the ERIS report, J. Brelin had a fuel tank installed in 1919.	Yes, based on the close proximity to the Site.
9	11 Augusta Avenue	15 m southeast	PCA#8 – Chemical Manufacturing, Processing and Bulk Storage	Based on the municipal records, Allen William H Co, manufacturing chemists were located at the property in 1885.	Yes, based on the close proximity to the Site.
10	21-23 Augusta Avenue	15 m east	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, Maple Leaf Cleaners Ltd. was located at the property from 1960 to 1965.	Yes, based on the close proximity to the Site.
11	458 Queen Street West	15 m east	PCA#17 – Dye Manufacturing, Processing and Bulk Storage	Based on the municipal records, British American Dyeing Co was located at the property in 1900.	Yes, based on the close proximity to the Site.
12	12 Denison Avenue	20 m west of the site	PCA#28 Gasoline and Associated Products in Fixed Tanks	Based on the ERIS report, a fuel oil tank was installed in 1932.	Yes, based on the close proximity to the Site.
13	41 Augusta Avenue	65 m north	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the 1935 FIP, a repair garage was located at the property.	Yes, based on the close proximity to the Site.
14	1 Denison Avenue	25 m south	PCA#Other - historical manufacturing	Based on the municipal records, Denton Manufacturing was located at the property in 1955.	No, based on the inferred hydraulically downgradient location relative to the Site.
15	2 Denison Avenue	35 m southwest	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, a cleaning and pressing business was located at the property in 1945.	No, based on the inferred hydraulically downgradient location relative to the Site.
16	40 Denison Avenue	80 m northwest	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a blacksmith was located at the property in 1865.	No, based on the inferred hydraulically cross-gradient location relative to the Site.

DRAFT

PCA Identifier	Address	Location of Activity (in relation to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
17	64 Denison Avenue	175 m northwest	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a blacksmith was located at the property in 1870.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
18	68 Denison Avenue	185 m northwest	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a blacksmith was located at the property from 1875 to 1880.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
19	476 Adelaide Street West	210 m south	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a blacksmith was located at the property in 1880.	No, based on the inferred hydraulically downgradient location relative to the Site.
20	480 Adelaide Street West	235 m south	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the ERIS report, State of the Arts Ltd. (a printing company) was registered as a waste generator at the property between 1995 and 2001.	No, based on the inferred hydraulically downgradient location relative to the Site.
21	490 Adelaide Street West	235 m south	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the municipal records, Webster Printing Co was located at the property from 1950 to 1960.	No, based on the inferred hydraulically downgradient location relative to the Site.
22A	502 Adelaide Street West	235 m south	PCA#39 – Paints Manufacturing, Processing and Bulk Storage	Based on the municipal records, various paint companies were located at the property between 1945 and 1995.	No, based on the inferred hydraulically downgradient location relative to the Site.
22B	502 Adelaide Street West	235 m south	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, Nu Way Mfg Co was located at the property between 1955 and 1979.	No, based on the inferred hydraulically downgradient location relative to the Site.
22C	502 Adelaide Street West	235 m south	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, a cleaner & presser was located at the property in 1925.	No, based on the inferred hydraulically downgradient location relative to the Site.
23A	530 Adelaide Street	240 m southwest	PCA#54 – Textile Manufacturing and Processing	Based on the ERIS report various clothing and textile manufacturing businesses were located at the property.	No, based on the inferred hydraulically downgradient location relative to the Site.
23B	530 Adelaide Street	240 m southwest	PCA#49 – Salvage Yard, including automobile wrecking	Based on the 1948 FIP, a junk yard was located at the property.	No, based on the inferred hydraulically downgradient location relative to the Site.

No, based on the inferred hydraulically downgradient location relative to the Site.
103B	553 Queen Street West	55 m south	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, a fur cleaning company was located at the property in 1940.	No, based on the inferred hydraulically downgradient location relative to the Site.
103C	553 Queen Street West	55 m south	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a blacksmith was located at the property in 1880.	No, based on the inferred hydraulically downgradient location relative to the Site.
103D	553 Queen Street West	55 m south	PCA#54 – Textile Manufacturing and Processing	Based on the 1964 FIP, a clothing factory was located at the property.	No, based on the inferred hydraulically downgradient location relative to the Site.
104	567 Queen Street West	60 m south	PCA#17 – Dye Manufacturing, Processing and Bulk Storage	Based on the municipal records, a dyer was located at the property in 1885.	No, based on the inferred hydraulically downgradient location relative to the Site.
105	575 Queen Street West	75 m southwest	PCA#8 – Chemical Manufacturing, Processing and Bulk Storage	Based on the municipal records, Frontier Chemical Co was located at the property in 1960.	No, based on the inferred hydraulically downgradient location relative to the Site.
106	581 Queen Street West	85 m south	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Based on the ERIS report, H Franklin had a fuel oil tank installed in 1925.	No, based on the inferred hydraulically downgradient location relative to the Site.
107	587 Queen Street West	115 m southwest	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a blacksmith was located at the property in 1865.	No, based on the inferred hydraulically downgradient location relative to the Site.

108	591 Queen Street West	125 m southwest	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, a cleaning & pressing business was located at the property in 1940.	No, based on the inferred hydraulically downgradient location relative to the Site.
109	495 Queen Street	125 m southeast	PCA#Other – vaping business	Based on the ERIS report, JUUL Labs, Inc. was registered as a waste generator of miscellaneous waste organic chemicals as of October 2019.	No, based on the inferred hydraulically downgradient location relative to the Site.
110	597 Queen Street West	145 m southwest	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, various dry cleaning businesses were located at the property from 1945 to 1979.	No, based on the inferred hydraulically downgradient location relative to the Site.
111	601 Queen Street West	150 m southwest	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, Durand Plating Co was located at the property in 1907.	No, based on the inferred hydraulically downgradient location relative to the Site.
112	603 Queen Street West	155 m southwest	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, Durand Electro Plating Co was located at the property from 1914 to 1940.	No, based on the inferred hydraulically downgradient location relative to the Site.
113	605 Queen Street West	160 m southwest	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, various tinsmiths and blacksmiths were located at the property from 1890 to 1945.	No, based on the inferred hydraulically downgradient location relative to the Site.
114A	607 Queen Street West	165 m southwest	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, various laundry businesses were located at the property from 1895 to 1960.	No, based on the inferred hydraulically downgradient location relative to the Site.
114B	607 Queen Street West	165 m southwest	PCA#49 – Salvage Yard, including automobile wrecking	Based on the municipal records, Standard Car Wreckers were located at the property in 1940.	No, based on the inferred hydraulically downgradient location relative to the Site.
115	609 Queen Street West	170 m southwest	PCA#54 – Textile Manufacturing and Processing	Based on the municipal records and ERIS report, a knitting mill was located at the property from 1995 to 2000.	No, based on the inferred hydraulically downgradient location relative to the Site.
116A	619 Queen Street West	195 m southwest	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the municipal records, a printing company was located at the property from 1895 to 1900.	No, based on the inferred hydraulically downgradient location relative to the Site.

167	196 Spadina Avenue	215 m northeast	PCA#54 – Textile Manufacturing and Processing	Based on the ERIS report, various clothing manufacturing companies were located at the property.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
168	198 Spadina Avenue	245 m northeast	PCA#54 – Textile Manufacturing and Processing	Based on the ERIS report, a fur clothing manufacturing company was located at the property.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
169	208-210 Spadina Avenue	245 m northeast	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the FIP, General Motors Garage was located at the property.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
170	1 Vanauley Street	120 m east	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, a dry cleaner was located at the property in 1972.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
171A	7 Vanauley Street	120 m east	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a buckle and clasp manufacturing company was located at the property from 1978 to 1986.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
171B	7 Vanauley Street	120 m east	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, a dry cleaner was located at the property in 1965.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
172A	8 Vanauley Street	85 m east	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Based on the ERIS report, Associated Cleaners & Dyers, a dry cleaning business had a gasoline tank installed in 1933.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
172B	8-14 Vanauley Street	85 m east	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, a dry cleaner was located at the property from 1929 to 1979.	No, based on the inferred hydraulically cross-gradient location relative to the Site.

DRAFT

PCA Identifier	Address	Location of Activity (in relation to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
173	14 Vanauley Street	85 m east	PCA#28 – Gasoline and Associated Products Storage in Fixed Tanks	Based on the ERIS report, Fountain "My Valet", a cleaning and pressing business, had a gasoline tank installed in 1920.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
174	20-28 Vanauley Street	85 m east	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, a dry cleaner was located at the property in 1965.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
175A	28 Vanauley Street	85 m east	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used)	Based on the municipal records, a dry cleaner was located at the property from 1945 to 1960.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
175B	28 Vanauley Street	85 m east	PCA#59 – Wood Treating and Preservative Facility and Bulk Storage of Treated and Preserved Wood Products	Based on the municipal records, a furniture manufacturing company was located at the property in 1936.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
176	28-30 Vanauley Street	85 m east	PCA#52 – Storage, maintenance, fueling, and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the municipal records, Mack Trucks of Canada Ltd. was located at the property in 1925.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
177A	39 Vanauley Street	120 m east	PCA#8 – Chemical Manufacturing, Processing and Bulk Storage	Based on the municipal records, a chemist was located at the property in 1875.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
177B	39 Vanauley Street	120 m east	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a blacksmith was located at the property in 1865.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
178	40 Vanauley Street	85 m northeast	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a tin can manufacturing company was located at the property in 1955.	No, based on the inferred hydraulically cross-gradient location relative to the Site.

DRAFT

PCA Identifier	Address	Location of Activity (in relation to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
179A	40-42 Vanauley Street	85 m northeast	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a metal and textile salvage was located at the property in 1955.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
179B	40-42 Vanauley Street	85 m northeast	PCA#54 – Textile Manufacturing and Processing	Based on the municipal records, a metal and textile salvage was located at the property in 1955.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
180	50 Vanauley Street	90 m northeast	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a blacksmith was located at the property in 1880.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
181	55 Vanauley Street	120 m east	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a tinmith was located at the property in 1880.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
182A	94 Vanauley Stret	120 m northeast	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a metal and textile salvage was located at the property from 1919 to 1929.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
182**B**	94 Vanauley Stret	120 m northeast	PCA#54 – Textile Manufacturing and Processing	Based on the municipal records, a metal and textile salvage was located at the property from 1919 to 1929.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
183	96 Vanauley Street	120 m northeast	PCA#49 – Salvage Yard, including automobile wrecking	Based on the municipal records, a salvage yard was located at the property from 1945 to 1950	No, based on the inferred hydraulically cross-gradient location relative to the Site.
184	22 Wolseley Street	65 m west	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the municipal records, a blacksmith was located at the property in 1880.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
185	35 Wolseley Street	85 m west	PCA#58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste other than use of biosoils as soil conditioners	Based on the ERIS report, in 1946, a well at the rear of the property was filled using 100 loads of ashes.	No, based on the inferred hydraulically cross-gradient location relative to the Site.

DRAFT

PCA Identifier	Address	Location of Activity (in relation to Site)[1]	Potentially Contaminating Activity (PCA)[2]	Approximate timeline that PCA occurred	Contributes to APEC (Yes or No)?
186	51 Wolsley Street	135 m west	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the ERIS report, a printing company was located at the property.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
187	54 Wolseley Street	160 m west	PCA#31 – Ink Manufacturing, Processing and Bulk Storage	Based on the ERIS report, a printing company was located at the property.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
188	55 Wolseley Street	145 m west	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the ERIS report, a tinsmith was located at the property in 1919.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
189	63 Wolseley Street	170 m west	PCA#33 – Metal Treatment, Coating, Plating and Finishing	Based on the FIP, and iron and aluminum business was located at the property.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
190	Vanauley Street and Queen Street West	115 m east	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Based on the ERIS report, Metrolinx was registered as a waste generator of other specified inorganic sludges, slurries or solids, waste oils/sludges (petroleum based) and light fuels from 2020 to as of April 2021.	No, based on the inferred hydraulically cross-gradient location relative to the Site.
191	St. Andrews Square (south of Richmond Street West and east of Maud Street,	135 m south	PCA#58 - Waste Disposal and Waste Management, including thermal treatment, landfilling and transfer of waste other than use of biosoils as soil conditioners	Based on the ERIS report, in the 1880s ashes, mud and scrapings were deposit in St. Andrew's Square. The property was later filled and graded and occupied by a market, hall, city yard and playground.	No, based on the inferred hydraulically downgradient location relative to the Site.

(1) Distances are approximate. Precise distances are not possible due to the age of some listings and the aggregation and/or loss of addresses.

(2) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg 153/04, as amended) that is occurring or has occurred in a phase one Study area.

DRAFT

1.7 Areas of Potential Environmental Concern

Based on the evaluation of the PCAs located within the Phase One Study Area, the following areas of potential environmental concern (APECs) were identified, as presented in Figure 4.

Table 3: Areas of Potential Environmental Concern

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)1	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 1: Potential presence of unknown quality fill material brought to site for construction of parking lot and infilling of former building cavities (PCA identifier 1)	Entire Site	PCA#30 - Importation of Fill Material of Unknown Quality	On-Site	PAHs, metals, As, Sb, Se, HWS-B, CN-, Hg, Cr(VI)	Soil
APEC 2: Potential use of de-icing salts in the parking lot.	Entire Site	PCA#Other – de-icing salts	On-Site	EC and SAR	Soil
APEC 3: Off-site PCAs to the south – historical dry cleaning, light manufacturing, metals work, coal storage and fuel tank (PCA identifiers 3, 4, 5, 6, 7, 8)	Southern portion of Site	PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used) PCA#Other - historical manufacturing PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used) PCA#33 – Metal Treatment, Coating, Plating and Finishing PCA#Other – Coal Storage PCA#28 Gasoline and Associated Products in Fixed Tanks	Off-Site	PAHs, metals, As, Sb, Se, HWS-B, CN-, Hg, Cr(VI), PHCs, VOCs,	Groundwater

DRAFT

Area of Potential Environmental Concern (APEC)	Location of APEC on Phase One Property	Potentially Contaminating Activity (PCA)1	Location of PCA (on-Site or off-Site)	Contaminants of Potential Concern	Media Potentially Impacted (Groundwater, soil and/or sediment)
APEC 4: Off-site PCAs to the southeast – historic chemists, dry cleaning and dye works (PCA identifiers, 9, 10, 11)	Southeastern portion of site	PCA#8 – Chemical Manufacturing, Processing and Bulk Storage PCA#37 – Operation of Dry Cleaning Equipment (where chemicals are used) PCA#17 – Dye Manufacturing, Processing and Bulk Storage	Off-site	PHCs, VOCs, PAHs	Groundwater
APEC 5: Historic fuel oil tank to the west (PCA identifier 12)	Northwestern portion of site	PCA#28 Gasoline and Associated Products in Fixed Tanks	Off-site	PHCs	Groundwater
APEC 6: Historic repair garage to the north (PCA identifier 13)	Northeastern portion of site	PCA#52 – Storage, maintenance, fuelling and repair of equipment, vehicles, and material used to maintain transportation systems	Off-site	PHCs, VOCs	Groundwater

(1) Potentially contaminating activity means a use or activity set out in Column A of Table 2 of Schedule D (O.Reg.153/04, as amended) that is occurring or has occurred in a phase one Study area.

Based on the findings of the Phase One ESA and conclusions, a Phase Two ESA is required to assess the soil and groundwater conditions at the Site.
